## PREFACE

THE history of the two collections of coins, a portion of which is catalogued in this volume, and an account of the manner in which they passed under the control of the Trustees of the Indian Museum will be found in the General Introduction ; but a brief explanation of the genesis of this catalogue is required to enable the reader to understand the plan of the work and the necessity for its preparation. The Asiatic Society of Bengal never succeeded in giving effect to a declared intention of printing a catalogue of the coins in the possession of the Society, which have in consequence remained almost unknown to students of numismatics. The 'Catalogue of the Coins of the Indian Museum', prepared by the late Mr. C. J. Rodgers and printed by order of the Trustees during the years 1893-6, was a rough list rather than a scientific catalogue, and since its appearance large accessions to the collection had been made, which remained unclassified and undescribed. The necessity for a new catalogue being thus apparent, the Trustees, acting on a suggestion made by Sir James Bourdillon, K.C.S.I., resolved to arrange for its preparation, and invited me to undertake the task in November, 1903. The invitation in its original form applied to the whole joint collection of the Asiatic Society and the Indian Museum, which exceeded 20,000 coins in number. On consideration I found that it would be impossible to deal with such a mass, the larger part of which consists of Muhammadan coins to which my studies had not been specially directed. Ultimately it was arranged that the work should be divided, Mr. H. Nelson Wright, I.C.S., undertaking the Muhammadan coins, while my labours should be confined to the classes of coins treated in this volume.

A serious preliminary difficulty arose from the fact that the coins in the Indian Museum collection had never been arranged in classes. They had simply been put into the cabinets in the order of their receipt, and so presented an unmanageable jumble.

This fundamental defect had not been remedied by Mr. Rodgers when he prepared his catalogue, and it is difficult to imagine how he managed to describe the coins. But, during the course of the year 1904, Mr. H. Nelson Wright visited Calcutta, and succeeded in effecting a rough classification of the Indian Museum coins, with sufficient accuracy to allow the separation of the classes assigned to me. I received the first batch of coins on December 14, 1904, and the last batch on May 30, 1906. The coins received number about 5,000, out of which nearly 3,000 are described. The difference is accounted for by a multitude of duplicates, a large mass of worthless defaced specimens, a few forgeries, and some parcels which were not included in my commission, and were consequently returned without detailed examination.

The plan of this volume is as follows. The coins are treated in twenty-four sections, to each of which is prefixed a brief historical introduction with full bibliographical details. The sections have been grouped in three parts. The first part, dealing with the early foreign dynasties and the Guptas, includes almost all the coins which exhibit clear traces of Hellenic influence, and, consequently, with very few exceptions, all the coins possessed of artistic merit; because in Indian coinages the degree of artistic merit is directly proportioned to the amount of Hellenic influence. The aesthetic superiority and general interest of the coins treated in Part I entitle them to eighteen out of the thirty-one plates. Part II is devoted to the ancient coins of Indian types, some of which are earlier in date than the coinage derived from Greek models. All these ancient coins are so rude and inartistic that it has been found possible to give fairly adequate illustrations of them in five plates. Part III comprises all the other classes of coins specified in my instructions, and includes the mediaeval coins of Northern and Central India, the coinage of the south and west, and that of the frontier kingdoms up to the present day. The Sassanian coins of Persia, which served as the prototype of extensive Indian series, have been described in accordance with the wishes of the Trustees. The catalogue concludes with the coinage of Ceylon and a small set of miscellaneous coins from Arakan and other places.

The typographical arrangement is similar, in a general way, to that of the British Museum catalogues, but financial limitations have precluded the free use of facsimiles of legends and monograms in the text. The monograms have been grouped in separate plates, and the legends, as a rule, have been transliterated. In transliteration the consonants may be regarded as having the English values, *ch* and *j* severally representing the Sanskrit च and ज. The cerebral letters are indicated in the usual way by a dot below; *m̐* is *anusvāra*, *ṇ* the palatal, and *ṇ̐* the guttural nasal. The palatal sibilant is expressed by *ś* and the cerebral by *sh*; *ṣ* being used as the equivalent of the Arabic *ṣād*. The vowels and diphthongs generally are to be read as in Italian, but the short *a*, when with stress, is pronounced like *u* in *nut*, and, when without stress, like *A* in *America*. The marking of long and short vowels in the Kharōshthī script is so apparently irregular that the attempt to distinguish them in that character has been abandoned. In the translations of legends no rendering is given of the honorific prefix or suffix *Śrī*, which is commonly translated 'the fortunate'.

Although the superiority of the metric system for all scientific purposes is incontestable, I have thought it better to follow the British Museum precedent, and to state diameters in decimals of an English inch, and weights in Troy grains. The tables prefixed, which are reprinted from the catalogues of the British Museum, by kind permission of the Trustees of that institution, enable the reader to convert the figures into those of the decimal system without difficulty. Almost every coin has been weighed, excepting some poor copper specimens, for which it is waste of labour to record the weights.

A small impression of each of the three Parts separately has been printed, and will be sold for the convenience of collectors and others whose interest may be confined to limited portions of the vast field of Indian numismatics. Each of these Parts is provided with a short Index, sufficient to enable the reader to trace any required coin. A copious General Index is given in addition in this volume.

My obligations to books are fully recorded in the text and notes. I have much pleasure in offering hearty thanks to the

scholars who have helped me in certain details. Professor C. W. C. Oman gave me the benefit of his skilled judgement in the matter of the Kushān forgeries. Dr. Codrington kindly indicated and procured for me the literature of the Sassanian coinage. Professor Hultsch was good enough to examine and decipher sundry coins of Western and Southern India which were unfamiliar to me ; and Mr. H. Nelson Wright favoured me with his readings of the Persian legends on certain Assamese coins. Professor Rapson was always ready, so far as possible, to communicate his unrivalled knowledge of Indian numismatics, and I am indebted to him for invaluable assistance.

My acknowledgements to the Trustees of the Indian Museum are due for their liberality in granting me unfettered discretion in all matters concerning the arrangement and execution of the work ; and, like all authors who have the good fortune to deal with the Clarendon Press, I am deeply indebted to the staff of that institution. If oversights should be found in this catalogue, as I fear they may be, the blame will not rest upon the Press. Every precaution that I could think of has been adopted to ensure correctness, but if criticism detects errors, the difficulty of securing absolute accuracy in a work dealing with nearly three thousand coins, which extend over a period of some twenty-five centuries, and bear legends in numerous languages and scripts, will, I trust, be recognized. The casts of the coins have been prepared by Mr. A. P. Ready of the British Museum with his usual skill.

**TABLE FOR CONVERTING ENGLISH INCHES INTO  
MILLIMETRES AND THE MEASURES OF MIONNET'S SCALE**

The image shows a technical drawing of a vernier scale, likely for a surveying instrument. It consists of three vertical columns of markings, each with a title at the top.

- ENGLISH INCHES:** The leftmost column. It has major markings at 1, 1.5, 2, 2.5, 3, 3.5, and 4. Between these major markings, there are 10 minor markings, representing 0.1 inch increments.
- MIONNET'S SCALE:** The middle column. It has major markings from 1 to 19. Between these major markings, there are 10 minor markings, representing 0.1 unit increments.
- FRENCH MILLIMETRES:** The rightmost column. It has major markings from 5 to 100 in increments of 5. Between these major markings, there are 10 minor markings, representing 0.5 mm increments.

The scale is designed to allow for precise measurements in three different units, with the vernier principle used to achieve high accuracy in each.

## GENERAL INTRODUCTION

THE Asiatic Society of Bengal was founded in 1784, and twelve years later the proposal to establish a museum was mooted, but nothing was done to carry it into effect until 1814, when a beginning was made. The appointment of a paid Curator in 1835 and the allocation of a grant from public funds in 1839 placed the infant institution on a firmer basis, and the collections of the Society gradually increased in value.

A few coins had been presented in early days, but the first considerable numismatic acquisition was a set of duplicates from the cabinet of Colonel Mackenzie, presented by the Government of Bengal after his death in 1821. Professor H. H. Wilson published in the *Asiatic Researches* for 1832 a notice of the small collection of coins then in existence. During Prinsep's time many more specimens must have been received, but in 1843, when Dr. Roer printed an imperfect list in the *Proceedings*, the most important section of the cabinet was a set of Roman coins found in India; the Bactrian, Indo-Scythian, Sassanian, and Gupta classes together numbering only one hundred and sixteen specimens. In the following year, 1844, all the more intrinsically valuable coins were stolen, and only a poor remnant was left, which was described by Mr. Freeling in the *Proceedings* for 1857. But early in 1859 the purchase of the Stacy collection for Rs. 4,000 made the cabinet of the Society comparatively rich in the coins of ancient India. Since that date the accessions have not been very numerous or important, consisting chiefly of treasure trove presented by the various Indian governments, supplemented by a few gifts from private donors.<sup>1</sup>

The Asiatic Society of Bengal not being able to maintain a museum worthy of the capital of the Indian empire, all parties interested agreed that such an institution should be organized by the Government of India. The consequent negotiations resulted in the enactment of Act XVII of 1866, which provided for 'the establishment of a Public Museum at Calcutta to be called the Indian Museum', under the control of a body corporate of Trustees. The building was finished and handed over to the Trustees in 1875, but the galleries were not opened to the public until three years later. Certain changes in the constitution of

<sup>1</sup> The history of the cabinet of the Asiatic Society of Bengal is recorded in the *Centenary Review of the Researches of the Society, 1784-1883* (Calcutta, 1885). Mr. Thomas published a rough list and valuation of the Stacy collection in the *Journal* for 1858.

the governing body were made by Act XXII of 1876, which repealed and re-enacted the earlier Act with the necessary amendments. The coins belonging to the Asiatic Society of Bengal, although now deposited in the Indian Museum, are still the property of the Society, and the Act requires them to be 'kept and preserved' in the Museum with 'such marks and numbers' as may be necessary for their identification.

With the exception of the important purchase of the Rivett-Carnac collection about twenty years ago, the cabinet of the Indian Museum, as distinguished from that of the Asiatic Society, has been dependent almost wholly on presentations of treasure trove made by the central and provincial governments and the Calcutta mint. Very few coins have been acquired by means of exchange or private donation.

The cabinets of both the Asiatic Society and the Indian Museum having been formed in a haphazard fashion, starved in funds, and usually administered by officials untrained in numismatic science, are very far from being what they ought to be, when the richness of India in numismatic treasure is considered. The joint collection now catalogued must be pronounced to be, as a whole, lamentably defective; but a very moderate annual outlay on purchases judiciously made under competent direction would raise it in the course of a few years to a standard more worthy of an imperial museum.

Still, notwithstanding its conspicuous deficiencies, the collection described in this volume includes many valuable and interesting coins, and a few new to science. The contents of the catalogue are so multifarious that readers may find it convenient to have their attention drawn to some of its special features. With the remarkable exception of the group of Kushān forgeries noted in the Introduction to Section III (p. 65), the false coins met with have been few in number and easily detected. The doubtful cases included in the catalogue are probably less than a score, and all the others may be accepted as genuine with confidence. The set of Gupta gold coins is fine, but the silver series of the Gupta kings and Western Satraps is very defective. The ancient coins of Indian types described in Part II are varied and interesting. Many of the best specimens come from either the Stacy or the Rivett-Carnac cabinet. The present catalogue of one hundred and eight select punch-marked coins will be found, it is hoped, to give a more comprehensive and systematic view of the beginnings of Indian coinage than has previously appeared; and the series of Mālava tribal coins may be specially mentioned as one of exceptional interest. The various heterogeneous coins grouped together in Part III include a few good series. The Sassanian coins of Persia, which have been catalogued in accordance with the desire of the Trustees, are connected with the Indian coinage so closely that they deserve a place in a work on Indian numismatics.

The set described, although far from complete, is fairly representative. The catalogue of the coins of Nepāl (Section XIX) gives, for the first time, a tolerably adequate view of the numismatic history of that kingdom. The series of Assamese coins (Section XX) is extensive and fine. The recent publication of Mr. Gait's *History of Assam* has greatly facilitated the study of this series. The collection of coins of Western and Southern India (Sections XXI, XXII), regarded as a whole, is miserably poor. Extensive classes are unrepresented, and the collection is so fragmentary that it is impossible to gain a satisfactory notion of the peninsular coinages from the catalogue of the specimens in the Museum.

The collection preserved in the Indian Museum having now been weeded, arranged, and catalogued, I trust that I shall not be deemed to travel beyond my province if I venture respectfully to urge upon the responsible financial and executive authorities the necessity for taking measures to keep it up in a manner adapted to scientific requirements and befitting the dignity of a great empire. The practice of huddling together all sorts of coins without classification, and merely placing them in the order of receipt will presumably be abandoned, but this reform alone will not suffice. Apparently everything in the shape of a coin that came to hand used to be given a place, with the result that the cabinets were stuffed with multitudes of duplicates and a mass of worthless old metal. If the collection is to be maintained in a condition fit to serve scientific purposes, it will be needful to obtain expert examination of all proposed accessions before they are admitted, and to keep the printed catalogue up to date by means of manuscript additions. The performance of these indispensable duties requires the services of a skilled numismatist, and I hope that the Trustees will be able to arrange for the necessary additions to the staff of the Museum. If expert assistance is withheld, I fear that the collection will soon fall into disorder, and much of the labour and expense bestowed upon this catalogue will be wasted. It is also much to be desired that a moderate financial provision should be made for the filling up of the numerous gaps in the collection.

# BACTRIAN AND INDO-GREEK

## INTRODUCTION

THE coins of Sophytes, king of the Salt Range in the Panjāb, the contemporary of Alexander (Pl. I, 1), form a class by themselves, and are not connected with the subsequent development of coinage in India. The Bactrian issues, on the contrary, are intimately associated with the local Indian coinage, and a few words of historical explanation are needed to show how the association arose.

In or about the year 250 B. C., Diodotos, governor of Bactria, revolted against the authority of the Seleukidan sovereign, and succeeded in founding a new kingdom, the independence of which was formally recognized some forty years later by Antiochos the Great. If Justin may be believed, the founder of the Bactrian monarchy survived his success but a short time, and was succeeded by his son of the same name. The extant gold coins of Diodotos, one genuine specimen of which (Pl. I, 2) is in the Asiatic Society's cabinet, exhibit a rather youthful portrait, and it seems reasonable to accept Justin's statement, and attribute the coins to Diodotos II. After some years, say about 230 B. C., Euthydemos, a native of Magnesia, made himself master of Bactria. His coinage, which has high artistic merit, is well exemplified in Pl. I, 3, 4, 7, 8. The barbarous imitations, supposed to have been struck at Characene in Susiana (Pl. I, 5, 6), are excellent illustrations of the way in which a fine numismatic type can be degraded by uneducated copyists.

Demetrios, son of Euthydemos, and son-in-law of Antiochos the Great, brought the Bactrian power into contact with India by effecting considerable conquests in the border lands of the latter country about 190 B. C. Specimens of his coins, purely Hellenistic, are shown in Pl. I, 9-11.

The clumsy rectangular coins of the closely related princes Agathokles and Pantaleon (Pl. II, 1, 2), which belong to the same period, obviously are semi-Indian in character, and derive their peculiarities

from the native coinage of Taxila, which will be described in Part II of this work.<sup>1</sup>

The exact dynastic position of Antimachos Theos, who issued some fine coins (Pl. II, 3, 4), cannot be defined. The scanty data available are sufficient to prove that Eukratides (about 175–156 B.C.) was one of the most notable of the Bactrian kings. He defeated Demetrios, but was himself murdered by his own son, supposed to be Apollodotos, who became king of the whole or part of the Indian dominions; while Heliokles, apparently another son of Eukratides, ascended the throne of Bactria. The portraits on the coins of Eukratides are particularly realistic and well executed (Pl. II, 5, 7). Heliokles was the last independent Greek sovereign of the short-lived Bactrian kingdom, and about 140 B.C. was overwhelmed by the irruption of swarms of nomads from Central Asia. Specimens of his coinage, distinctly inferior in merit to that of Eukratides, are shown in Plate III. The coinage of Apollodotos (Pl. IV) is very abundant in some types. The square varieties are much more Indian than Greek. Although the Bactrian monarchy to the north of the Hindū Kush was overthrown by the nomad hordes, Greek princes continued to rule the country which we now call Afghanistan, as well as the Panjāb and Indus valley, for some time longer. The most famous of these Indo-Greek princes was Menander (Milinda or Milindra of Indian literary tradition<sup>2</sup>), who reigned from about 160 to 140 B.C., and effected an invasion of India, during the course of which he traversed Rājputāna and Oudh. His well-executed coinage (Pl. V) was issued in large quantities, and some varieties are quite common. Numerous other Greek princes ruled locally at various points on the Indian frontier, and specimens of their coinage will be found represented in Plates III–VI. The last of them was Hermaios, king of Kābul, who was subjugated by Kadphises I (Kujulakara, &c.), chief of the Kushān section of the Yueh-chi horde, about 45 A.D. For a time the Greek king and the barbarian chieftain shared the sovereignty of Kābul, but gradually the Greek power was wholly obliterated, and the Kushān attained undisputed dominion. The political changes are reflected in the coins (Pl. VI, 11–15, and Pl. XI).

The following alphabetical list of Bactrian and Indo-Greek kings and queens (reprinted with some slight corrections from *The Early History of India* by kind permission of the Delegates of the Clarendon Press) will be found useful for reference :—

Notwithstanding the numerous additions to knowledge made during the last twenty years, Professor Percy Gardner's catalogue of *The Coins of the Greek and Scythic Kings of Bactria and India in the British Museum*, published in 1886, is still the best guide to the student. The principal results of Von Sallet's work, *Die Nachfolger Alexanders des Grossen in Baktrien und Indien* (Berlin, 1879), are incorporated in Professor Gardner's book. Sir Alexander Cunningham's essays entitled 'Coins of Alexander's Successors in the East, the Greeks and Indo-Scythians' (*Num. Chron.*, 1868, 1869, 1870, 1872, 1873), although of great value, require to be read with caution, being disfigured by an excessive amount of fanciful conjecture. Additional references will be found in Professor Rapson's *Indian Coins* (1898); and since the publication of that work sundry scattered notices of particular coins have appeared in various periodicals.

The collection now catalogued, although it includes many fine, rare, and interesting specimens, is far from complete, and offers nothing absolutely unpublished. The two copper coins of Menander (Nos. 24 and 96), believed to be unique, have been published—the former by Mr. Rodgers in his catalogue of the coins in the Indian Museum, and the latter by Professor Gardner in the Supplement to the British Museum catalogue. The silver coin of Queen Agathokleia, apparently the only specimen known in silver, was figured by Mr. Rodgers. The deficiencies in the cabinets now described are deplorably great. The gold Bactrian coinage is represented by only a single specimen of Diodotos, and the coinages of Apollophanes, Artemidoros, Epander, Nikias, Peukelaos, Plato, Strato II, and Telephos are unrepresented.

<sup>1</sup> The letters on Plato's coin are interpreted as signifying the year 147 of the Seleukidan era, equivalent to 165 B. C.

Numerous types of the issues of the kings included in the catalogue are also wanting.

The marks supposed to indicate long vowels in the Kharōshthi script are applied in such an irregular fashion that I have thought it better to ignore them in transliteration, and to write simply *maharajasa*, *tratarasa*, and so forth.

The table of Bactrian and Indo-Greek monograms and marks in Plate VII has been reprinted, by kind permission of the Council of the Royal Numismatic Society, from that published by Cunningham in *Num. Chron.*, N. S., vol. viii, Pl. VII.

---	--------	--------------	---------------------------------------	--

<sup>1</sup> These coins, apparently copied from an issue of Seleukos Nikator, evidently were struck when he invaded India in 305 B.C., and Sophytes presumably submitted to him.

The portrait of Sophytes is that of an elderly man. He must have been young when he met Alexander in 326 B.C., according to Plutarch. Probably Seleukos was not allowed to advance far beyond the Hydaspes (Jihlam), which formed the eastern boundary of the dominions of Sophytes. For another view, see Prof. Rapson's remarks in *Num. Chron.*, 1904, p. 328.

<sup>2</sup> I think that these coins should be attributed to the younger Diodotos of Justin. Von Sallet attributes certain coins of Antiochos (? II) of Syria, with the thundering Zeus, the special cognizance of Diodotos, to Bactria, but Gardner excludes them from the B.M. catalogue of Bactrian coins. Nos. I. M. 7616 Α and I. M. 9804 Α are examples. Nos. A. S. B. 5 Α, and I. M. 7617 Α, with a spear-head in r. field between the legend and Zeus, both from the one die, are forgeries, such as are found in most collections of Bactrian coins.

---	------	--------------	--	---

<sup>1</sup> Some specimens of type 8 contain nickel. I agree with Von Sallet in referring all the above coins to the one king. The origin of the barbarous coins, Nos. 5, 6, is uncertain. Thomas referred them to the Characene (in Susiana) series (*Num. Chron.*, 1862, p. 264). Nos. A. S. B. 15-20, 22-29, and 31-39 are of this class, and have not been catalogued in detail.

ANTIMAXΟΥ, exergue ΘΕΟΥ. In fine condition (Pl. II, 3).
---	--------	-----------------	---	---

<sup>1</sup> Not *Agathukleyasa* as read by Von Sallet and Gardner; the form is a genitive in *-esha* from nom. *Agathuklaya*. (R. O. Franke, 'Zu Açoka's Felsen-Edikten,' in *Nachr. Königl. Gesellsch. W. zu Göttingen*, 1895, p. 529 n.; and same author, *Pali und Sanskrit*, Strassburg, 1902, pp. 84, 104.) The specimens catalogued read *rajane*, not *rajine*, which is usually given as the reading.

## SECTION II

### THE COINS OF THE

# INDO-PARTHIAN DYNASTIES

FROM ABOUT 120 B. C. TO 70 A. D.

## INTRODUCTION

THE Indo-Parthian coins present many difficulties. My views on the historical relations of the kings and satraps whose coins we possess are explained at length in an article entitled 'The Indo-Parthian Dynasties, from about 120 B.C. to 100 A.D.', published in the *Journal of the German Oriental Society* (Z. D. M. G.), Jan. 1906, to which I beg to refer the reader desirous of studying the subject in detail. In this place only the results of the discussion can be given. The key to the chronology is to be found, I think, in the history of Parthia, that is to say the Arsakidan kingdom of Persia; and if that history had been more fully preserved than it has been, the position of the Indo-Parthian dynasties would no longer be obscure.

I accept the statement of Orosius that Mithradates I (Arsakes VI) of Parthia annexed the country between the Indus and Hydaspes (Jihlam), or, in other words, the kingdom of Taxila, towards the close of his reign, in or about 138 B.C. That kingdom, the Western Panjāb, seems to have formed an integral part of the Parthian dominion for a few years, but during the troubles which ensued upon the death of Mithradates I, about 136 B.C., the control of the central government over the outlying provinces was relaxed, and about 120 B.C. a chieftain named Maues (Moa) made himself king of Taxila, and enjoyed practical, if not nominal, independence.

About the same time, or a few years later, a Parthian chief named Vonones (Onōnēs) became king of Drangiana (Sistān), and extended his authority over Arachosia (Kandahār) and the Indian border-land. These latter provinces were administered by relations of Vonones, first his brother Spalahora, and then his nephew, Spalagadama, son of Spalahora.<sup>1</sup> When Vonones died, he was succeeded by another brother named

<sup>1</sup> The names on the coins are spelt with the palatal sibilant, ś. (*J. R. A. S.*, 1902, p. 105, n. 2).

Spalirisha (Spalirises), who continued to administer Arachosia by a viceroy named Aya, or Azes, perhaps his son. But when Spalirisha died, he was not succeeded by Azes ; and this fact may be explained on the supposition that Mithradates II, the Great, suppressed the independence, or quasi-independence, of Sistān with its appanages, and incorporated those provinces directly in the Parthian empire. Azes, however, although deprived of Arachosia, was permitted to succeed Maues at Taxila, and to establish a dynasty there. He was succeeded, after a long reign, by Azilises (Ayilisha), presumably his son, who was followed by Azes II. To him succeeded Gondophares, who reigned prosperously for many years, and about 40 A.D. extended his authority over Arachosia, Sistān, and the valley of the Lower Indus ; probably by taking advantage of the weakness of the central Parthian government at that period.

When Gondophares died, about 60 A.D., his extensive dominion broke up into smaller states. Orthagnes, perhaps his brother, succeeded to the Arachosian provinces, while Abdagases, son of an unnamed brother, obtained the kingdom of Taxila. At that time the Śakas, Yueh-chi, and other nomad hordes from the steppes of Central Asia were swarming down upon the north-western frontier of India. Abdagases reigned for a short time, and apparently had no successor of his lineage, his kingdom probably passing into the hands of the foreign invaders.<sup>1</sup> In Arachosia the Parthian power endured for a few years longer, and Orthagnes was succeeded by Pakores (Pakura) and Arsakes Dikaiois. But about 90 A.D. the Kushān (Yueh-chi) monarch, Kadphises II (Ooemo) became master of the Panjāb, Arachosia, and Sind, the Parthian chiefs being restricted to a narrow territory in the Delta of the Indus, from which they were dislodged, probably by Kanishka, about 130 A.D.

The following tabular statement conveniently summarizes my views on Indo-Parthian chronology, and will serve as a guide to the arrangement of the coins in the catalogue :—

The following publications are the principal authorities on Indo-Parthian numismatics :—

1. Von Sallet, Alfred :— *Die Nachfolger Alexanders des Grossen in Baktrien und Indien* (Berlin, 1879).
2. Cunningham, Sir Alexander :— 'The Coins of the Sakas' (*Num. Chron.*, 3rd S., vol. x).
3. Gardner, Percy :— *The Coins of the Greek and Scythic Kings of Bactria and India in the British Museum* (London, 1886). The author's attempt to arrange the kings historically is undoubtedly erroneous.
4. Rapson :— *Indian Coins*.

For the Satraps, besides the above :—

5. Cunningham :— *Coins of Ancient India*.
6. Bühler, Rapson, and Bhagwān Lāl Indraji :— *J. R. A. S.*, 1894, pp. 525-54.
7. Rapson :— *J. R. A. S.*, 1900, p. 97 ; 1905, pp. 783-814.
8. V. A. Smith :— *J. R. A. S.*, 1903, pp. 38, &c. ; *Early History of India*, pp. 187, 201, and, superseding these, 'The Indo-Parthian Dynasties' (*Z. D. M. G.*, 1906).
9. Fleet :— *J. R. A. S.*, 1905, p. 227.
10. Rodgers :— *Catalogues of the Lahore and Calcutta Museums*.

The collection described in this Catalogue, although very far from being complete, is fairly representative. The coins of Spalirises or Spalirisha as 'brother of the king' and those on which he is associated with Azes are wanting.

The attempt to distinguish the coins of Azes I from those of Azes II is now made for the first time. I am doubtful as to the proper attribution of the issue with the reverse device of Zeus holding out an image of Nikē, but am convinced that the coins of both Aspavarma and Zeionises or Jihunia belong to the period of Azes II. The proof that Thomas and Cunningham were mistaken in describing the coin No. 11 of Maues in the catalogue, formerly numbered as *A. S. B.* 256, as having been issued by Azes and Vonones is a matter of some importance. No. 87 (catal.) of Azes I does not seem to have been published before. No. 2 of Gondophares is remarkable because the king is turned to the l., and is given the title *apratihatachakra*. The word *sasasa*, which has been interpreted as the genitive of a proper name, 'Sasan,' is, I believe, a mere epithet, like *jayatasa*, which occupies the same position on the nearly contemporary coins of Aspavarma, but I cannot fix its meaning. The specimens of the coinage of Orthagnes and Pakores or Pakura are all extremely poor.

<b>MAUES (MOA), A PARTHIAN (?), KING OF TAXILA, ABOUT 120-90 B. C.</b>				
<i>Type 1; obv. caduceus; rev. elephant's head; Greek legend only; copper</i>				
1	<i>A.S.B.</i>	Æ 137.5 1.12	Caduceus, boldly executed <sup>1</sup> ; mon. Pl. X, 1. Legend, r. ΒΑΣΙΛΕΩΣ, l. ΜΑΥΟΥ.	Elephant's head r., with upturned trunk [and bell hung from neck]; astragalus border; in good condition.
2	„	Æ — 1.07	As No. 1; same mon.	As No. 1; poor.
3	„	Æ — .96	Ditto; mon. uncertain.	Ditto; very poor.
4	<i>I.M.</i>	Æ — 1.02	Ditto; mon. Pl. X, 1.	Ditto; fairly good.
5	„	Æ 137 1.1	Ditto; ditto.	Ditto; good (Pl. VIII, 1).

<sup>1</sup> The Greek legend indicates that the caduceus side should be considered the obv., and not the rev., as in *B. M. Catalogus*. The type is copied from one of Demetrios.

*Type 2; obv. Zeus; rev. Nikē; silver*

6	I.M.	Æ 149.8 1.07	Zeus standing l., clad in himation; grasping long sceptre with l. hand; r. arm extended. Circular legend in good script, ΒΑΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ ΜΕΓΑΛΟΥ, below MAY-OY.	Nikē standing r., holding out wreath in r. hand; palm bound with fillet in l. Kh. legend, <i>rajadirajasa mahatasa</i> , below M[o]asa. Mon. Pl. X, 3, in r. field. In very fine condition (Pl. VIII, 2).
6a	A.S.B.	Æ 150 1.0	As No. 6; in inferior style.	As No. 6; in poor flat style; same mon. (I have doubts as to the genuineness of this coin.)

*Type 3; obv. Artemis; rev. bull; copper*

7	A.S.B.	Æ — 1.0	Artemis running r., radiate, with veil floating round her head; clad in short chiton and boots. Legend, as in type 2.	Humped bull standing l.; mon. Pl. X, 4. Legend, as in type 2, imperfect; in fair condition.
8	„	Æ — .9	As No. 7.	As No. 7; same mon.; poor.
9	I.M.	Æ — .98	Ditto; much worn.	Ditto; ditto; ditto.
10	„	Æ 127.6 1.0	Ditto.	Ditto; ditto; fair (Pl. VIII, 3).

*Type 4; obv. Herakles; rev. lion; copper*

11	A.S.B.	Æ 93.5 1.0	Herakles standing facing, with club in l. hand, and (?) lion skin; r. hand on hip. Legend, as in types 2 and 3, much defaced; the part distinctly legible is merely Σ ΒΑΣΙΛΕΩΝ ΜΕ; the remains of the name are very shadowy.	Maneless lion standing l.; mon. Pl. X, 1. Kh. legend, as in types 2 and 3, imperfect; the characters <i>rajasa ma</i> , and in the name, <i>a</i> and <i>sa</i> only being distinctly legible. <sup>1</sup>
----	--------	---------------	--	---

<sup>1</sup> This is the coin from the Stacy collection catalogued by Thomas as 'Vonones and Azas, unpublished type; obv. Hercules with club; rev. Panther as in A. A. vii. 8, but in the reverse direction, in fair order' (*J. A. S. B.*, 1858, p. 252). Cunningham, referring to the observation of Thomas, made the same attribution, and published a photograph of a far from faithful drawing, which represents the coin as being in much better condition than it really is in. The identity of the piece is established by the crack shown in Cunningham's plate ('Coins of the Sakas,' Pl. IV, 8, in *Num. Chron.*, 3rd S., vol. x). Prof. Rapson has kindly examined the coin and has no doubt that it is one of Maues, similar to B. M. Catal., Pl. XVI, 5. I agree with him. The imaginary association of Azes I with Vonones thus disappears from history.

SPALAHORA (SPALYRIS), VICEROY, BROTHER OF THE KING (*scil.* VONONES), WITH HIS SON SPALAGADAMA, ABOUT 110 B.C.

*Type; horseman and Herakles seated on rock; square, copper*

1	A.S.B.	Æ — .85	King diad., on horseback r., in square. Legend, l. [ΣΠΑ]ΛΥΡΙΟ[Σ], top ΔΙΚΑΙΟΥ, r. ΑΔΕΛΦΟΥ ΤΟΥ, below ΒΑΣΙΛΕΩΣ (with square <i>omikron</i> and <i>sigma</i> ).	Herakles l., seated on rock, on which his l. hand rests; his r. hand supports club on knee; circular mon. Pl. X, 54, l. Kh. legend, r. [ <i>Spa</i> ]lahora <i>putrasa</i> , top <i>dhramiasa</i> , l. <i>Spalagadama</i> [sa] (Pl. VIII, 7). <sup>1</sup>
2	I.M.	Æ — .87	Similar; much defaced.	Similar; mon. illegible; very poor.
3	„	Æ — .85	Ditto; legend nearly complete.	Ditto; mon. Pl. X, 13, l.; legible . . <i>horaputra</i> . . . <i>Spalagadamasa</i> .

<sup>1</sup> Gardner (*B. M. Catal.*, p. 100) takes the name ΣΠΑΛΥΡΙΟΣ, *Spalyrios*, as the gen. of a nom. *Spalyris*. But *Spalyrios* may possibly itself be a nom., not in concord with the predicate; cf. the ungrammatical legend on Kanishka's early coins, ΒΑΣΙΛΕΥΣ ΒΑΣΙΛΕΩΝ ΚΑΝΗΡΚΟΥ. Cunningham ('Coins of the Sakas,' *Num. Chron.*, 3rd S., vol. x) is clearly right in identifying Spalyrios or Spalyris with Spalahora. This prince describes himself as 'brother of the king', who must be understood to be Vonones.

2	I.M.	Æ? 150.5 .8	King diad., on horseback l., below horse mon. Pl. X, 33; the characteristic mon.	Bearded Zeus, naked to waist, standing r., with r. hand raised, and long sceptre.
---	------	----------------	--	---

<sup>1</sup> Twenty-two duplicates of this type not catalogued in detail.

<sup>2</sup> The same symbol is found on the neck of the king's bust on an A. S. B. coin ascribed to Orodes I of Parthia, 57-88 or 87 B. C.

<sup>3</sup> For reading *devavarata*, see Rapson in *J. R. A. S.*, 1908, p. 286.

<sup>4</sup> The meaning of the word *sasasa* is not known, but it has been supposed to be the genitive of a proper name *Sasa*, a colleague or subordinate of Gondophares. I do not believe this theory, and regard the word as an epithet or title, like *jayatasa*, which occupies the same position on the closely related and nearly contemporary coins of Azes II and his *strategos*, Aspavarma.

<sup>1</sup> This distinct type is not clearly distinguished by Gardner (Pl. XXIV, 5) or Rodgers. I doubt if it was struck by the same person who issued type 1. Cunningham observes that these coins are commonly found at Mathurā, and that they must be regarded as a local coinage, which is not met with elsewhere. (*Coins of the Sakas*, repr. pp. 14, 55.)

### SECTION III

## KUSHĀN COINS

FROM ABOUT 50 A. D. TO 550 A. D.

### INTRODUCTION

IN the Introduction to Section I we have seen how the last Greek prince of Kābul was overthrown, about the middle of the first century A. D., by the Kushān chief conveniently known as Kadphises I. Some thirty or forty years later, his son and successor, Wima (OOHMO) Kadphises, similarly designated for convenience as Kadphises II, extended the Kushān power into India Proper, and suppressed the Indo-Parthian chiefs who had inherited the dominions of the Indo-Greek princes in the Panjāb and Indus valley. Kadphises II established a gold coinage, suggested by the contemporary Roman *aurei*, with which it agrees in weight, and also issued an extensive copper (bronze) coinage, specimens of which are very common in the whole of North-Western India. Good examples of both the copper and gold coinage are represented in Plate XI.

So far, I believe, all scholars at present are agreed that my approximate chronology may be accepted, and that I am not far wrong in placing the accession of Kadphises I about 45 A. D., and that of his successor, Kadphises II, about 85 A. D. The dates used to be placed considerably earlier. But concerning the chronological position of the powerful monarch Kanishka, and his successors, Huvishka and Vāsudeva, the widest difference of opinion exists. Dr. Fleet holds that Kanishka established the era dating from 58 B. C., which subsequently became known as the Mālava or Vikrama era. On the other hand, not to mention rival theories, I hold that the balance of evidence favours the hypothesis that Kanishka came to the throne about 120 or 125 A. D. Dr. Fleet's view involves the assumption that Kanishka, Huvishka, and Vāsudeva all preceded the Kadphises kings. The reasons for this view not having been published, I can only say that to me it appears opposed to indisputable facts, numismatic and other; and that I still adhere to the ordinary current opinion that Kanishka succeeded

Kadphises II. This catalogue, therefore, is arranged on the assumption that the following chronology is *approximately* correct, namely :—

Kadphises I	acc. about	45 or 50 A. D.
Kadphises II	„ „	85 A. D.
Kanishka	„ „	120 „
Huvishka	„ „	150 „
Vāsudeva	„ „	180 „

The Vāsudeva coinage undoubtedly shades off into Indo-Sassanian types based on Persian originals struck subsequent to the establishment of the Sassanian monarchy in 226 A. D., and I have never been able to understand how this fact can be reconciled with Dr. Fleet's view of the Kushān chronology.

The southern frontier of the Indian dominions of Kanishka and Huvishka probably was the Narbadā (Narmadā, Nerbudda) river. Nothing is known about the political events of the reign of Vāsudeva, but it is evident from the coins that the Kushān empire broke up in his time. The third century A. D. may be regarded as the most obscure in the whole of the Indian historical period, and it is quite impossible at present to give any distinct account of what happened in India during that century.

I am inclined to date the *Vasu* coins (Pl. XIII, 11) in the first half of the third century. Some specimens come from Sistān, and it is quite possible that *Vasu* may be distinct from Vāsudeva Kushān. The coins of Kanēshko (not Kanishka) and a Vāsudeva depicted in Plate XIV, 1, 2, 3, are probably a little later in date, but also struck in the third century.

The chiefs with various names, some Indian and some Tartar (?Turkī), who struck the coins illustrated in Plate XIV, 4-9, seem to have ruled in the Panjāb and neighbouring countries during the third and fourth centuries. Some of them must have been contemporary with the earlier Gupta kings of Pāṭaliputra (Patna) and Ajodhyā.

The debased *Kidara* coins (Pl. XIV, 10, 11) are later, and are believed to have been issued by chiefs of the Little Yueh-chi horde in the Panjāb and other parts of North-Western India during the fifth and sixth centuries. The coins of this class merge into the Kashmīr coinage, which endured for centuries, and will be described in Part III of this work.

The showy Kushāno-Sassanian coins (Pl. XIV, 12, 13) seem to have been struck in Sistān in the fourth and fifth centuries.

It is impossible to fix the date of the excessively rude coins from Purī and Ganjām, of which an example is shown in Plate XIV, 14. They may have been issued by rulers of Kalinga in the fourth or fifth century, and it is possible that they may have been struck only for use as temple

offerings. All numismatists acknowledge that they exhibit a reminiscence of the characteristic Kushān type.

The local and chronological position of the chiefs named Hyrkodes, Heraios, and Sapadbizes is extremely doubtful; but all three were foreign to India. The coins of the Western Satraps (*post*, Section IV) resemble in the obverse the coins of Hyrkodes.

I do not propose to attempt any discussion of the rich and varied issues of the great Kushān kings, Kanishka and Huvishka, which may be studied in detail in the works cited in the Introduction to Section I; to which should be added Cunningham's valuable series of papers in the *Numismatic Chronicle* for 1892 and 1893, also published separately.

The collection of Kushān coins now described is immeasurably inferior to that in the British Museum, and multitudes of types and varieties are wanting. Certain very clever forgeries of rare gold coins, about twenty in number, have been excluded from the catalogue, after careful and prolonged examination, in which Professors Rapson and C. W. C. Oman kindly assisted. Nearly all these forgeries belong to the Asiatic Society of Bengal, but no record of their history is traceable. They are so well executed that they may be ascribed with confidence to the skill of the late Chanda Mall of Rāwalpindi, who was able sometimes to deceive the very elect, including Sir Alexander Cunningham and Sir Wollaston Franks.<sup>1</sup> A few doubtful specimens have been admitted into the catalogue, as noted in each such case.

### HUVISHKA, KING OF GANDHĀRA AND NORTHERN INDIA, SUCCESSOR OF KANISHKA, ABOUT 150–80 A. D.

‘The gold coins of Huvishka,’ Cunningham observes (*Num. Chron.*, 1892, p. 98), ‘offer four different busts of the King,’ which may be referred to conveniently as *A*, *B*, *C*, and *D* respectively, and are described as follows:—

‘*A* is a very rare large head [or bust, not showing the arms or hands] of the King, covered with a round jewelled helmet with spreading crest, and the ends of the diadem hanging down behind. A large ornamental ear-ring is in the ear, and flames spring from the shoulders. The legend [of all varieties], in badly [or peculiarly] formed Greek letters, [is] PAONANO PAO OOHPI KOPANO, *Shaonano shao Hoveshki Koshano*, “The King of Kings, Huvishka the Kushān.”

‘*B*. Half-length figure of the King to left [rising from clouds], with pointed helmet, thickly jewelled, holding sceptre in left hand, and club in right hand before the face.<sup>1</sup> On some coins the sceptre is changed for the *ankus*, or “elephant-goad”, which refers to the King as an elephant-rider, as seen on his copper coins.

<sup>1</sup> ‘Club’; or ‘ear of corn’, according to Gardner, who bases his interpretation on the ‘double ear of corn’ shown in *B. M. Catal.*, Pl. XXVIII, 9. But Cunningham, writing six years later, adhered to the ‘club’ notion, and I am disposed to agree with him.

'C. Half-length figure of the King [rising from clouds, richly dressed, sometimes with flames springing from his shoulders], with *round jewelled* helmet [or cap] to *left*, club and *ankus* [or sceptre] in hands. [This is the most common form; details of the King's costume vary.]

'D. The same half-length figure of King to the *right*.

'On some of the coins the King's name is ΟΦΟΗΡΚΙ, "Huveshki." Cunningham follows Stein in reading O in some cases as an aspirate, and in some cases as a semi-vowel.

<sup>1</sup> Thirty duplicates have not been catalogued in detail. These coins all seem to be part of the hoard of more than 500 from the Purī district, fully described by Hoernle in *P. A. S. B.*, 1895, pp. 61-5, Pl. II. See also *I. C.*, sec. 54.

<sup>2</sup> Rapson places Hyrkodes between 50 and 1 B.C., but von Sallet considers him very late, and his coins are imitated by the Western Satraps.

(?) SAPADBIZES, (?) A KUSHĀN KING<sup>1</sup>

*Type; obv. helmeted bust of king; rev. standing lion, with legend NANAIA; silver*

1	A.S.B.	AR 21 .6	Bust of king r., with helmet shaped like that of Eukratides; legend lost.	Lion, open-mouthed, standing r. Legend, both r. and l. NANAIA. (A poor specimen; see <i>B. M. Catal.</i> , p. 119; <i>I. C.</i> , sect. 36.)
2	„	AR 28.5 .55	Ditto; legend ΕΑΠΑ.	Ditto; r. legend legible.

<sup>1</sup> Cunningham read the name Sapaleizes; Prof. Rapson reads Sapadbizes. The legend NANAIA suggests a connexion with the Kushān series.

## SECTION IV

# THE GUPTA DYNASTY AND THE WESTERN SATRAPS

## INTRODUCTION

THE history of the third century A.D. in India is wrapped in obscurity, at present impenetrable, and not likely to be dispelled. We know, however, that in the latter part of the century a Mahārājā, or petty chieftain, named Gupta, ruled in Magadha (Bihār), his capital probably being Pāṭaliputra (Patna). He was succeeded by his son Ghaṭotkacha, who enjoyed the same limited rank. So far as is known, neither of these chieftains coined money. Their subjects must have used the coinage of more powerful rulers, presumably that of the later Kushān kings, whose history has been lost. In the year 320 A.D. the throne of Ghaṭotkacha was occupied by his son Chandragupta I, who must be regarded as the real founder of the fortunes of his house. He married a lady belonging to the influential Lichchhavi clan of Vaisālī in Tīrhūt, and showed such pride in the alliance that clearly he must have derived substantial benefit from it. Chandragupta I extended his dominions as far east as Prayāga (Allāhābād), and felt justified in issuing a gold coinage in the names of himself and the Lichchhavis jointly, bearing the image of his Lichchhavi consort (Pl. XV, 1). He also established a special era, known in after times as the Gupta Era, which presumably commemorated the date of his accession or coronation (*abhisheka*). The first year of the era was equivalent to 320-1 A.D. Many of the inscriptions and coins of the successors of Chandragupta I are dated in this era, which continued to be used in parts of northern and western India as late as the thirteenth century A.D. After a brief reign, Chandragupta I, in or about 326 A.D., transmitted the crown of his extended sovereignty to his son and chosen successor, Samudragupta, the offspring of the Lichchhavi queen. Samudragupta at once entered on a career of aggressive conquest. He first turned his arms against the princes of Upper India, and in due course reduced most

of the northern powers. When he had secured his base by the subjugation of his neighbours, he planned and executed a wonderful campaign in the south, in the course of which he overran nearly the whole of the peninsula. He returned laden with booty, and celebrated his attainment of the rank of paramount power by the performance of the *Āśvamedha* or horse-sacrifice. The medals which he struck to commemorate the occasion bear the figure of the sacrificial horse (Pl. XV, 3). Samudra did not limit his ambitions to the battle-field, but also sought distinction in the domain of literature and music. He is said to have been an accomplished poet, and his practical skill as a musician is certified by the curious 'Lyrist' coins (Pl. XV, 4, 5), which depict the monarch in the act of playing the lyre. The ferocity of his victorious warfare is indicated by the 'Battle-axe' coins, which exhibit the king as wielding the axe of *Kṛitānta*, or *Yama*, the god of death, 'who maketh an end' (Pl. XV, 9).

After a long and prosperous reign, during which the *Narbadā* became the southern frontier of the Gupta empire, Samudragupta passed away, and was followed on the throne by his son Chandragupta II, in or about 375 A. D.

But before we consider the eventful reign of this mighty monarch, who was probably the original of the *Vikramāditya*, or *Bikram*, of Indian tradition, we must pause to examine the attribution of certain gold coins purporting to have been struck by a mysterious king named *Kacha* or *Kācha*, otherwise unknown to history. In style and execution these coins (Pl. XV, 2) closely resemble those of Samudragupta, with which they are sometimes found associated; and it is clear that *Kacha* or *Kācha*, if not identical with Samudragupta, was closely connected and contemporaneous with that king. The only tenable hypotheses are two. *Kacha* must have been either the brother and predecessor of Samudragupta or identical with him. Arguments of weight may be adduced in favour of either proposition; but on the whole I am now disposed to accept the hypothesis of identity, which is strongly supported by the fact that the epithet *sarvarājochchhettā*, 'exterminator of all *rājas*,' applied in the inscriptions to Samudragupta alone, is also found on the coins of *Kacha*, and nowhere else. The term was strictly applicable to the successful conqueror Samudragupta, but would have been absurd as applied to an unsuccessful rival. Whatever may be the explanation of the use of a second name by Samudragupta, I agree with Mr. A. M. T. Jackson (*Bomb. Gazr.*, vol. i, part i, p. 62, note) in holding that the mysterious *Kacha* should be regarded as identical with Samudragupta.

Chandragupta II, who had been specially selected as heir-apparent, was equal to his father in ambition, and continued his career of conquest.

He carried his arms into Mālwa and Gujarāt, and even across the peninsula of Surāshtra (Kāthiāwār), which provinces were all incorporated as integral parts of the Gupta empire. About the year 390 A. D., Chandragupta II attacked, defeated, and slew the Satrap Rudrasimha, son of Satyasimha, lord of Western India, and so extinguished the foreign dynasty of the Western Satraps, which had lasted for fully three centuries. The gold coinage of the early Gupta kings was based on that of the Kushāns, and ultimately on the Roman money. When Chandragupta II annexed Gujarāt and Surāshtra he recognized the convenience of the small silver currency of the Satraps, based on the Greek hemidrachmae, and imitated it closely. No specimen of the silver coinage of Chandragupta II is comprised in the cabinets described in this work; but examples of the coins issued by his successors are given in Plate XVII. The device of the peacock with expanded tail ('Fantail Peacock') characterizes the issues of the eastern mints, while that of the peacock with folded wings ('Winged Peacock') was used by the western moneyers. But both varieties alike are essentially hemidrachmae, and appear to have been suggested by the silver coinage of the Western Satraps, which was undoubtedly of Greek origin. The copper or billon coins of the Satraps with either a bull or elephant on the reverse (*C. M. I.*, Pl. I, 8-12), which are found in the Ujjain country, are improved copies of the common cast coins (*C. A. I.*, Pl. I, 25, 26), with *chaitya* and either bull or elephant. The catalogue includes only a single specimen of the elephant type of the Satraps.

The earliest Gupta copper coins also belong to the reign of Chandragupta II. Four of the known types are represented in this catalogue (see Pl. XVII). I see no reason to doubt that the 'Chandra' of the 'Vase' coins must be interpreted as meaning Chandragupta II. The copper coins of Chandragupta II were all struck in the northern or eastern provinces. Two of the mints evidently were at Ajodhyā in Oudh and Ahichhatrā (Rāmnagar) in Pañchāla (Rohilkhand).

About 413 A. D. the empire passed into the hands of Kumāragupta I, son and successor of Chandragupta II. This monarch during most of his long reign enjoyed undiminished power, but towards its close was troubled by an invasion of the White Huns, which was repelled by his son Skandagupta. Kumāragupta I coined in gold, silver, and copper; and in a general way, with many differences of detail, his coins resemble those of his father. His copper coins are very rare. One, in bad condition, is described in this catalogue (No. 55).

Skandagupta, who ascended the throne in the spring of 455 A. D., continued to reign until about 480. The incursions of nomad tribes from the north-west gradually shattered his power, and he was the last

of his family to enjoy imperial sovereignty on a large scale. His coinage in his latter years deteriorated. It is known only in gold and silver (Pls. XVI, 8, 9; XVII, 7).

The coins of the later Gupta princes are very inferior in style and execution to those of the earlier, but some of the types are interesting. The personal name of the king who assumed the title of Prakāśāditya is not known with certainty, but probably was Puragupta. The reading *vasudhām* (Rapson) on his coins is established by the specimens from Col. Rivett-Carnac's cabinet.

The coin connected with Nara's coinage (Pl. XVI, 11) seems to be unique; as is the copper coin (Pl. XVII, 9), which I attribute to Kumāragupta II, great-grandson of Kumāragupta I.

Śaśānka, King of Gauḍa or Karna-suvarṇa (Central Bengal), whose capital was near Murshidābād (about 600–20 A. D.), is said to have been known as Narendragupta.<sup>1</sup> The 'Throned King' type (Pl. XVI, 13) may be assigned plausibly to him. The strange oval coin (Pl. XVI, 14), with the title *Kramāditya* on the reverse, is related to both the Gupta coinage proper and that of Śaśānka. Only three specimens of this type are known, and the abnormal weight, averaging 162.4 grains (10½ grammes), is not easy to explain. The coins may have been struck to the 100 *ratī* standard of about 182 grains (nearly 12 grammes).

The subject of the Gupta history and coinage is too large for further treatment in this place. The detailed political history, with full references to authorities, will be found in the author's *Early History of India*, chapters xi and xii; and for discussion of all numismatic details I must refer to the following papers:—

V. A. Smith, 'A Classified and Detailed Catalogue of the Gold Coins of the Imperial Gupta Dynasty of Northern India, with an Introductory Essay, five Plates and a Table of Weights' (*J. A. S. B.*, vol. liii, part i (1884), pp. 119–206);

E. J. Rapson, 'Notes on Gupta Coins' (*Num. Chron.*, 1891, pp. 48–64, with Plate of Coins in the Bodleian cabinet).

<sup>1</sup> *Ep. Ind.*, i. 70.

The history and coinage of the Western Satraps are discussed at length in the following publications:—

P. Bhagvānlāl Indrajī and E. J. Rapson, 'The Western Kshatrapas' (*J. R. A. S.*, 1890, pp. 639–62, with Plate of Coins and Table of Legends);

E. J. Rapson, 'The Coinage of the Mahākṣatrapas and Kṣatrapas of Surāṣṭra and Mālava (Western Kṣatrapas); together with a Note on the order of succession, and Dynastic and Genealogical Tables, by Colonel T. Biddulph' (*J. R. A. S.*, 1899, pp. 357–407, with a Plate of Coins chiefly from the collection of Colonel Biddulph).

In this catalogue Colonel Biddulph's arrangement is followed.

Minor notices of individual Gupta and Satrap coins and sundry particulars are too numerous to detail.

Owing to the purchase of Colonel Rivett-Carnac's cabinet some twenty years ago, the set of Gupta gold coins in the Indian Museum collection is exceptionally rich. The collection of the Asiatic Society of Bengal includes several remarkable coins.

KACHA OR KĀCHA, A GUPTA KING, ABOUT 326 A.D.; PROBABLY IDENTICAL WITH SAMUDRAGUPTA

*Gold*

‘Standard’ type

+1	A.S.B.	A/ .87.4 .78	King at altar, as on coins of Chandragupta I and Samudragupta, l., grasping with l. arm a standard surmounted by rayed disk; under l. arm, vertically, <i>Kācha</i> ; margin, <i>K[ā]ch[o]g[ā]m avaj[i]tya ka[r]ma-bhīr-uttamairja[yati]</i> , 'Kācha, having subdued the earth by excellent deeds, is victorious.'	Robed goddess, standing l., holding flower in extended r. hand, and cornucopiae in l. arm; mon. Pl. XVIII, 7, l. Marginal legend, <i>sarvarājochchhattā</i> , 'the exterminator of all rājās' (? genuine).
2	I.M.	A/ 115.8 .8	Similar; under arm, vertically, <i>Kacha</i> ; margin, <i>Kacho gām avajitya [kar-ma]bhīr utta[mair jayati]</i> .	Similar; same mon.; in good condition (R.-C.; Pl. XV, 2). <sup>2</sup>

<sup>1</sup> R.-C. refers to the collection purchased by the Trustees from Col. J. H. Rivett-Carnac, C.I.E., which was formed in Bihār and the United Provinces of Agra and Oudh.

<sup>2</sup> No. 2, which is of normal weight for coins of this king, is unquestionably genuine, and the king's name in both places is spelled *Kacha*, with the first vowel short. No. 1, which is abnormally light, seems to be a forgery; but it looks more like an ancient than a modern imitation. The metal is debased, and the *g* of *gām* is wrongly formed. The spelling *Kācha* is genuine coins.

SAMUDRAGUPTA, OF THE IMPERIAL GUPTA DYNASTY, ABOUT  
326-75 A.D.

*Gold*

‘*Aśvamedha*’ type

1	I.M.	A/ 116.6 .88	Horse, unattended, standing l., nearly filling field, facing an altar surmounted by a bent pole ( <i>yūpa</i> ), with streamers curving above. The horse stands on a plain line. Below his belly the syllable <i>si</i> . Remains of marginal legend, <i>rājādhirāja prithivīm</i> .	Standing female, probably the chief queen, l., carrying a yak-tail fly-whisk ( <i>chauri</i> ) over her r. shoulder, with l. hand hanging by her side, and holding an uncertain object. In front of her a staff or standard adorned with pennons. She stands on a lotus; no mon. Legend, near r. margin, <i>aśvamedha-pa[rākramaḥ]</i> (R.-C.).
2	„	A/ 117.5 .84	As No. 1; but in better condition. Remains of marginal legend, [ <i>rājā</i> ] <i>dhirāja prithivīmava[jitya]</i> , ‘the sovereign, having subdued the earth.’ A low pedestal on the line between horse’s feet.	As No. 1; but in fine condition. Legend, <i>aśvamedhaparākrama[ḥ]</i> (R.-C., Pl. XV, 3). <sup>1</sup>

‘*Lyrist*’ type

*Var. a; broad coins, with footstool marked Si*

3	A.S.B.	A/ 115.8 .92	King, wearing waist-cloth, seated to front, with head l., on high-backed couch, over the edge of which his feet dangle. He is playing an Indian lyre ( <i>vinā</i> ), which rests on his lap. Below a massive footstool, with syllable <i>si</i> in front. Marginal legend, <i>mahārājādhirāja śrī Samudraguptaḥ</i> .	Goddess seated l. on wicker stool, holding noose ( <i>pāśa</i> ) in r. hand, and cornucopiae in l. arm; no mon. A vertical line between goddess and r. marginal legend, <i>Sarmudraguptaḥ</i> . (The reading <i>Sarmudra</i> also occurs on the B. M. Eden coin, Pl. XV, 4.)
---	--------	-----------------	--	--

<sup>1</sup> Prof. Rapson (*J. R. A. S.*, 1901, p. 102) interprets the pole as the sacrificial post. The chief queen had a function to perform in the ceremony, and the female figure may be intended for her. Prof. Rapson offers as alternative translations of the rev. legend, ‘he whose might has been established by the *aśvamedha* sacrifice’, or ‘he who bears the title *Parākrama* as a result of his performance of the *aśvamedha* sacrifice’; and suggests that the full title may have been *Parākramāditya*, comparing the forms *Vikrama* and *Vikramāditya* as used by Chandragupta II.

CHANDRAGUPTA II, VIKRAMĀDITYA, OF THE IMPERIAL GUPTA  
DYNASTY, ABOUT 375-413 A. D.

*Gold*

*'Couch' type*

1	I.M.	A/ 118 .81	King, wearing waist-cloth, seated facing on couch, with head to l., l. hand resting on couch, r. hand raised, holding flower; r. leg tucked up, l. leg resting on footstool. Marginal legend, l. <i>Deva śrī mahārājādhirāja śrī Cha</i> ; r. <i>[ndra guptasya? vi]krāmāditasya</i> . <sup>1</sup> In exergue, below couch, <i>rūpākṛitī</i> , probably meaning 'beauty and form' (dual, Rapson). A quiver seems to hang behind the king's back, and a lotus bud springs behind his l. arm.	Throned goddess, with noose and flower, as usual; damaged; mon. Pl. XVIII, 48. Marginal legend l., which is unusual, <i>Śrī vikramaḥ</i> (Pl. XV, 10). (The B. M. specimen, the only other known, is not so good, and has not the legend <i>rūpākṛitī</i> . The mark read as <i>ā</i> is of unusual form, and Dr. Hoernle read <i>rūpakṛitī</i> , and interpreted differently.)
---	------	---------------	--	---

<sup>1</sup> The gen. termination is shown on the B. M. coin, and proves that *deva* (= His Majesty) must be read as the first word of the legend.

CHANDRAGUPTA I, KACHA, SAMUDRAGUPTA,  
CHANDRAGUPTA II

Serial No.	Museum	Metal, Weight, Size	Obverse	Reverse
31	A.S.B.	A/ broken ·8	Similar to usual type, but the standard head is an oval with cross inside, instead of Garuḍa.	Goddess as usual; remains of <i>Śrī vikramaḥ</i> (a broken, rude coin in very base metal).
32	I.M.	A/ 145·8	King and standard as usual; name under arm indistinct; traces of <i>śrī maharājādhirāja śrī Chandra</i> .	Goddess as usual; mon. Pl. XVIII, 14; <i>Śrī vikramaḥ</i> ; gold much alloyed (R.-C.).

*Subvar. 2; no name under arm*

33	I.M.	A/ 142·1 ·88	King perfectly upright; Garuḍa standard; a (?) branch in his l. hand; no name or legend.	Goddess as usual, with noose and flower; <i>Śrī vikrama</i> ; no mon. (R.-C., fairly good gold, and fairly well executed).
34	„	A/ 146·2 ·83	Similar to No. 33, but king not quite so upright, and a lozenge-shaped object in his l. hand; no name or legend.	Goddess as usual; mon. Pl. XVIII, 14; traces of legend (R.-C., fairly good gold, Pl. XV, 13).

*Var. γ; king r., bow in l. hand; CHANDRA vertically under l. arm; normal wt.*

35	A.S.B.	A/ 120 ·71	King r., with bow in l., and arrow in r. hand; <i>Chandra</i> vertically under l. arm; <i>Śrī mahārājādhi</i> .	Goddess as usual; mon. Pl. XVIII, 18; <i>Śrī vikrama</i> .
36	I.M.	A/ 121 ·77	Similar; <i>Śrī mahārājā</i> . . . . . <i>gupta</i> .	Ditto; same mon. and legend (R.-C., Pl. XV, 14). <sup>1</sup>

*'Horseman to r.' type*

37	A.S.B.	A/ 119·5 ·75	King on horseback, r. Marginal legend, <i>Paramabhāgavata [mahārājā]dhirāja [śrī Cha]ndraguptaḥ</i> .	Goddess seated l. on round stool, holding noose in r., and lotus in l. hand; mon. Pl. XVIII, 18. Legend, <i>Ajita vikkramaḥ</i> ; good.
38	I.M.	A/ 118·4 ·75	Similar; horse prancing. Legend, <i>Paramabhāgavata mahārājādhirāja śrī Cha]ndraguptaḥ</i> .	Similar; fair; no mon.

<sup>1</sup> The details of the posture of both the king and goddess in Class II of the Archer coins vary considerably. The king is sometimes upright, and sometimes stooped, like his successor, Kumāragupta I; while the goddess may have her l. hand raised, or hanging down, and so forth. It would be tedious to note such minutiae fully.

33	A.S.B.	A/ 127 .8	King, with l. hand on hip, standing, stooping l., and with r. hand offering fruit to peacock with expanded tail. Legend includes <i>jayati śrī</i> .	Goddess, facing front, riding peacock also facing front, with expanded tail filling the field; her r. hand is open scattering grains; sceptre in her l. hand; legend as in var. α, but damaged.
34	I.M.	A/ 127.2 .77 × .7	As No. 33. Legend seems to include <i>jayati śrī Kumāro</i> .	As No. 33 (R.-C., from Benares).
<i>'Tiger' type</i>				
35	I.M.	A/ 126.3 .78	King facing, half-turned l., with bow in r. hand, shooting in mouth a tiger falling backwards; <i>Ku</i> , with crescent above, under l. arm; <i>Śrī [Mahendra?] vyāghra bala parākkrama [? jayati]</i> , 'Śrī [? Mahendra] with the strength and might of a tiger [? is victorious].'	Goddess seated l., with l. hand on hip holding lotus; feeding peacock with r. hand; mon. Pl. XVIII, 14. Marginal legend, <i>Kumāragupto-dhirājā</i> , 'Kumāragupta, the sovereign' (R.-C., from Ajodhyā; fine; Pl. XVI, 4).
<i>'Lion' type</i>				
36	A.S.B.	A/ 125 .86	King facing, half-turned r., with bow in l. hand, shooting in mouth a lion falling backwards. Legend imperfect, <i>Kumāragupta (paradha?) [si]ṅha vikrama</i> , 'Kumāragupta . . . with a lion's might.'	Goddess facing, with one knee tucked up, seated on lion with head r.; her r. hand open, her l. on hip, holding lotus; mon. Pl. XVIII, 2. Legend, <i>Siṅha Mahendra</i> , 'the lion Mahendra.' (Apparently unpublished var. The coin seems perfectly genuine, but curious protuberances on it suggest that it has been cast; Pl. XVI, 5.)
37	„	A/ 126 .8	Device same as No. 36, but the legend is <i>kṣhitipati [r ajito vijaya] (Kumāragupto) devo [jaya]ti</i> , 'His invincible Majesty, Kumāragupta, lord of the earth, is victorious'; as on the Horseman to Right coins.	Device as No. 36; but goddess holds flower in r. hand, and legend is <i>Śrī Mahendrasinḥa</i> ; no mon. (Pl. XVI, 6).

38	A.S.B.	AR 124.1 .77	King riding elephant, which is running l.; he carries a goad in his r. hand; his l. hand rests on hip; an attendant, riding behind, carries an umbrella over him. Remains of long marginal legend in early Gupta script, but only <i>ta . . ka</i> legible.	Goddess, nimbate, standing facing on lotus, holding in r. hand a lotus flower hanging down, and in l. hand (?) cornucopiae; in r. field a (?) vase or shell; no mon. Legend on r. margin seems to end in <i>-gaja</i> (Pl. XVI, 7). <sup>1</sup>

*Silver**'Winged Peacock' type*

39	I.M.	AR 31.3 .55	King's head, diad., r.; part of corrupt Greek legend <b>NONO</b> ( <i>Shaonano</i> ) before face.	Peacock standing front, with folded wings. Marginal legend, <i>Pa(rama bhā)-gavata rājādhirāja śrī Kumāragupta Mahendra</i> , not <i>Mahendrāditya</i> as on other coins (Pl. XVII, 5). Similar; but <i>Mahendrāditya</i> .

*'Archer' type; suvarṇa wt.*

1	I.M.	N 145.9 .85	King standing l., grasping bow with l. hand; string of bow inwards; r. hand extended across Garuḍa standard, and holding arrow; <i>Nara</i> , vertically, under l. arm, with crescent above; between king's feet the syllable <i>gre</i> . Traces of marginal legend.	Goddess, as usual, seated on lotus, with noose in r., and lotus in l. hand; mon. Pl. XVIII, 40. Legend, damaged, <i>Śrī Bālāditya</i> , 'the sun of power'; yellow gold.
---	------	----------------	---	--

<sup>1</sup> *Prakāśāditya* is a title, like *Vikramāditya*. The king's personal name is wanting on all specimens, but good reason exists for believing it to have been Puragupta. The animal seems to be a tiger rather than a lion. The accusative *vasudhām*, 'the earth' (as read by Prof. Rapson), corresponds with the *gām* or *kṣhitim* of other types, and requires a word like *vijitya* to be supplied. *Devam* is a Prakṛit nominative substituted for the normal Sanskrit *devo*.

**PART II**

**ANCIENT COINS OF INDIAN TYPES**

## SECTION V

# PUNCH-MARKED COINS

### INTRODUCTION

ALTHOUGH the coins known as 'punch-marked' are rude and ugly, bear no legends, cannot be precisely dated, and, as a rule, are not assignable to any particular State or locality, they possess very special claims on the interest of the scientific numismatist, as documents in the early history of coinage. They also appeal to the anthropologist as authoritative records of the symbolism—religious, mythological, and astronomical—current throughout India for many centuries.

The term 'punch-marked' adopted by general consent means that the devices on the coins are impressed, not by means of a die covering the face (*flan*) of the coin, but by separate punches applied irregularly at various points on the surface. Naturally the impressions so effected often interfere with one another, and in cases where they are numerous the result is a confused jumble of symbols. Ordinarily, no difficulty is experienced in distinguishing the obverse from the reverse, the former being occupied by the larger symbols, commonly numerous, and the latter being sometimes blank, more often marked by a single minute device, and not infrequently marked by two or three comparatively inconspicuous devices. The cases in which both sides are crowded with symbols are rather rare. Examples will be found in Nos. 52–8 of this catalogue.

Mr. Theobald has been at the pains of enumerating more than three hundred different devices found on punch-marked coins. Examination of about one hundred and fifty specimens in detail resulted in proof that 'ninety-six symbols are confined to the obverse area, twenty-eight to the reverse, while fifteen symbols occur on both sides'. On the obverse the average number of symbols is about five, whereas on the reverse the average does not exceed two.

The devices are classified by Theobald under six heads, namely, (i) the human figure; (ii) implements, arms, and works of man, including the *stūpa* or *chaitya*, bow and arrow, &c.; (iii) animals; (iv) trees, branches, and fruit; (v) symbols connected with solar, planetary, or Sivite worship; (vi) miscellaneous and unknown.

The human figure rarely occurs, but the following catalogue offers good examples in Nos. 37-40 and 106 (Pl. XIX, 3, 12). The *chaitya* or *stūpa* is very common, and is one of the few symbols common to both obverse and reverse. Recent research has proved that the *stūpa* was used in ancient times by the Jains as freely as by the Buddhists; and it is no longer permissible to speak of this device as a 'Buddhist symbol'. Buddhism, however, was more widely diffused than Jainism during the period of the currency of punch-marked coins, and most of the *chaityas* on the coins probably were intended to have a Buddhist signification. The bow and arrow device is rare; as shown on No. 67 (Pl. XIX, 7) it is exactly the same as that seen on the Kolhāpur coins of the Āndhra dynasty issued between about 84 and 138 A.D. (Pl. XXIII). The punch-marked coin may be referred reasonably to the same period.

The animal devices are very curious and interesting. It is well known that up to comparatively recent times the rhinoceros was widely distributed in the Gangetic plain. The coins bear testimony to the fact that this great beast was a familiar object in ancient India. Three examples are recorded in the catalogue, Nos. 48, 58, and 59 (Pl. XIX, 5, 6). The last-mentioned coin was found in the Gayā District, Bihār. The elephant, of course, appears frequently. In most cases the representation is extremely crude, but the figure of the elephant saluting with uplifted trunk, as shown on a large oblong copper coin of very early date (No. 92, Pl. XIX, 10), is executed with considerable spirit.

The peacock, which performs a large part in Indian religious symbolism, is often seen, generally perched on a *stūpa* or *chaitya*. Nos. 24, 28, 31, 37 (Pl. XIX, 3), &c., offer illustrations. The long-necked crane or stork of No. 71 (Pl. XIX, 8) may be unique; the device is not included in Theobald's comprehensive list. The significance of the dog on the *stūpa* (No. 75) has been discussed by Thomas and Theobald. The representation of the sacred tank containing fish (No. 48, Pl. XIX, 5) is not very rare; and various fishes are often displayed independently, as on No. 10 (Pl. XIX, 1).

The collection now described does not seem to contain any example of the goat browsing on the vine, a device specially noted by Theobald; and the trees shown are usually conventional, as No. 18, &c. The palm-tree of No. 61 is rare, and seems to be intended to represent the coco-nut tree with its fruit (*Cocos nucifera*).

Solar symbols, including many varieties of wheel devices, as well as the *svastika* and *triskeles* or *triskelis*, are the most common of all, and, indeed, are seldom absent. The so-called 'taurine' symbol, a crescent on a circle, used in astrology to denote the zodiacal sign Taurus, is extremely common. Symbols of the astrological class rarely occur on the reverse, but examples are found in Nos. 21, 50, and 95. The figure resembling

the Greek *caduceus* is frequent on both obverse and reverse (Pl. XIX, 7, 11, 12).

The coinage of Europe, as is well known, is derived through Greece from Lydia, where the earliest coins were made about 700 B. C. by impressing small punches or stamps on thick globules or buttons of electrum, an alloy of gold and silver. Gradually the disk or flan was made flatter, and the ordinary modern coin was evolved. The Corinthians alone of the Greeks struck thin, flat coins from a very early time. The northern Indians evolved their coinage on different lines. The early standard of value was almost certainly copper, including alloys of that metal, and the most ancient Indian coins, I believe, are copper.<sup>1</sup>

I suspect that the square and oblong punch-marked copper coins with blank reverse, Nos. 80-5 and 92-4 (Pl. XIX, 10), should be ascribed to Taxila in the Panjāb, and that they were the predecessors of the heavy cast coins contemporary with Agathokles and Pantaleon about 200 B. C. These punch-marked coins may be dated 300 or 400 B. C. The 'twenty oblong rectangular-shaped copper punch-marked coins of the most ancient type' obtained by Carlleyle at Bairānt in the Benares District may be even older. Three of these are said to have had 'single letters of an archaic type—one of them being apparently S, another L, and another J—punched into them'. The silver punch-marked coins found at the same site, which also yielded a number of bronze, copper, and flint relics, were very few in number (Cunningham, *Reports*, xxii. 114-16).

But the earliest Indian coins made of impure metal, containing about 80 per cent. of silver, are also extremely old, and it is possible, or even probable, that in some parts of the country the use of silver preceded that of copper. The solid ingots (Nos. 1, 2, 3), merely marked with three dots, must be very ancient. Unfortunately there is no record of the locality where they were found. No. 95 is a similar copper piece, marked with the dim device of a star or sun. The heavy bent bars of silver (Nos. 4-6), marked with simple symbols on the concave side and blank on the convex side, have an extremely archaic appearance, and may well go back to 500 or 600 B. C. In the ordinary series of punch-marked coins the earliest place must be assigned to those with blank reverse, at least to those of thin fabric. It is clear that the punch-marked coinage was a private coinage issued by guilds and silversmiths with the permission of the ruling powers. The numerous obverse punches seem to have been impressed by the different moneyers through whose hands the pieces passed, and the reverse marks may be regarded as the signs of approval by controlling authority. But the paucity of

<sup>1</sup> On this point I follow Thomas in preference to Cunningham. For southern coins derived from globules see Introduction, Section xx.

records as to the actual *provenance* of the various types hinders the attainment of well-founded conclusions on the subject.<sup>1</sup>

In this place I cannot go into the theory of Indian coin weights, which has been very fully discussed by previous writers, and shall confine myself to the remarks necessary to explain the entries in the catalogue. The silver solid ingots range in weight from 21.5 to 26.7 grains, which may represent an original weight of about 30 grains (2 grammes). I do not see how to connect these figures with the standards commonly used.

The bent bars (Nos. 4-6) weigh from 165.8 to 174.1 grains. These may be 100 *rati* pieces (1 *rati* being taken as 1.825 grain).

It is well established that the ordinary silver punch-marked coins (*purāṇas* or *dharāṇas*) were struck to the scale of 32 *ratis*, and that the full normal weight consequently was about 58 grains, or  $3\frac{3}{4}$  grammes. The heaviest in the catalogue is No. 31, 55.6 grains; and the lightest is No. 55, 35.7 grains. These coins remained in circulation for a long time, and stood wear well, the devices being incised, and not in relief. The rectangular and circular coins agree in weight. I believe that the rectangular coins, whether silver or copper, are, as a rule, earlier than the circular coins of similar style, the metal of which is more debased. The scale of weights of the copper coinage is quite distinct from that of the silver, and is based on the *paṇa* or *kārshāpaṇa* of 80 *ratis*, equivalent to about 146 grains, or nearly  $9\frac{1}{2}$  grammes. The catalogue does not include any *paṇa* pieces, but  $\frac{1}{2}$ ,  $\frac{1}{4}$ , and  $\frac{3}{4}$  *paṇas* may be recognized.

I now return to the subject of the mode of evolution of the Indian indigenous coinage. It is plain that the Indian moneyers started, not from a globule or button of fused metal, but from a hammered sheet, which was then cut into strips, and subdivided into lengths of approximately the desired weight, which was adjusted by clipping the corners when necessary. Nobody can examine a handful of rectangular silver punch-marked coins without seeing that this was the method of manufacture. The cutting of circular blanks from a metal sheet being a more troublesome process than snipping strips into short lengths, the circular coins are presumably a later invention than the rectangular ones. But the rectangular shape continued in use for centuries, and many individual circular coins must be earlier in date than many of the older form. Some of the copper pieces may have been made from cast blanks.

<sup>1</sup> Carlisle's list of types found at Tambavati Nāgarī, north of Chitor, in Mewār or Udaypur, and at Nāgar in Jaypur State, Rājputāna, is of special value as a record of *provenance*. The 'caduceus' symbol occurs on the reverse of several of the Tambavati Nāgarī coins. Cunningham noticed it on coins from the eastern provinces in the neighbourhood of Benares.

A few definite facts help to fix the chronological position of the punch-marked silver coinage, which long served as the common currency of most of the States of ancient India, and was wonderfully uniform in weight and general style from the Himalayas to Cape Comorin.

Cunningham states on the authority of Sir E. C. Bayley that a few much worn punch-marked silver coins were found 'in company with hemi-drachms of Antimachus II, Philoxenus, Lysias, Antialkidas, and Menander' (*C. A. I.*, p. 54). This fact fixes the currency of the coins referred to in 200 B.C., or a little earlier; and it is quite consistent with the interpretation which recognizes punch-marked coins in the *sigmatum argentum* presented by Āmbhi (Omphis) to Alexander at Taxila in 326 B.C., as related by Quintus Curtius. A small punch-marked silver coin was found by Major Pearse in one of the very ancient earthen tumuli at Lauriya-Nandangarh (not Navandgarh) in the Champāran District, Tirhūt (Cunningham, *Reports*, i. 70). A copper punch-marked coin found by Carlleyle at Masaon Dih or Joharganj in the Ghāzipur District bore a legend in characters ascribed by him to the Aśoka period, the third century B.C. (*ibid.*, xxii. 103). No doubt the copper coins were in circulation along with the silver, although they were much less numerous, the need for small change being supplied by cowries, and to some extent by other forms of coinage. Of the silver coins 'a large hoard was discovered in September, 1807, at the opening of one of the ancient tombs known by the name of *pandu-kūlis* near the village of Chavadi paleiyam in Coimbatore, thus identifying the employment of this kind of money with the aboriginal race whose places of sepulture are scattered over every part of Southern India. And about four years earlier a pot full of the same pieces was dug up at Pennar, also in the Coimbatore province, among which was found a silver denarius of Augustus, which proves that they were current at the commencement of the Christian Era'.<sup>1</sup>

Cunningham was disposed to date the most ancient coins of the class as early as 1000 B.C., but this estimate almost certainly is much in excess of the truth.

Mr. Loventhal was of opinion that in Southern India the use of punch-marked coins extended from the most remote times down to about 300 A.D. In Northern India, I doubt if they were much used after the Christian Era.

The coins now catalogued, 108 in number, are select specimens, picked out of about treble the number.

The literature on punch-marked coins and the associated subject of

## SECTION VI

# LOCAL COINS OF NORTHERN INDIA

## INTRODUCTION

THE four groups of coins described in this Part have been classed together as being severally assignable to fairly definite localities in Northern India. The coins of each group are found predominantly in the districts named, and are not common elsewhere. The first definite step in such localization of the ancient coinages was taken by the publication in 1891 of *Coins of Ancient India* by Sir Alexander Cunningham, the greatest Indian numismatist since James Prinsep. Sir Alexander's unique experience extending over considerably more than half a century enabled him to accumulate a mass of knowledge, both general and special, concerning all classes of Indian coins, which nobody can hope to rival. Although he published comparatively few details about the *provenance*, or find-spots, of individual coins, his general statements on the subject are of the highest value. His announcement, for instance, that all the coins figured in Plate IX of the work above referred to were obtained at Ajodhyā, furnishes a secure basis for the classification of many pieces which would otherwise embarrass the numismatist. In the same way the assignment of the other classes of coins treated in this section to Avanti, Kosam, and Taxila respectively rests primarily upon Sir Alexander Cunningham's unequalled personal knowledge of the distribution of Indian coins. As Professor Rapson has pointed out, the hope of further advance in our knowledge of the ancient currencies of India depends largely on recognition of the local limits of each class of coin. It is very unfortunate that the recorded information about the find-spots of coins is so scanty, but it is some satisfaction to be able to assign even a few groups to their proper local position. Coins of copper, including bronze of sorts, do not, as a rule, wander very far from their place of issue, and, inasmuch as nearly all the ancient Indian coins may be classed under the heading 'copper', evidence of their *provenance* goes a long way towards determining approximately the locality of their mints.

## AJODHYĀ

The ancient city of Ajodhyā on the Ghāghrā (Gogra) river to the east of the province of Oudh is famous in Hindū legend as the capital of Rāma, but is now a comparatively unimportant town, except as a place of pilgrimage. It has been overshadowed, and, to a large extent, replaced by the modern city of Faizābād (Fyzabad), N. lat.  $26^{\circ}46'45''$ , E. long.  $82^{\circ}11'40''$ , a few miles distant, built in no small degree from the materials of Rāma's capital. Coins obtained at Fyzabad may be considered as coming mostly from Ajodhyā. The ancient history of Ajodhyā is lost, and the attempts of the local Brahmans to supply the loss are worthless. No independent record exists of any of the Rājās whose coins are described in the following pages, and we can only guess their age by considering the style of the coins and the script of the legends. Cunningham held that the most ancient coins, those of Dhanadeva and Visākhadeva, are 'certainly not older than the second century B.C.', and this determination may be accepted, so far as the inscribed coins are concerned. Of course many of the punch-marked and cast coins without legends may be much older. The coins of both Visākhadeva and Dhanadeva were simply cast in moulds, and evidently are of much the same date. Either prince may be regarded as the predecessor of the other. The coins, Nos. 8-11, doubtfully ascribed to Śiva-datta, are also cast; as are the curious little pieces, Nos. 12 and 13 (Pl. XIX, 14), exhibiting the fish, *svastika*, 'taurine,' and an object which seems to me to be intended for a steelyard balance, but is described by Cunningham as an axe.

The fine coins of Kumuda-sena (Nos. 14, 15, Pl. XIX, 15) were first collected and described by Colonel Rivett-Carnac, C.I.E., as noted in the catalogue. Professor Rapson, when describing a third specimen belonging to Mr. H. Nelson Wright, now in the British Museum, erroneously supposed it to be unique and unpublished (*J. R. A. S.*, 1903, p. 287). The closely related coin of Aja-varma (No. 16 of catalogue) is at present unique, so far as I know.

I have ventured to use the designation 'cock and bull' series for the well known die-struck Mitra coins of Ajodhyā, because the name is exactly descriptive and convenient for citation. The specimens catalogued, unfortunately, are not very good. The name of Deva-mitra (No. 28, Pl. XIX, 18) is new. The reading on the coin itself is certain. I see no reason for believing that these 'cock and bull' Mitra coins of Ajodhyā were issued by the dynasty which struck the very different series with deep incuse on the obverse, assigned by Cunningham to Pañchāla. The mere fact that the Rājās who struck both series of coins had names ending in *-mitra* is no sufficient warrant for holding that they

all belonged to a single 'Mitra dynasty'. Nor is there any sound reason for identifying the Rājās who issued the incuse coins with the Śunga dynasty of the Purāṇas. The Pañchāla coins will be treated in Section VIII.

I regret that I am unable to agree with Professor Rapson in his reading of the name on the coins of Ayu-mitra of the 'cock and bull' type. 'The inscription on these coins,' he observes, 'seems not to be *Suya-*, *Saya-*, or *Āyu-mitasa*, each of which readings has been suggested, but almost certainly *Āyyamitrasa* (i.e. *Āryamitrasya*). The description of this coinage given in *Indian Coins* (Pl. IV, 3), should probably be corrected accordingly; but it must be borne in mind that the letters *a* and *su* at this period [scil. 2nd or 1st century B.C.] are very easily confused' (*J. R. A. S.*, 1900, p. 100). I have examined many of these coins in much better preservation than those now catalogued, and am convinced that the true reading is *Ayu* (or possibly *Ayū*). The form of initial *A* on these 'cock and bull' coins is quite distinct from *sa*. I doubt if *su* occurs. It seems to me absolutely impossible to read the first word in the legend of Pl. XIX, 17 as *Āyya*. The legend is  and I do not see how the *y* with the long tail can be read as double *y*. The *u* is formed in the ordinary way by the prolongation downwards of the vertical stroke of the *y*. I do not see any reason for reading *Ā*. Of course there is a difficulty in accepting and explaining a non-Sanskrit word like *Ayu*, but we must take the legend as it stands. I am disposed to think that the 'cock and bull' coins of Ajodhyā are not of such early date as has been supposed, and that they may well be as late as the second century A.D. Mr. Carlleyle regarded Ayu-mitra as the latest of the dynasty, 'as the letters of the legend belong to the later Gupta period' (*J. A. S. B.*, 1880, part i, p. 27); but I do not think the coins are later than 150 A.D., and they may be earlier.

#### AVANTI

These coins, described by Cunningham under the name of Ujjain, are better referred to the country Avanti, of which Ujjain (lat. 23° 11' 10" N., long. 75° 51' 45" E.) was the most notable city. They come not only from Ujjain itself, but from Eraṇ, Besnagar, and other towns of Avanti. Professor Rapson has suggested that the so-called 'Ujjain symbol' of the cross and balls would more accurately be named the 'Mālava symbol', and there is no doubt that the proposed term would be the more accurate, but I have thought it better to retain the more familiar expression.

The legend on No. 27 (Pl. XX, 3), which seems to read *Runamisa* or *Runamāsa*, is puzzling. The two-horned rhinoceros on No. 28 is interesting. It is very curious to notice how the devices used on the punch-marked coins are combined on the dies of the Ujjain coins,

the animals and symbols characteristic of the earlier series being repeated on the later. But the two-horned rhinoceros is represented only on No. 28. The animal depicted on the punch-marked coins and on an Ujjain coin in Mr. Theobald's cabinet (*J. A. S. B.*, 1890, part i, p. 218) is single-horned, either *R. indicus*, or the lesser species, *R. Sondaicus*, the range of which extended to the Panjāb as late as the time of Bābar.

#### KŌSAM

The catalogue includes only four coins which can be referred with certainty to the ancient city of Kōsam on the Jumna, about thirty miles south of west from Allahabad, which is recognized by the Jains as Kauśāmbī, but undoubtedly is not the Buddhist Kauśāmbī of the Chinese pilgrims in the fifth and seventh centuries A.D. (*J. R. A. S.*, 1898, p. 503). The most ancient piece evidently is the circular cast coin No. 4, which has been known for a long time. Cunningham possessed seven specimens, six of which came from Kōsam, and the seventh from Bithā, not far distant. These coins may be assigned to the second or third century B.C.

Bahasati-mitra (Bṛihaspati-mitra) is inaccurately called Bahasata by Cunningham. Fifteen of his coins are in the Lucknow Provincial Museum, of which nine were excavated at Kōsam in 1887, and six at Rāmnagar (Ahichhatrā) in Rohilkhaṇḍ in 1891. The genealogy given in an inscription at Pabhosā near Kōsam shows that the grandfather of Bahasati-mitra was King Bhāgavata, son of Vamgapāla, king of Adhichhatrā or Ahichhatrā. The dynasty at Kōsam is thus proved conclusively to have been a branch of that of Adhichhatrā, and the occurrence of Bahasati-mitra's coins at both Kōsam and Rāmnagar is explained (see *Ep. Ind.*, ii. 243). The late Mr. Rodgers had two small brass coins (diam. .7 and .55) of the Northern Satrap type with the imperfect legend *Baha-* in early characters, which possibly may have been another issue of the Bahasati-mitra of Kōsam and Ahichhatrā. The Kōsam coins of Jeṭha-mitra made known by Cunningham also are related to the Northern Satrap series. During one visit to Kōsam Cunningham obtained sixteen coins of Bahasati-mitra, one of Aśvaghosha, three of Jeṭha-mitra, and two of Deva-mitra (*Reports*, x. 4).

The coins of this Deva-mitra have not been published, so far as I know, and I cannot say whether or not he was identical with the Deva-mitra of the Ajodhyā 'cock and bull' type (Pl. XIX, 18). I doubt if the 'cock and bull' type coins ever occur as far west as Allahabad. They are frequently found in Oudh, Gorakhpur, and Basti.

The coin of Pavata (Pārvata) is new. The only other known specimen, formerly in my cabinet, is now in the Bibliothèque Nationale, Paris.

## TAXILA

The coins of the great city of Taxila, the ruins of which are traceable at Shāhdheri and other villages near Hasan Abdāl, and not very far from Rāwalpindi, in the N.W. Panjāb, have been well described by Cunningham, *C. A. I.*, Pl. II, III. Few illustrations, therefore, are given in the plates of this work. The massive rectangular pieces with blank reverse manifestly are the most ancient. They must be earlier than the coins struck with a die on both obverse and reverse, while the latter must be prior to the coins of Agathokles and Pantaleon (about 190–180 B.C.) which are Hellenized imitations of the Taxilan double-die coins. The single-die pieces may be assumed to begin not later than 350 B.C. The varieties are numerous, so that they must have continued in use for a long time. The circular coins, both massive and thin, with blank reverse, may be a little later than the rectangular ones. The legend *Vaṭasvaka* on No. 13 has been well explained by Bühler as a tribal name, equivalent to Sanskrit *Vaṭāśvakāḥ*, meaning the Aśvaka tribe of the *vaṭa* or fig-tree clan. Similarly the Audumbara tribe was named after the *udumbara* fig-tree, *Ficus glomerata* (*Ind. Stud.*, No. III, Wien, 1895).

The coins with specially Buddhist symbols are probably not earlier than the time of Aśoka. It is not likely that Buddhism had taken root at Taxila before he began his missionary efforts about 259 B.C. I describe the *chaitya*, monastery, &c., on the Taxilan coins as 'specially Buddhist symbols', not because they are peculiar to Buddhism, but because Taxila was a famous Buddhist centre of learning, while it is not known to have been frequented by Jains.

#### KING VISĀKHA-DEVA

1	I.M.	Æ rect. 92 ·85 x ·75	Bull (or cow) standing l., facing a peculiar column; a St. Andrew's cross above the animal's hind quarter. Legend at top in early Br characters, <i>Visākha-devasa</i> .	In centre a solar emblem, composed of central boss with circle of dots and outer rim; snake below; a tree in railing at each side; above, a <i>triśūl</i> symbol of <i>nandipada</i> form. The coin is wholly cast in high relief (R.-C.; obtained at Fyzabad (Ajodhyā); lith. in <i>J. A. S. B.</i> , vol. xlix, part i (1880), Pl. XVI, 1, 2; this coin is No. 1; photo. of drawing in <i>C. A. I.</i> , Pl. IX, 7; Pl. XIX, 13).
2	A.S.B.	Æ rect. 53·5 ·8 x ·7	Similar; but smaller, and broken at top l. corner.	Similar; in inferior condition.
2a	"	Æ broken rect. ·75	Goddess (? Lakshmi with elephants); above, ? ( <i>Vi-sā</i> ) <i>khade(vasa)</i> .	'Ujjain symbol' in square frame; very poor condition; attribution not quite certain.

#### KING DHANA-DEVA

3	I.M.	Æ rect. 55·7 ·83 x ·72	Bull moving r. towards a column with triangular head, springing from a railing; above, in early Br. characters, <i>Dhanadevasa</i> .	In centre, female figure r., standing on snake; a tree in railing r. and l.; above, <i>svastika</i> and two other symbols; similar in fabric and style to coins of Visākha-deva ( <i>C. A. I.</i> , Pl. IX, 8).
4	A.S.B.	Æ brass rectang. 47·7 ·85 x ·7	Similar; not so well preserved.	Similar.

Serial No.	Museum	Metal, Weight, Size	Obverse	Reverse
5	A.S.B.	Æ copper rectang. 81.6 .7	Generally similar; but bull l., and no object in front of him.	Tree in railing r.; a curved object rising from railing l.; snake below; symbols above; no goddess ( <i>C. A. I.</i> , Pl. IX, 9).
6	"	Æ copper rectang. 91.5 .7	As No. 5.	As No. 5.
7	"	Æ copper rectang. 27.6 .6	Elephant standing r. Legend above, in early Br. characters, ( <i>Dhana?</i> ) <i>devasa</i> .	Sundry symbols, obscure; similar in style to coins of Dhanadeva, but attribution uncertain.

## (?) KING ŚIVA-DATTA

8	A.S.B.	Æ pale bronze rect. 16.7 .65 × .55	Elephant moving l. towards a tree or symbol in railing. Br. legend above, ( <i>Śiva?</i> ) <i>datasa</i> .	Sundry symbols, including a form of the 'Ujjain symbol'; the central device may be a degraded form of the goddess seated on lotus (cp. <i>C. A. I.</i> , Pl. IX, 10, 11).
9	"	Æ pale bronze or brass rect. 36.7 .65 × .56	Similar; in worse condition.	Defaced.
10	"	Æ brass rectang. 22.6 .62 × .53	Similar; legend illegible.	Similar to No. 8; but the central device is reduced to mere lines.
11	"	Æ brass rect. 44.3 .6	Ditto; ditto.	Ditto; ditto; a thicker coin (Nos. 8-11 are cast coins like those of Dhanadeva, but in poor condition, and perhaps later in date).

## ANONYMOUS, CIRCULAR, CAST

12	I.M.	Æ 33.9 .6	Fish l., <i>svastika</i> above.	'Taurine', with wheel below (or 'axe', Cunningham, <i>C. A. I.</i> , Pl. IX, 3; Pl. XIX, 14).
13	"	Æ 31.8 .6	Ditto.	Ditto. <sup>1</sup>

<sup>1</sup> R.-C.; first published by Col. Rivett-Carnac in *J. A. S. B.*, vol. x<sup>i</sup>-x, part i (1880), p. 139, Pl. XVII, 15 A, B, with the remark:—'Two specimens of a coin, which is perhaps new. On one side what looks like a fish, as in the preceding coins; on the other a "Thor's hammer" (?), or perhaps the sign of Saturn combined with some other sign in such a manner as to form a monogram (?).'

<i>Copper</i>				
I. <i>Rectangular</i>				
A. <i>Standing figure type</i>				
1	A.S.B.	Æ 78.7 ·72	Man (? king or deity) facing front, wearing short-tailed coat and high tiara, with l. hand hanging down, with r. hand grasping staff or spear; to l., tree in railing; above, 'Ujjain symbol' and 'taurine'.	'Ujjain symbol' with cross in each circle.
2	"	Æ 59.7 ·6	Generally similar; but tree is to r., and above it a tank with fish; solar symbol in l. top corner, also 'taurine'; no 'Ujjain symbol'.	'Ujjain symbol' with <i>svastika</i> in each circle.
3	"	Æ 60.6 ·65 x .52	Nearly identical with No. 2; worn.	Ditto.
4	I.M.	Æ 61.3 ·6 x .55	Man standing, facing front, with r. hand on hip; l. arm extended across staff; tree in railing to r.; snake below; early Br. legend l., <i>mi(?)tasa</i> , in characters of about 200 B.C.	'Ujjain symbol' with dot in each circle (Pl. XIX, 20).
5	A.S.B.	Æ 12.7 ·45	Man with staff or spear in r. hand, l. hand on hip.	Humped bull (? cow) r., with a sort of <i>triśul</i> above, and 'Ujjain symbol', with plain circles, in front.
6	"	Æ 16.2 ·4 x .31	Man, bearded, marching r., with r. hand raised.	'Ujjain symbol' with plain circles; in poor condition.
7	I.M.	Æ 116 ·67	Man marching r.; river with fish below; 'Ujjain symbol' to r.; all in incuse made by circular die; trace of legend.	Indistinct; a massive, thick coin of brass or pale bronze.
8	"	Æ 108.6 ·7	Similar; but conventional tree to l.; no 'Ujjain symbol'.	Defaced or blank; fabric as No. 7, metal darker colour.

<sup>1</sup> See C. A. I., Pl. X. The coins of this class are described by Cunningham under the name of Ujjain; but they do not necessarily come only from that city, and it is preferable to use the name of Avanti, the old designation of the territory of which Ujjain was the principal city. The so-called 'Ujjain symbol' is not by any means confined to coins from the city of Ujjain. It is also found on the money of Erap, Besnagar, and the Āndhra dynasty. For punch-marked coins see *ante*, Sec. V.

10	A.S.B.	Æ 56.5 .6 × .46	Tree in railing; (?) river with fish, and (?)	'Ujjain symbol' with plain circles.
11	I.M.	Æ 16.3 .45	Tree in railing, and (?)	'Ujjain symbol' with dot in each circle (Pl. XX, 1).

*II. Circular**A. Standing figure type*

12	A.S.B.	Æ 128.2 .72	Man (? king or deity) standing, facing, clad in short-tailed coat and high tiara; above, <i>svastika</i> and 'taurine'; to r., solar symbol composed of crescents and broad arrow-heads attached to central boss; to l., standard surmounted by rayed sun; on extreme l., tree.	'Ujjain symbol' with an inner circle and dot in each orb (Pl. XX, 2; C. A. I., Pl. X, 2).
13	I.M.	Æ 134.2 .8	Similar; not so good.	'Ujjain symbol' with plain circles.
14	A.S.B.	Æ 59 .6	Similar, rude; solar symbol, <i>svastika</i> , 'taurine,' and head of standard wanting.	Two 'Ujjain symbols', with inner circle in each orb.
15	„	Æ 76.8 .62	Similar; much defaced.	Ditto.
16	„	Æ 67.1 .6	As No. 14.	As No. 14.
17	„	Æ 42 .7	Similar; solar symbol with broad arrow-heads to r., and below it a (?) tank with four fishes.	'Ujjain symbol' nearly defaced.
18	„	Æ 39.2 .55	Half-length figure of man with r., and arms akimbo; traces of symbols.	'Ujjain symbol' with plain circles.

*B. Lakshmī type*

19	A.S.B.	Æ 47 .6	Rude sketch of Lakshmī seated, with an elephant on each side pouring water over her.	'Ujjain symbol' with plain circles (cp. C. A. I., Pl. X, 7, 8).

20	A.S.B.	Æ 50.3 .6	Seated figure, perhaps intended for Lakshmi; in poor condition.	'Ujjain symbol' with a dot in each circle.

C. *Animal type*

21	A.S.B.	Æ 101.5 .6	Bull standing to r., with tree in railing in front, and solar symbol with broad arrow-heads above; (?) river below.	'Ujjain symbol' with plain circles.
22	"	Æ 89.6 .7	Similar; river distinct; worn.	'Ujjain symbol' with circle in each orb (C. A. I., Pl. X, 18).
23	I.M.	Æ brass 68.7 .6	Humped bull l., defaced.	'Ujjain symbol' with plain circles in square incuse.
24	A.S.B.	Æ 41.3 .55	Long-legged humped bull l., as on Nāga coins.	'Ujjain symbol' with plain circles.
25	"	Æ 29 .5	Ditto.	Ditto.
26	I.M.	Æ 34 .5	Ditto; much worn.	Ditto.
27	"	Æ 19.7 .45	Bull standing r.	Tree in railing; 'Ujjain symbol' with plain circles to r.; below, in early Br. characters, <i>Runamāsa</i> , or <i>Runamisa</i> , 𑀭𑀸𑀓𑀺𑀓𑀾𑀢𑀺𑀓 (Pl. XX, 3).
28	"	Æ 29 .45	Two-horned rhinoceros standing r.; 'Ujjain symbol' above. 	Traces of 'Ujjain symbol'.
29	"	Æ 20.5 .53	Tusked elephant standing l.; six-rayed wheel (sun) above.	'Ujjain symbol' with inner circle and dot in each orb.

D. *Symbols type*

30	A.S.B.	Æ 80.5 .65	Tree in railing, 'Ujjain symbol,' and other marks.	'Ujjain symbol' with inner circle to each orb (C. A. I., Pl. X, 15).
31	"	Æ 77.8 .77 x .65	Similar.	Ditto.

<sup>1</sup> The coin being worn, I give a sketch, instead of a photograph of a cast. The animal seems to be the *Rhinoceros Sumatranus*, which is still found in Assam and Burma. The one-horned rhinoceros of the punch-marked coins (Pl. XIX, 5, 6) may be either *R. indicus* or *R. Sondaicus*. Mr. Theobald regards it as the latter. The late Mr. J. Cockburn 'came across an injured drawing of a two-horned rhinoceros' in a cave somewhere in the Kaimūr Hills which extend to the south of Allahabad (J. R. A. S., 1899, p. 96). This fact indicates that the *R. Sumatranus* once had a wider range in India than it now has, and helps to explain the appearance of the animal on an Avanti coin.

34	„	Æ 13.2 ·35	'Ujjain symbol' with plain circles; solar symbol with broad arrow-heads, &c.	'Ujjain symbol' with plain circles.
35	„	Æ 28.7 ·57	Three-arched <i>chaitya</i> with crescent above, and a separate arch in l. field.	'Ujjain symbol' with plain circles.
36	„	Æ 47.2 ·62	Obscure symbols, including a wheel; worn.	Two 'Ujjain symbols' with plain circles.

## COINS OF KŌSAM, ABOUT SECOND CENTURY B.C.

## KING BAHASATI (BRĪHASPATI) MITRA

1	I.M.	Æ 94.8 ·7	Bodhi tree in railing, with 'taurine' to l.; below, in early Br. characters, [ <i>Ba</i> ]hasati-mita[sa].	Defaced; probably a bull; in poor condition (C. A. I., Pl. V, 11).
---	------	--------------	--	--

## KING AŚVAGHOSHA

2	A.S.B.	Æ brass 77.2 ·73	Tree in railing; below, in early Br. characters, <i>Ghoshasa</i> .	Defaced; (?) bull; in poor condition (C. A. I., Pl. V, 14).
---	--------	------------------------	--	---

## KING PAVATA (PĀRVATA)

3	I.M.	Æ 26.3 ·65 × ·57	Tree in railing; three-arched <i>chaitya</i> l.; snake r.; below, in early Br. characters, <i>Pavatasa</i> .	Humped bull standing r. (Pl. XX, 4). <sup>1</sup> The coin is die-struck on a cast blank.
---	------	---------------------	--	---

## ANONYMOUS

4	I.M.	Æ 102.3 1.01	In centre, conventional tree in railing; below, <i>chaitya</i> of six arches; to l., eight-rayed wheel and <i>nandipada</i> symbol; to r., cross and balls, nearly the 'Ujjain symbol', and <i>svastika</i> .	Humped bull of very lanky shape, walking l. towards a standard with peculiar head; a curious symbol above the bull; cast in high relief (C. A. I., Pl. V, 7; Pl. XX, 5).

<i>Copper</i>				
I. <i>Single-die Coins</i>				
A. <i>Massive rectangular</i>				
1	I.M.	Æ 159.6 1.02 × .65	<i>Chaitya</i> of three arches with crescent above, monolith to l.	Blank ( <i>C. A. I.</i> , Pl. II, 6).
2	„	Æ 141 .95 × .7	Similar.	Ditto.
3	„	Æ 80.5 .7	<i>Chaitya</i> of three arches with crescent above, tree in railing to r.	Ditto ( <i>C. A. I.</i> , Pl. II, 7).
4	„	Æ 125.7 .8 × .75	Above, to r., <i>chaitya</i> of three arches surmounted by crescent, to l. pyramid of balls; below these a snake, and below it two symbols made of curved lines.	Ditto ( <i>C. A. I.</i> , Pl. II, 9).
5	„	Æ 145 .8 × .75	<i>Chaitya</i> of three arches surmounted by crescent to l., pyramid of balls to r.; <i>svastika</i> above, and snake below; all in incuse.	Blank; well preserved ( <i>C. A. I.</i> , Pl. II, 11; Pl. XX, 6).
6	„	Æ 122.5 .87 × .7	<i>Chaitya</i> of three arches surmounted by crescent to r.; plan of monastery, with cells and monolith in centre, to l.	Blank ( <i>C. A. I.</i> , Pl. II, 12).
7	„	Æ 116 .7	Similar; snake below.	Ditto.
8	„	Æ 134.7 .77	As No. 7.	Ditto.
9	„	Æ 110.2 .92 × .7	Three-arched <i>chaitya</i> surmounted by crescent to r., pyramid of balls with three points on top to l., which is being venerated by a robed figure in centre, with l. hand on hip, and r. hand raised as if making an offering. <sup>1</sup>	Ditto ( <i>C. A. I.</i> , Pl. II, 14).
10	„	Æ 126 .98 × .65	Similar.	Ditto.

<sup>1</sup> I am not certain what the 'pyramid of balls' is meant for; it may be a kind of *stūpa*. Certainly it does not denote a 'pile of bales', as Cunningham calls it. Perhaps he meant to write a 'pile of balls'.

12	"	Æ 158 .87	Similar, but <i>chaitya</i> to r., and cross to l.	Ditto.
13	"	Æ 146.4 .9	In centre, <i>chaitya</i> of three arches surmounted by crescent, venerated by a robed figure to r. (indistinct on this spec.); to l. marginal legend, in Br. characters of third century B. C., <i>Vaṭasvaka</i> , which is probably the name of a tribe or clan.	Ditto.
<i>C. Thin circular</i>				
14	A.S.B.	Æ 19.7 .75	Lion standing l., with a defaced symbol in front, and <i>svastika</i> above.	Blank.
15	"	Æ 36.6 .7	Similar, but thicker; the symbol in front of lion is a 'taurine'.	Ditto.
16	"	Æ 36 .7	Similar, but no symbol in front of lion.	Ditto (Pl. XX, 7).
17	I.M.	Æ 29.5 .65	Similar, but the 'taurine' is above, and the <i>svastika</i> in front of the lion.	Ditto, with doubtful marks which may be those of a device.
18	"	Æ 31.7 .65	Similar; <i>svastika</i> above, and 'taurine' in front of lion.	Certainly blank.
<i>D. Various, circular</i>				
19	A.S.B.	Æ 56.5 .67	A large 'taurine' in centre.	Blank; rather thick coin (Pl. XX, 8).
20	"	Æ 61 .42	Solar symbol composed of crescents applied to a central boss. <sup>1</sup>	Blank; unusually thick.
21	"	Æ 48.6 .55	Short-limbed square cross, as on Nos. 11 and 12 above, occupying whole field.	Defaced, uncertain.

<sup>1</sup> The varieties of this symbol are characteristic of Taxilan coins. These three coins, Nos. 19-21, seem to be assignable to Taxila. Some others, which will be recorded in Section X, Miscellaneous Ancient, may belong to the same city.

## SECTION VII

# TRIBAL COINS

### INTRODUCTION

For many centuries past India has not evolved any form of government other than the ordinary type of oriental despotism; but ancient India exhibited a greater variety of political constitutions, and large areas were occupied by nations, tribes, or clans, who managed to dispense with the commonplace despot, and governed themselves under some form of aristocratic or democratic constitution. The Greek writers give us glimpses of such communities—the Malloi (probably Mālavas), Oxydrakai (Kshudrakas), and others—in the Panjāb during the fourth century B.C.; and in later times occasional notices in inscriptions prove that the 'kingless' peoples still held their ground in various regions. To such peoples, apparently, must be assigned the curious coins described in this section.

#### ĀRJUNĀYANAS

The coins of this tribe, nation, or clan—whatever its proper designation may be—are extremely rare; and I do not know any exact record of the find-spots of the few existing specimens to help in the definite location of the tribe. In the time of Samudragupta (350 A.D.) the Ārjunāyanas were on the frontier of the Gupta empire, outside of the regular provinces, although under the general control of the paramount power. Cunningham classed the Ārjunāyana coins with those of Mathurā because they are procurable in that city; and they may be assigned with probability to the region lying west of Agra and Mathurā, equivalent, roughly speaking, to the Bharathpur and Alwar States (*J. R. A. S.*, 1897, p. 886). Two Ārjunāyana coins are included in the catalogue. No. 1 represents a type known since Prinsep's time; No. 2 seems to be unpublished. Both types are early, and may be dated approximately 100 B.C. They are closely related, in one way or another, to the money of the Northern Satraps, Yaudheyas, and other ancient powers. See *C. A. I.*, p. 89, Pl. VIII, 20; *J. C.*, sec. 42, Pl. III, 20; and Rapson in *J. R. A. S.*, 1900, p. 106.

#### AUDUMBARAS OR ODUMBARAS

The coins of this tribe also are extremely rare, and come chiefly, if not exclusively, from the Kāngrā District in the Panjāb. The four

specimens described in the catalogue are all in bad condition, and their *provenance* is not recorded. The coins approximately belong to the same period as those of the Ārjunāyanas; and, like them, have many points of resemblance to other classes of ancient coins. See *C. A. I.*, p. 66, Pl. IV; *Reports*, xiv, p. 115, Pl. XXXI; *I. C.*, sec. 43, Pl. III, 8; Bergny and Rapson in *J. R. A. S.*, 1900, pp. 410, 429 n. [During passage of this work through the press I learn from Mr. Rawlins that Odumbara coins of Bhānumitra are 'quite common' at the foot of the Manaswāl plateau, Hoshyārpur District.]

#### KUṆINDAS

The ancient Kuṇindas seem to be represented by the modern Kunets of Kūlū and other territories near Simla, and to have extended formerly into the Sahāranpur and Ambāla Districts, where their coins occur in large numbers. Three of the silver coins were found at Jwālamukhi in Kāngrā associated with coins of Apollodotos (*circ.* 150 B. C.; *Reports*, xiv. 134). Most of the Kuṇinda coins, both silver and copper, bear legends assigning them to the reign of Mahārājā Amoghabhūti, Rājā of the Kuṇindas; but they vary much in execution, and probably extend over a considerable period. The name of Amoghabhūti seems to have been continued on the coinage long after his decease. The legends usually are in an ancient form of Brāhmī script, but some coins, presumably the earliest, have the legend repeated in the Kharōshthī character (Nos. 9, 10 of catalogue).

The rare anonymous coins exhibiting an image of Śiva and his titles (Nos. 36, 37) are later in date than the 'stag type' coins with the name of Amoghabhūti.

See *Reports*, xiv, pp. 125–35, Pl. XXXI; *C. A. I.*, p. 70, Pl. V; *I. C.*, sec. 50, Pl. III, 9, 10; and Professor Rapson's article, 'The Kulūtas, a people of Northern India,' in *J. R. A. S.*, 1900, p. 529.

#### THE MĀLAVAS

In ancient Indian literature and inscriptions the term Mālava is applied to various communities and territories, extending from the eastern Panjāb to Ujjain. Tāranāth (Schiefner, p. 251) even speaks of 'Mālava in Prayāga', whatever that may mean. The Mālavas whose coins are here catalogued dwelt in eastern Rājputāna for four or five centuries, and may or may not have been the same people as the better known Mālavas further south. In the vast range of Indian coinages their coins are among the most curious and enigmatical, and among the many brilliant discoveries made by that eccentric archaeologist, the late Mr. A. C. Carlleyle, none is more striking than that of thousands of Mālava coins at Nāgar in the Jaypur State. The discovery was made,

in the camping season of either 1871-2 or 1872-3, and, so far as I know, since then nobody else has visited the place, which is difficult of access, infested with venomous snakes, and extremely unhealthy. The site of the ancient town of Nāgar, or Karkota Nāgar, covers about four square miles, and lies within the territory of the Rājā of Uniyāra (Oniara of map), a feudatory of Jaypur, at a distance of about twenty-five miles a little east of south from Tonk, in approximately N. lat. 25° 50' and E. long. 75° 50'. Here Carlleyle found the remains of a city of high antiquity, with a multitude of old temples and great embankments, the buildings being constructed of huge bricks measuring 1' 6" x 1' 5" x 4". The Mālava coins occurred in large numbers in many spots, and he 'found the small green old coins in some places lying as thick as shells on the sea-shore' (*Reports*, vi. 176). Altogether he and the people employed by him gathered more than six thousand; out of which 'not more than about thirty-five coins (or a little over half a coin per cent.) were of outside origin, or derived from a foreign source. With the exception of these few, the whole of the coins found at Nāgar were exclusively of Nāgar mintage, and belonged to Nāgar alone' (*ibid.*, p. 179). The coins now described are part of that wonderful find. A few duplicates have been excluded from the catalogue. Carlleyle found that about 2,296 specimens were worth keeping, but 'about 400 good coins' were stolen from him. I do not know what has become of the balance; Dr. Hoernle formerly had some, but an immense number remains unaccounted for. Evidently plenty more would be obtainable if anybody would take the trouble to go and look for them.

According to Carlleyle's and Cunningham's judgement the age of the coins found ranged from about 250 B. C. to 250 A. D., or at the latest 350 A. D., a period of five or six centuries; and my examination of the available specimens supports this opinion, so far as the later limit is concerned. But the initial date for the coins, as Professor Rapson has convinced me, does not seem to be earlier than 150 B. C.

The legends of the earliest coins are in the Brāhmī script of the second century B. C., while those of the latest may be assigned to the fourth century A. D. The cessation of the local coinage is adequately accounted for by Samudragupta's conquest of Northern India about 330 A. D. Professor Rapson goes too far when he observes that 'the coins on which the legend *Mālavānām Jayah* has been read were formerly regarded as ancient; but both the character of their inscriptions and the fact that they are in fabric somewhat similar to the coins of the Nāgas of Padmāvati (Smith, *J. R. A. S.*, 1897, p. 643; v. inf. § 101) point to a date not earlier than the fifth cent. A. D.' (*I. C.*, sec. 51). In truth none of the coins in the Indian Museum are as late as the fifth century, and, as remarked above, 330 A. D. may be taken as the limiting date.

Most of the earliest coins are comparatively large, with a diameter of about half an inch (Nos. 1-11). The *Bhapaṃyana* coin (No. 68), diam. .4, and the Yama coin (No. 69), diam. .42, belong to the same period, probably the second century B. C. No. 100, a coin of *Paya*, with a late form of *y*, may be assigned to 300 A. D. The unique *Mahārāya* coin (No. 101, Pl. XXI, 5), which Carlleyle supposed to be the latest of all (*Reports*, p. 180) seems to be referable to the second century A. D. Its diameter is .3.

The small size of most of the Mālava coins is astonishing. The weights (inaccurately stated by Cunningham, *Reports*, xiv. p. 150) are as follows:—

			grains
Class A.	Group 1 (second century B. C.)	.	10.5 to 40.3
	„ 2 (two coins), vase rev.	.	2.5 each
	„ 3, tree and vase	.	4 to 9
	„ 4, lion rev.	.	3.4 to 7.5
	„ 5, bull rev.	.	3.5 „ 10.5
	„ 6, king's head	.	6.5 „ 9.4
	„ 7, fantail peacock	.	6.3 „ 12.0
	„ 8, various	.	2.6 „ 16
Classes B and C	.	.	1.7 „ 15

No. 106, with a pinnate palm-leaf on obv., vase on rev., and weight 1.7, diam. .2, may claim the honour of being one of the smallest coins in the world. Although it has no legend, the type is quite distinctly shown. No. 70, which is inscribed with a two-line legend, weighs only 2.3, and has a diam. of .25. It is very difficult to understand how such a coinage can have been used, as it was used for centuries.<sup>1</sup> Evidently it was confined to Nāgar and the immediate neighbourhood, for the coins are not found anywhere else. The few which Cunningham obtained at the annual fair of Pokhar (Rājputāna) in November, 1864 (*Reports*, xiv. 150), probably came from Nāgar, and the single specimen in the A. S. B. collection (Catal. No. 67 *b*) most likely was obtained by Colonel Stacy's collector working at Chitor.

Carlleyle recognized nearly forty new names of chiefs, but those read by me on the coins catalogued number only twenty. Very odd the names are, and evidently of foreign origin. The name *Yama* on No. 69 in early characters may be read backwards as *Maya*. Undoubted examples of reversed legends read from right to left are supplied by Nos. 57 (Pl. XX, 20), 62 (Pl. XX, 22), 63 (Pl. XX, 23), and 70. The

<sup>1</sup> I formerly possessed eight select specimens of minute rectangular punch-marked coins from Eran which measured from .2 to .35 inch on the side. I did not note the weights. The British Museum possesses minute silver coins of Ephesus, the smallest of which weighs only a grain.

extreme minuteness of the coins may interfere with the legibility of photographs, on which difficulty may be found in tracing the legends, but in all these cases the fact is as stated. I should note that the reading *Mālavālṇa*, and its explanation as a Prākṛit genitive plural, were first published by Dr. Hoernle.

Limitation of space forbids further discussion of this interesting group of coins. The publications on the subject have been cited above.

#### NĀGA

The Nāga coins, having been adequately treated by Cunningham (*Reports*, ii. 307-28; *J. A. S. B.*, 1865; *C. M. I.*, pp. 20-4, Pl. II), may be disposed of briefly. The Nāga capital, Padmāvati, was identified rightly by Cunningham with the modern Narwar (Nalapura) in the Gwālior State, situated about forty-five miles SSW. from Gwālior. The abundant coinage of Mahārājā Gaṇapati or Gaṇendra is represented in the catalogue by fifteen selected specimens, among which No. 15, weight 42, diam. .45, is notable for its comparatively large size and thickness. Most of the coins are very small, the diameter ranging from .3 to .38, and the weight from 6.3 to 21.5. They are closely related to some of the later Mālava coins, but are rather larger and thicker. The date of Gaṇapati Nāga is fixed to approximately 330 A.D. by the Allahabad inscription of Samudragupta, who 'violently exterminated' him along with other northern princes (*J. R. A. S.*, 1897, p. 876). Mahārājā Deva, of whose coinage a single poor specimen is in the collection, must have been slightly earlier. The coins of the other Nāga chiefs are wanting.

#### RĀJAṆYA

The Rājaṇya coinage has not been recognized hitherto owing to a strange blunder in the reading of the legend, *Rajaṇa janapadasa*, the first word of which has been misread by everybody as *Rājña* (*I. C.*, sec. 47; *Reports*, xiv. 151) or *Rajña* (*C. A. I.*, p. 89). The legend, whether in Brāhmī or Kharōshthī, is perfectly plain as *Rajaṇa*, written in three characters. Professor Rapson, who accepts the correction, rightly explains *rajaṇa* as equivalent to Sanskrit *rājaṇya*, a well-known equivalent for *kshatriya*, the modern Rājput. The legend therefore means '[coin] of the Kshatriya country', or, to use the present verbal equivalent, Rājasthān or Rājputāna. In *C. A. I.*, Cunningham classes the coins of the so-called 'Raja-Janapada' with those of Mathurā, as being occasionally procurable at that city, but points out (p. 85) that many of the coins included in his Plate VIII were brought for sale from the surrounding country. The Rājaṇya or Kshatriya territory, therefore, must have been not far from Mathurā, and presumably in some part of eastern Rājputāna. Exact evidence concerning the *provenance* of the coins, which are rare, has not been

recorded, but the type is closely related to that of the Northern Satraps of Mathurā, and the coins may be assigned to either the Bharathpur (Bhurtpore) or Dholpur State; more probably the latter, as the Ārjunāyanas may be allotted to the former. The date of the Rājañya coinage seems to be either the second or first century B. C. [Mr. Rawlins informs me that coins of this type are found on the Manaswāl plateau, Hoshiārpur District.]

#### YAUDHEYA

The best account of the Yaudheya coins is that in *Reports*, pp. 139–45, Pl. XXXI, which is superior to the description in *C. A. I.*, pp. 75–9; but the plate in the latter work is the better. The references are collected in *I. C.*, sec. 60 (Pl. III, 13–15).

The name Yaudheya (also spelt Yodheya on some coins) means 'warrior', and the tribe is mentioned in inscriptions as opposed to the Satrap Rudradāman of Surāshṭra about 150 A. D., and to Samudragupta about 330 A. D. The coins, which are readily divisible into three well-marked classes, 'are found in the Eastern Panjāb, and all over the country between the Satlej and Jumna Rivers. Two large finds have been made at Sonpath, between Delhi and Karnāl.'

Four of the copper pieces were obtained in the Kāngrā District, and a great many at a place called Jogadheri in the Eastern Panjāb. The unique silver coin was procured by Cunningham's collector at Sahāranpur (*C. A. I.*, pp. 75, 79; Mr. Rodgers).

The 'bull and elephant' type, which is the earliest, may be dated a little before or after the Christian era. The big, rude pieces of the chief who calls himself Svāmi Brahmanya Yaudheya may be assigned to the second century A. D.; and the better executed 'warrior' type coins, suggested by Kushān models, probably extend up to the time of the conquest of Northern India by Samudragupta about 330 A. D. They seem to have been issued by three distinct clans, the coins of the second and third clans being distinguished by numeral syllables and special symbols. Those of the third clan are the least numerous.

For Yaudheya clay seals or votive tablets from Sunet in the Lūdīāna District, see Hoernle, *Proc. A. S. B.*, 1884, pp. 138–40. These are assigned to the third century A. D., but may be as late as the early part of the fourth century.

MAHĀRĀJĀ AMOGHABHŪTI, SECOND CENTURY B. C.				
<i>Stag type</i>				
<i>Silver</i>				
1	I.M.	AR 33.8 .67	Female, with l. hand on hip, offering fruit with r. hand to a stag standing r., with a symbol between horns; square <i>stūpa</i> surmounted by umbrella above stag; mint-mark, a disk surrounded by dots at hind-foot of stag; marginal Br. legend, perfectly preserved, <i>Amoghabhutisa mahārājasa rājña Kuni[n]dasa</i> (अमघमु तस महरजस राज कुणदस), 'Coin of Amoghabhūti Mahārāja, Rājā, the Kuṇinda' (or 'of K.').	In centre, high six-arched <i>chaitya</i> with umbrella; to r., conventional tree in railing; to l., <i>svastika</i> and triangular-headed symbol; above, <i>nandipada</i> symbol (Pl. VII, 152); below, snake. Kh. marginal legend, <i>Raṇa Kuṇidasa Amoghabhatisa</i> ; below, <i>maharajasa</i> .
2	A.S.B.	AR 34.2 .68	Similar; mint-mark the same. Legend beautifully preserved, अमघमुतिस मह-रजस रजः कुणदस.	Similar. Kh. legend, <i>Raṇa Kanidasa Amaghabhatisa</i> ; below, <i>maharajasa</i> (Pl. XX, 11). <sup>1</sup>

4	A.S.B.	AR 30.8 .71	Similar; minute mint-mark between female and stag; legend very imperfect.	Ditto; legend very imperfect.
5	I.M.	AR 30.8 .7	Similar; mint-marks, <i>svastika</i> between stag's legs, and <i>nandipada</i> between stag and female; legend very imperfect.	Similar; legend very imperfect.
6	„	AR 31.6 .75	Similar; mint-mark, two short curved lines (?snakes) between stag's legs; legend very imperfect.	Ditto; ditto.

<sup>1</sup> Mr. Theobald (*Proc. A. S. B.*, 1898, p. 174) holds that the animal is a buffalo, but to me it seems clearly to be a stag of some species. The 'Buddhist symbol' (Cunningham), between the horns, may be a pair of snakes, as Theobald interprets it. The Br. legend begins over the stag's head, not as given by Cunningham, and is continuous. The Kh. legend, which is interesting as including the rare character *gha*, begins r. at the bottom, and *maharajasa* is in the exergue. The Br. u of *bhu* is short; in the Kh. this vowel is not marked. The second nasal of Kuṇinda is not visible in either legend.

*Copper (circular, unless as specified)*

## Class A—With the tribal name

*Group 1; coins about .5 or more in diameter, generally circular; second century B.C.*

1	I.M.	Æ 40.3 .52	<i>Jaya</i> in large ancient script.	Radiates sun and a second solar symbol; marginal legend in large characters, [ <i>M</i> ]ālavā[nām].
2	„	Æ imperfect 10.5 .5	Legend in two lines, (1) <i>Jaya</i> . ., (2) <i>Mālavā-nā[n]</i> . (Two <i>aksharas</i> seem to follow <i>jaya</i> , (?) <i>jaya</i> repeated.)	Corroded.
3	„	Æ 29.5 .62	Legend in two lines, (1) <i>Jaya</i> , (2) [ <i>Mā</i> ]lavā-nā[n]. (The <i>ja</i> lies on its back.)	Ditto.
4	„	Æ oval 25.5 .7 x .57	Conventional tree in railing, with <i>ja</i> l. and <i>ya</i> r.	Snake (?); rest corroded, probably had legend <i>Mālavānām</i> .
5	„	Æ 22.25 .55	Legend in two lines, (1) [ <i>Ja</i> ]ya, (2) [ <i>Mā</i> ]lavā-nām.	Corroded.
6	„	Æ 14 .55	Legend in two lines, (1) <i>Jaya</i> , and an <i>akshara</i> , (2) <i>Mālivān[ām]</i> . (The mark for <i>i</i> is distinct.)	Ditto (Pl. XX, 13).

Serial No.	Museum	Metal, Weight, Size	Obverse	Reverse
7	I.M.	Æ 23.5 .5	Legend across coin, <i>Malavā</i> ; above, <i>Jaya</i> end-wise.	Ditto, or perhaps blank.
8	„	Æ imperfect 11 .45	Above, railing of tree; below, <i>Mālavā</i> .	Snake; and <i>nandipada</i> symbol, nearly as Pl. VII, 152.
9	„	Æ thick 31.4 .52	<i>Jaya</i> in bold characters on blank surface.	Corroded; probably had legend <i>Mālavānām</i> (Pl. XX, 14). This coin, perhaps, looks rather later than the others.
10	„	Æ 17.3 .46	Animal (? lion) standing l.; traces of legend above seem to be <i>Mālava</i> , but (?).	Symbols mostly defaced. This coin is doubtful.
11	„	Æ oblong 7 .6 x .45	<i>Chaitya</i> of three arches; above, [ <i>Ja</i> ] <i>ya</i> , in large old characters.	Radiate sun and second solar symbol, as No. 1; legend below in second century B.C. script, <i>Mālavāṇa</i> . (The coin is as thin as paper.)

*The following are all of minute size*

*Group 2; with vase rev.*

## SVĀMĪ BRAHMAṆYA YAUDHEYA, ABOUT SECOND CENTURY A. D.

*Copper*

8	I.M.	Æ 165.7 1.0	Six-headed god (Kārttikeya) standing on lotus, facing, with l. hand on hip, and r. hand raised, towards barbed spear; legend in bold, irregularly placed script, <i>Brahmaṇya devasya bhā</i> . <sup>2</sup>	Six-headed goddess standing on lotus, facing; tree in railing r.; six-arched <i>chaitya</i> with umbrella, and <i>nandipada</i> symbol l. (Pl. XXI, 15).
9	"	Æ 159.3 1.12	Six-headed god standing on pedestal, facing (? legend on pedestal); marginal legend in bold script, <i>Bra[h-m]aṇya devasya</i> , and <i>bhā-ga</i> .	Six-headed goddess standing on bent line, facing; r. hand raised, l. hand on hip; below her feet a tree lying on its side; to r., tree in railing, with <i>svastika</i> above it.
10	"	Æ 164.5 1.02	Six-headed god standing, facing, his r. hand clear of the spear, which stands obliquely in the field; <i>Brahma</i> legible.	Goddess and symbols as No. 8.
11	"	Æ 153 1.0	Similar; <i>maṇya deva</i> legible.	Ditto.
12	"	Æ 167.2 1.0	Similar; <i>ya bhagavataḥ svamin</i> legible.	Ditto (Pl. XXI, 16).
13	"	Æ 132.5 1.05	Similar; mostly defaced.	Ditto.
14	"	Æ 174.5 1.07	Similar.	Ditto; but coin roughly hexagonal, tree l., and <i>chaitya</i> r.

<sup>1</sup> This legend, also, never has been fully read. Rodgers (*Lahore Catal.*) suggested *Kṛipadhaṇaba Yaudheyana*; Cunningham proposed *Bhūmidhanuṣa*; and on a good specimen formerly in my cabinet the reading seemed to be *Bhūpadhanuṣa*. The second word *Yaudheyana* is certain.

<sup>2</sup> 'The correct reading on these coins seems undoubtedly to be *Brahmaṇya (Deva)*, the name of the Yaudheya king to which the type of the "six-headed" deity (*Ṣaḍānana*, *Brahmaṇya*, or *Kārttikeya*) also alludes' (Rapson, *J. R. A. S.*, 1903, p. 291).

16	"	Æ 148.8 1.07	Six-headed god, defaced. Legend, r. <i>sa ku</i> .	Single-headed goddess, radiate; tree r.; wide blank margin.
17	A.S.B.	Æ 172.5 1.1	Six-headed god, grasping spear. Legend, <i>bhāgavata . . . sa Kumā</i> .	Six-headed goddess; tree r., <i>chaitya</i> l.; snake or river below.
18a	I.M.	Æ 154.5 1.0	Single-headed god, radiate, facing; vase in r. field; traces of <i>Brahmaṇa deva</i> legend.	Ditto; corroded.
18b	"	Æ 109.9 .97	Single-headed god, radiate, grasping spear. Legend, <i>devasya drama Bra[hma]na</i> . <sup>1</sup>	Quadruped standing l., facing (?) tree; vase with streamers in r. field; dotted circle; much worn.
19	"	Æ 116.3 1.0	Similar; <i>nya devasya</i> legible.	Stag standing r.; crescent above, tree l.; (?) river below; worn, irregular shape.
20	"	Æ 119.5 1.07	Six-headed god; <i>Brahma</i> legible.	Quadruped standing r.; above a (?) shrine, with curved roof.

## ANONYMOUS, THIRD OR FOURTH CENTURY A. D.

*Warrior type; copper**Var. 1; no obv. numeral, no rev. symbol*

21	I.M.	Æ 168 .95	Rājā or deity standing, facing front, grasping spear in r. hand, with l. hand on hip; cock l. at his l. foot. Br. legend in well-formed characters, <i>Yaudheya (Yodheya) ganasya jaya</i> , 'Victory to the Yaudheya tribe' (यधय गणस्यजय).	Robed male figure walking l., with r. hand extended, and l. hand on hip, like Miho on Kushan coins; dotted circle (Pl. XXI, 18).
22	"	Æ 164 .97	Similar; legend nearly complete.	Ditto.
23	"	Æ 168 .92	Ditto; ditto.	Ditto.

<sup>1</sup> The word *drama* seems quite clear, but I cannot explain it. Cunningham notes 'on several specimens I find the word *dama* or *darma* over the back of deer' (*Reports*, xiv. 144). The full ordinary legend seems to be *Bhāgavatah svāmīno Brahmanya devasya*, ['coin] of Svāmī [a title] Brahmanya-deva, worshipper of Vishnu.' I cannot explain with certainty the word *Kumāra* on Nos. 15-17, but it may be the name of a chief distinct from Brahmanya-deva. Cunningham (*loc. cit.*) thought it probable that other names might occur on these coins.

## SECTION VIII

# KINGS OF NORTHERN PAÑCHĀLA (AHICHHATRĀ) AND KOSALA

## INTRODUCTION

### 1. THE SO-CALLED 'MITRA DYNASTY'; COINS WITH INCUSE

THE remarkable series of coins characterized by a well-marked obverse incuse containing the ruler's name and certain symbols, usually in a set of three, is often spoken of as the coinage of the 'Mitra Dynasty', because the names of most of the kings end with the word *mītra* ('friend'). But the designation is not satisfactory, being equally applicable to other dynasties. Some writers, having rather hastily assumed Agnimitra of this dynasty to be identical with Agnimitra Śunga of the Puranic lists and the *Mālarikāgnimitra* drama, then proceeded to ascribe the whole series of coins in question to the Śungas. But, as Cunningham has shown (*C. A. I.*, p. 80), no sound reason exists for connecting these coins with the Śungas, who do not appear to have held the territories where the coins are found. The name of Agnimitra is the sole and insufficient reason for bringing the Śunga dynasty into connexion with the coins; all the other coin names differ from those in the Purāṇas and the play. Cunningham describes the coins in question as those of the country named Pañchāla, that is to say Northern Pañchāla, the modern Rohilkhaṇḍ, comprising the Bareilly (Barēli) and other districts between the Ganges and the mountains. He is right in so far as it is true that these incuse coins are abundantly found at Ahichhatrā, the modern Rāmnagar near Aonlā in the Barēli District, which undoubtedly must have been an ancient capital of Northern Pañchāla, and probably was that of the kings who struck the incuse coins. But the great numismatist was in error when he stated that the coins are 'very rarely found' beyond the limits of Northern Pañchāla. I know from personal experience that the issues of several of the kings are common in eastern Oudh and in the Basti District further east. Carleyle picked up a coin of Agnimitra at the fort of Bhulā Dih in Basti, and also obtained about a hundred others of the dynasty at the same place or near it (*Reports*, xii. 153, 165, 169; *J. A. S. B.*, part i, 1880, p. 21). The two coins of Indramitra formerly in my cabinet came

from Oudh, and I have seen many more collected in that province by other people. But, although it is inaccurate to say that the incuse coins are 'very rarely found' outside Rohilkhand, one of the principal sources of supply unquestionably is Ahichhatrā, where Colonel Rivett-Carnac obtained about a hundred and ten, described and illustrated by Mr. Carlleyle in *J. A. S. B.*, part i, 1880, pp. 21-8, with a plate, and *ibid.*, pp. 87-90, with three plates.

It is clear that the kingdom of the Rājās who issued these coins must have included eastern Oudh and Bastī, with, perhaps, Gorakhpur—in short, the old kingdom of Kosala. If we call these Rājās lords of Northern Pañchāla and Kosala we shall not be far wrong.

In the cold season of 1891-2 Dr. Führer excavated a two-storied Śaiva brick temple to the west of the great lingam at Rāmnagar (Ahichhatrā) and found a pot containing sixteen coins of this dynasty belonging to Dhruvāmītra, Sūryāmītra, Bhānumītra, Bhūmīmītra, Phalgunīmītra, Agnīmītra, Bṛihaspatīmītra, Indramītra, Viṣṇumītra, and Jayāmītra. Those coins presumably are now in the Lucknow Provincial Museum, which possesses a rich cabinet, not yet catalogued.

In the present catalogue the following kings are represented:—Agnīmītra, Bhadrāghoṣa, Bhānumītra, Bhūmīmītra, Indramītra, Phalgunīmītra, and Sūryāmītra. I have arranged the names alphabetically because I cannot find any sure criterion of relative date. The astronomical or astrological character of many of the names is noticeable. Both *Bhānu* and *Sūrya* mean the 'sun', *Bhūmi* is the 'earth', *Phalgunī* is the name of the eleventh and twelfth lunar asterisms or constellations, while *Dhruva* is the pole-star, and also a name of Viṣṇu. The rude devices on the reverse sometimes refer to the Rājā's name; e.g. the coins of Agnīmītra exhibit a personification of 'fire', and those of Sūryāmītra and Bhānumītra have solar emblems.

To judge from the script of the legends, the series seems to range between 100 B. C. and 100 A. D., but no independent evidence of date has been discovered so far.

Colonel Rivett-Carnac expressed his hope that 'a complete set may be accepted for the Society's Museum' (*J. A. S. B.*, part i, 1880, p. 90); but I have not received any such set from the Asiatic Society of Bengal. The coins catalogued all belong to the Indian Museum. Some poor specimens have been excluded.

## 2. ACHYUTA

These little coins, so far as is known, are found only at the site of Ahichhatrā (Rāmnagar near Aonlā, Barēli District, U.P.). The 'name' type was first published by Col. Rivett-Carnac (*J. A. S. B.*, 1880, part i, p. 87, Pl. VII, 2 A, B). The 'Roman head' type was first published by

me (*ibid.*, 1897, p. 302, Pl. XXXVIII, 16), from a coin then belonging to Mr. Delmerick, and subsequently sold to Sir James Bourdillon. That coin and the I. M. specimen are the only known examples of the type. M. Drouin (*Revue Num.*, 1898, p. 141), perceiving that the portrait is imitated from a Roman denarius, held that the 'Roman head' coins must be much older than the 'name' type coins. But the two types occur together at Ahichhatrā, have identical reverse, and legends of nearly identical script. I therefore ascribe both to the same king, without pretending to explain the apparent imitation of a Roman model at so late a time. For wheel reverse compare Deva Nāga of Narwar, who may be dated about 300 A.D. The king seems to have been the Achyuta of the Allahabad inscription, in which he is twice mentioned as conquered by Samudragupta (*J. R. A. S.*, 1897, pp. 420, 862).

Six fair duplicates and four worthless specimens of the 'name' type have been excluded from the catalogue. A good many specimens are in the Cunningham collection, B. M. The weights of the coins catalogued range from 9 to 30.7 grains, so that, apparently, there were at least three denominations. The coins show signs of considerable wear.

## CATALOGUE

### THE SO-CALLED 'MITRA' DYNASTY OF PAÑCHĀLA AND KOSALA, (?) ABOUT 100 B.C. TO 100 A.D.

Serial No.	Museum	Metal, Weight, Size	Obverse	Reverse
<i>Copper or brass, circular, with incuse</i> <sup>1</sup>				
AGNIMITRA				
1	I. M.	Æ 269 1.01	In square incuse, in early Br. script, <i>Agimitrasa</i> ; above, three symbols, which recur on nearly all the coins. <sup>2</sup>	Figure, presumably of Agni (Fire), standing on low railing between two posts; five rays proceed from his head; massive (Pl. XXII, 1).
2	„	Æ brass 183.7 .95	Similar.	Similar figure, but standing on lotus.

<sup>1</sup> Most of these coins were collected by Colonel Rivett-Carnac, C.I.E., at Ahichhatrā (Rāmnagar).

<sup>2</sup> Carlisle interpreted these symbols as:—1., Bodhi tree standing on a square base or in a square railing; centre, a *lingam* guarded by two serpents (*Nāgas*), which rise up on each side of it; r., two serpents intertwined, forming a circular knot in the centre; but this explanation is very doubtful. The 1. symbol looks more like a *stūpa* with umbrella.

Serial No.	Museum	Metal, Weight, Size	Obverse	Reverse
3	I.M.	Æ 85.3 .75	Ditto.	Ditto.
4	„	Æ 87.2 .72	Ditto.	Ditto.
5	„	Æ 75.4 .7	Ditto.	Ditto.
6	„	Æ brass 87.5 .68	Ditto.	Ditto.

### BHADRAGHOSHA

1	I.M.	Æ 285.2 1.07	<i>Bhadraghosasa</i> in incuse, with usual symbols above.	Defaced; very massive.
2	„	Æ 218 1.0	<i>Bhadraghosasa</i> in shallow incuse; a single symbol in small square inset incuse above.	Defaced (Pl. XXII, 2).
3	„	Æ 21.4 .47	<i>Bhadraghosasa</i> , with usual three symbols above, all in incuse.	Traces of very rude, dumpy, standing figure.

### BHĀNUMITRA

1	I.M.	Æ 240.5 1.07	<i>Bhānumitrāsa</i> , with three symbols above, all in large incuse. The central usual symbol is replaced by another in a separate inset incuse.	Defaced.
2	„	Æ 115 .85	<i>Bhānumitrāsa</i> , with rude radiate female figure above, parallel with legend, instead of usual three symbols.	Ditto (Pl. XXII, 3).
3	„	Æ 16 .42	<i>Bhānumitrāsa</i> , with usual symbols above, in shallow incuse.	Railing with a post at each end, flanked by 'taurines' (or ? sun and moon); above, solar symbol of disk surrounded by eight pellets; fine (Pl. XXII, 4).
4	„	Æ 31.8 .5	Ditto; ditto.	Five-pointed flame rising from a <i>nandipada</i> symbol (Pl. XXII, 5).

### BHŪMIMITRA

1	I.M.	Æ 203.7 .97	<i>Bhūmimitrāsa</i> , with the usual symbols, in incuse.	Figure, like that of Agni on coins of Agnimitra; but here the rail posts have cross-bars.
2	„	Æ brass 193 .9	Ditto.	Ditto (Pl. XXII, 6).

## 188 KINGS OF NORTHERN PAÑCHĀLA AND KOSALA

## INDRAMITRA

1	I.M.	Æ 67.2 .68	<i>Idramitrassa</i> , with the usual symbols, in incuse.	Squat figure standing on pedestal or low railing.
2	„	Æ 63.5 .62	Ditto.	Ditto.
3	„	Æ 67.2 .62	Ditto.	Ditto.

## PHALGUNIMITRA

1	I.M.	Æ 198 .98	<i>Phagunimitrassa</i> , with usual symbols, in incuse.	Figure, standing on lotus, closely resembling that of Agni (Pl. XXII, 7).
2	„	Æ 225.7 .98	Ditto.	Ditto.

## SŪRYAMITRASA

1	I.M.	Æ 221.5 1.0	<i>Sūyamitrassa</i> , with usual symbols, in incuse.	Defaced.
2	„	Æ 212 .95	Ditto.	Railing with a post at each end; sun between posts; almost defaced.
3	„	Æ 88 .72	Ditto.	Ditto; the triangular-headed symbol ('altar,' Cunningham), below the sun visible.

## ACHYUTA, KING OF AHICHHATRĀ, 330 A. D.

## Copper, circular

## 'Roman head' type, apparently die-struck

1	I.M.	Æ 18.3 .42	Head and neck of king r., as on a Roman denarius. Behind head <i>A</i> , in front <i>chyu</i> , but on this specimen illegible.	Wheel or sun with eight spokes (Pl. XXII, 8; <i>J. A. S. B.</i> , 1897, part i, p. 302, Pl. XXXVIII, 16).
---	------	---------------	---	---

## 'Name' type, cast

2	I.M.	Æ 22.7 .52	<i>Achyu</i> in bold characters in high relief.	Wheel or sun with eight spokes (Pl. XXII, 9; <i>J. A. S. B.</i> , <i>ut sup.</i> , fig. 15).
3	„	Æ 30.7 .55	Ditto.	Ditto.
4	„	Æ 25 .55	Ditto.	Ditto.

8	„	Æ 14.8 .5	Ditto.	Ditto.
9	„	Æ 12.3 .46	Ditto.	Ditto.
10	„	Æ 9 .48	Ditto.	Ditto; very thin coin.

## SECTION IX

# THE RĀJĀS AND SATRAPS OF MATHURĀ AND VĪRASENA

## INTRODUCTION

### THE RĀJĀS AND SATRAPS OF MATHURĀ

RECENT research has disclosed the names of a large number of early Rājās ruling either at Mathurā (Muttra, N. lat. 27° 30' 13", E. long. 77° 43' 45"), or over territories in the immediate neighbourhood of that ancient city. The Rājās whose coins are described in the catalogue are Balabhūti, Purushadatta, Bhavadatta (unpublished), Uttamadatta, Rāmadatta, Gomitra, Vishṇumitra, Brahmamitra, and ?Sūrya (Suya). There is also a doubtful name (uncertain, No. 1) which may be Ghosha. Other names known are Śeshadatta, Kāmadatta, Śivadatta, and Śisuchandradatta or -chandrāta (?) (*J. R. A. S.*, 1900, pp. 109–15). Cunningham knew of only three specimens of Balabhūti; four more are now described, and three bad specimens have been excluded. The coins of Purushadatta also are rare. Carlleyle found a specimen at Bhulā Dih in Basti District, U.P., to the east of Oudh (*Reports*, xii. 145, 164). Bhavadatta is new, but see *J. R. A. S.*, 1900, p. 113. Three are now added to the five specimens of Uttamadatta previously known. The coins of Rāmadatta are fairly common. Carlleyle found examples associated with coins of the satraps Rañjubula and Śoḍāsa at Indor Kherā in the Bulandshahr District, U.P. (*Reports*, xii. 43).

The coins of Gomitra, Vishṇumitra, Brahmamitra, and Sūrya (Suya) are scarce, but sometimes obtainable at Mathurā. They are, I think, later than those of the princes previously named.

Probably all these Rājās, some of whom may have been contemporary with each other, are earlier than the foreign satraps with Persian names. The most ancient of the satraps seem to be Hagāna and Hagāmāsha, presumably brothers, who introduced a reverse device of a horse. The coins of Hagāmāsha as satrap alone are fairly common, and it would appear that he was the younger brother and survivor of Hagāna. He seems to have been directly followed by Rañjubula or Rājuṇvula, who struck hemidrachmae in base silver, resembling and associated with the coins of Strato II, as well as bronze coins after the manner of the Rājās.

Śoḍāsa was undoubtedly the son of Rañjubula, and if we knew the era of the date 72 on his Mathurā inscription the chronology would be clear. The Mathurā satraps were intimately associated with the satraps of Taxila, whose few coins are not represented in this catalogue.

The satraps of both Taxila and Mathurā by their use of a Persian title and by their names plainly show their connexion with the Persian or Parthian empire; and their rule was, I believe, a consequence of the conquest of the kingdom of Taxila by the Parthian king Mithradates I in or about 138 B.C. Rañjubula and Śoḍāsa may be placed, according to my view, in the last quarter of the second century B.C., somewhere about 125–100 B.C., and the date 72 of Śoḍāsa's inscription must be interpreted accordingly. But this theory of the chronology is not universally accepted. Cunningham obtained thirteen coins of Rañjubula at Sultānpur in the Jālandhar (Jullunder) District, Panjāb (*Reports*, xiv. 57). His coins have been procured also at Sankisa in the Farrukh-ābād District, U.P., and, in association with those of his son Śoḍāsa, at Pādham in the adjoining District of Mainpuri (*Reports*, xi. 25, 38). The distribution of the coins of Rañjubula led Cunningham to believe that his dominions included a large portion of north-western India, extending from Kāngrā, at the foot of the Himalayas, to Multān in one direction, and to Mathurā in the other (*Reports*, iii. 41). But this estimate may be considered somewhat excessive.

The printed notices of the coins of the Rājās and Satraps of Mathurā have been indicated sufficiently above and in the catalogue. The position of the satraps in relation to the Parthian empire has been discussed briefly (p. 21) in my essay entitled 'The Indo-Parthian Dynasties, from about 120 B.C. to 100 A.D.' (*Z. D. M. G.*, January, 1906).

#### VĪRASENA

The coins of this ruler are most readily procured in the Mathurā bazaar, where Cunningham obtained about a hundred. Carlleyle got thirteen at Indor Khera in the Bulandshahr District, while Mr. Burn and others have collected them in the Etah (Ītā) District, as well as at Kanauj and other places in the neighbouring Farrukhābād District. It is clear, therefore, that Vīrasena ruled in the Central Doāb, between the Ganges and Jumna. His coins are scarcer in the Panjāb. Four specimens are in Rodgers' collection at Lahore, and I formerly possessed an exceptionally minute one (diam. .3), which came from the Panjāb. The commonest variety consists of the small rectangular pieces about .45 in diam., with a palm-tree on obverse and the rudē outline of a crowned female figure on the reverse. Sometimes the reverse is blank. The variety with the name only in an incuse on obverse, and blank or animal reverse (Catal. Nos. 1–3) seems to be rare, and has not been published previously.

I am disposed to think that the coins of this class were issued by an earlier homonymous king. Mr. Burn has one round coin of Virasena, but I have seen only the rectangular pieces. Mr. Burn found a brief inscription with the name Virasena in the year 1896 at Jānkhaṭ in the south of the Farrukhābād District, which probably refers to the Rājā who issued the 'palm-tree' coins. I read the date on a rough copy as 113 *Grishma* (i. e. hot season), which probably indicates that the record is dated in the year 113 of the era used by the Kushān kings, which, according to my view, began about 120 A. D. If so, the date of the inscription would be about 335 A. D. The characters of the legends on the 'palm-tree' coins may be as late, although they look rather earlier. Mr. Burn was inclined to read the date of the inscription as 13; but, apparently, that would fall in the reign of Kanishka, and it is unlikely that he would have allowed Virasena to coin extensively in a province adjoining the Panjāb.

## SECTION XI

# THE ĀNDHRA DYNASTY

## INTRODUCTION

THE authorities for the obscure history of the Āndhra Dynasty were critically examined in my articles entitled 'Andhra History and Coinage' (*Z. D. M. G.* for 1902 and 1903), and have again been discussed briefly in my 'Early History of India', and in the Introduction to Professor Rapson's British Museum Catalogue of the Āndhra coins, the proofs of which I have had the privilege of perusing. In this place a few words on the subject will suffice.

The dynasty seems to have attained independence soon after the death of Aśoka, which occurred in 232 or 231 B.C., and it lasted for some four centuries and a half up to about 236 A.D. At a very early period the Āndhra kings made themselves a great power, and extended their authority across India along the course of the Godāvarī from its mouth on the shores of the Bay of Bengal to its source in the mountains of the Western Ghāts. Southwards their dominion was carried into the northern parts of Mysore, and northwards, perhaps, as far as the Narbadā. There is not any reason, so far as I know, for supposing that any part of India to the north of that river ever came under Āndhra sovereignty.

But the coins of the dynasty are Northern rather than Southern in type, and, in fact, have nothing in common with the peculiar coinage of the South. The known extant coins almost all belong to the later kings. The earliest sovereign whose issues are represented in this catalogue is Sivalakura, son of Mātharī (about 85–113 A.D.). The collection does not include any example of the coins of his predecessor, Viṣivāyakura I, who is credited with a reign of six months only in 84 or 85 A.D.; but it contains two good specimens of the issue of Sivalakura's successor, Viṣivāyakura II, son of Gautamī (about 113–38 A.D.). These three princes emitted a peculiar 'bow and arrow' type of coinage, which is found, so far as is known, only at Kolhāpur in the Bombay Presidency. The Āndhra kings had a special partiality for lead as a material for currency, and most of their extant coins are in that metal. Only three specimens of their silver coinage have been discovered, and evidently it was extremely limited in amount. Next to lead they favoured a curious alloy of copper, which Professor Rapson calls 'potin'. A large hoard of these 'potin' coins was found some years ago at

Chāndā in the Central Provinces, and most of the specimens in museums come from that hoard (*Proc. A. S. B.*, 1893, p. 117).<sup>1</sup> The potin coins are cast; the lead coins seem usually to be die-struck, although the blanks may have been cast. The small leaden coins are exceedingly rude, and, perhaps, were wholly cast. The coinage, as a whole, is devoid of all beauty or artistic merit, and is interesting, primarily, as a document of dynastic history, and secondarily, on account of its peculiar materials.

The leaden coins from the Kṛishṇā (Kistna) and Godāvārī Districts, and other southern and eastern parts of the Āndhra empire, exhibit a considerable variety in their rude devices. The reverse most commonly used is the so-called 'Ujjain symbol', familiar on the punch-marked coins and other early issues of Northern India. The favourite obverse type is a rough delineation of an elephant, but the horse, lion, and, perhaps, other animals also occur. The 'ship' coins are not represented in this catalogue. The most extensive issues belong to the reign of Yajña Śrī (about 184–213 A.D.) and the next in number to that of Puḷu-māvi or Puḷumāyi (about 138–70 A.D.). The name which formerly was read as Vada really is, as Professor Rapson points out, Chaḍa (*Chamḍa*, *Chandra*) on the coins. The catalogue includes only one example of his coinage (about 219–29 A.D.). Many of the coins have no legends, and it is impossible to assign them with certainty. Now that attention has been directed prominently to the subject, collectors in the old Āndhra dominions may be expected to add largely to our present very imperfect knowledge of Āndhra numismatics.

<sup>1</sup> Professor Rapson believes the metal of these coins to be 'potin', an impure alloy composed of yellow and red copper, tin, lead, and diverse washings and cinders (*J. R. A. S.*, 1908, p. 804). All the 'potin' coins catalogued seem to be part of the Chāṇḍā hoard. They are cast, not struck. The legends of the Āndhra coins are in Prākṛit; *Siri* = Sanskrit *Śrī*, and so forth. In the headings the Sanskrit forms are given.

## SECTION XII

# THE SASSANIAN DYNASTY OF PERSIA

### INTRODUCTION<sup>1</sup>

THE Sassanian dynasty of Persia, which succeeded the Arsakidan, lasted for more than four centuries, from 226 to 651 A.D. The following list of the kings was compiled by the late Mr. E. Thomas, chiefly from Armenian authorities, with corrections from independent sources (*Num. Chron.*, 1872, p. 44; *Sassanians in Persia*, p. 12). Other authors vary the spelling of the names, and give the dates with some differences.

#### THE SASSANIAN DYNASTY.

	Accession A. D.
1. Ardeshīr I, Bābekān . . . . .	226
2. Shāpūr I . . . . .	240
3. Hormazd I . . . . .	271
4. Varahrān (Bahrām) I . . . . .	272
5. Varahrān II . . . . .	275
6. Varahrān III (Segān Shāh) . . . . .	292
7. Narsahi (Narsēs, Ναρσῆς) . . . . .	292
8. Hormazd II . . . . .	301
9. Shāpūr II (Zu'laktāf) . . . . .	309
10. Ardeshīr II (Jamil) . . . . .	380
11. Shāpūr III . . . . .	384
12. Varahrān IV (Kermān Shāh) . . . . .	386
13. Yezdegird I (Bazah-Kār) . . . . .	397
14. Varahrān V (Gōr) . . . . .	417
15. Yezdegird II (Sipāh-dost) . . . . .	438
16. Hormazd III . . . . .	457
17. Fīrōz . . . . .	459
18. Vagharsh (Báλας) . . . . .	486
19. Kobād (Nekrāi, 'the Wise,' Καβάδης) . . . . .	490 <sup>2</sup>
20. Khusrū I (Naushirwān) . . . . .	530-1
21. Hormazd IV (Türk-zādah) . . . . .	578

<sup>1</sup> Special abbreviations in this Section are:—B. = Bartholomæi; D. = Drouin; K. = Kufic; L. = Longpérier; P. = Pahlavi; Th. = Thomas. The Sassanian coins, although not Indian, served as the model for long series of Indian coinages (*post*, Section XIII), and are included in the catalogue at the request of the Trustees of the Indian Museum.

<sup>2</sup> Th. omits Jamasp, who, in 498 A. D., temporarily took the place of his brother Kobād (L., p. 70).

	<i>Accession A. D.</i>
22. Khusrū II (Parvīz) . . . . .	590
23. Kobād [II] (Shīrūiah, Al-Ghashūm, 'the Iniquitous') . . . . .	628
24. Ardeshrīr III . . . . .	628
25. Shahr-yār (Khorham, Σαρβάρος) . . . . .	629
26. Purān-dukht (daughter of Khusrū Parvīz) . . . . .	630
27. Khusrū [III] . . . . .	} 631-2
28. Azarmi-dukht (daughter of Khusrū, widow of No. 25) . . . . .	
29. Hormazd [V] . . . . .	
30. Yezdegird III (son of No. 25, according to Persian authorities; or son of Kobād and grandson of Khusrū, according to Armenian chronicles) . . . . .	632 (16 June) to 651
[Yezdegird lived until September 651, but the Sassanian power was destroyed by the Arabs at the battle of Nahavend in 641.]	

The coinage exists in three metals—gold, silver, and copper. The gold coins seem to be scarce, but examples of the other metals, especially the silver, are abundant. The gold pieces, like the Kushān and Gupta gold coinage in India, are struck to the standard of the reduced Roman *aureus*. The only gold coins included in this catalogue, three specimens of Shāpūr II (309–80 A. D.), range in weight from 109.2 to 112.3 English (Troy) grains (= about 7.2 grammes), and so agree with the *aureus* of 45 to the pound. The heaviest specimen of Shāpūr I (240–71 A. D.) in the British Museum weighs 113 grains, and was struck to the same standard. The gold coinage of Shāpūr III (384–6 A. D.) was struck to the Constantinian standard of 72 *aurei* to the pound, and does not exceed 70 English grains (about 4½ grammes) in weight.<sup>1</sup>

The silver coinage, on the other hand, as in India, was regulated by the standard of the Greek drachma; and some of the copper coins seem intended to follow the same scale of weights.

The gold and most of the copper coins are thick in fabric, and of moderate diameter. The silver pieces are nearly all extraordinarily thin and broad, the breadth increasing in the later reigns, and attaining its maximum, 1.35 inch, in the seventh century under the Arab governors, who copied the issues of Khusrū II.

The type of the Sassanian coinage varies little throughout its long history; the obverse being occupied by the king's bust, almost always turned to the right, and the reverse by a portable fire-altar, with different accessories. On the earliest coins of the first king, Ardeshrīr Bābēkān, the royal portrait is distinctly Parthian, being, in fact, copied from the likeness of Mithradates; but, even during Ardeshrīr's

<sup>1</sup> The weights cited by L. (pp. 13, 14) are given in Paris grains.

reign, the characteristic Sassanian crown surmounted by a globe was introduced, and the portrait lost its purely Parthian look. Wings, as an appendage to the globe, first appear on the coinage of Firōz (459-86). Khusrū II (590-628) dispensed with the globe, and adopted a peculiar form of winged head-gear, which continued in use, without material change, to the end of the dynasty, and was copied by the Arab governors down to the closing years of the seventh century. The legends, in the old Persian language and Pahlavī character, are exceptionally difficult to read and interpret; and satisfactory arrangement of the coins would be almost impossible but for the circumstance that nearly every king prior to Khusrū II adopted a distinctive form of head-dress, as well as peculiar modifications in the accessories of the type. The latest coins bear supplemental inscriptions in the Arabic language and Kufic script.

No information is available concerning the *provenance* of the coins now catalogued, which form a fairly representative set, although its deficiencies are numerous.

Interest in the Sassanian coinage seems to have died out of late years, and nearly all the standard publications on the subject are old. No satisfactory complete account has been published. Longpérier's valuable *Essai sur les Médailles des Rois Perses de la Dynastie Sassanide* (Paris, Didot), appeared in 1840, and naturally contains some serious errors (corrected in *J. R. A. S.*, 1850, p. 254, note; *ibid.*, 1852, p. 407; quoting Mordtmann in *Z. D. M. G.*, vols. viii, xii). The numerous papers by Mr. Edward Thomas are widely scattered. Those contributed by him to the *Num. Chron.* in 1872 and 1873 were reprinted (Trübner, 1873) under the title *Numismatic and other Antiquarian Illustrations of the Rule of the Sassanians in Persia from A. D. 226 to 652*, or more briefly, *Sassanians in Persia*. This work (p. 11) gives a bibliography of the subject.<sup>1</sup> The most important other papers by Mr. Thomas are 'The Pehlvi Coins of the Early Muhammadan Arabs' (*J. R. A. S.*, 1850, vol. xii); and 'Notes Introductory to Sassanian Mint Monograms and Gems, with a Supplementary Notice on the Arabico-Pehlvi Series of Persian Coins' (*ibid.*, 1852, vol. xiii). A summary description of the coins of each reign will be found in Canon Rawlinson's work, *The Seventh Great Oriental Monarchy*, which is the most convenient presentation of Sassanian history for English readers. The best collection of plates is that published by M. Dorn (St. Pétersbourg, 1873), entitled *Collection de Monnaies sassanides de feu le Lieutenant-Général J. de Bartholomæi*, but no text accompanies the 32 plates.

<sup>1</sup> Not to be confounded with another book by Mr. Thomas entitled *Early Sassanian Inscriptions and Coins; and Numismatic and other Antiquarian Illustrations of the Sassanians in Persia*, 2 vols., 1868-73. See Postscript, *post*, p. 231.

If specialists should discover defects or errors in my description of the Sassanian coins in this catalogue, I trust that the admitted difficulty of the subject may be deemed sufficient excuse. Dr. Codrington kindly guided me to the necessary books, but I have been obliged to do the best I could with the coins.

5	„	Æ — 1.07	Ditto; ditto.	Ditto; in bad condition (L., Pl. III, 5, with two-stepped altar).

## No. 3. HORMAZD I; PROVINCIAL COINAGE IN (?) SĪSTĀN, BY (?) ARDAMITRA, ABOUT 271 A. D.

*Copper*

1	A.S.B.	Æ 99 .9	Parthian head l., with mass of hair behind as on coins of Pakorēs ( <i>ante</i> , p. 58); legend lost.	Low fire-altar, without attendants, and with incense vessels, as on coins of Ardeshr I. P. legend, l. $\Omega\Omega\Omega\Omega$ ; r. $\Omega\Omega\Omega$ . The rev. is slightly concave.
2	„	Æ 78 .8	Similar.	Similar; only a few characters visible.
3	„	Æ 95.5 .92	Ditto.	Ditto; nothing legible.
4-9	„	Æ —	Ditto.	Ditto; ditto. <sup>2</sup>

<sup>1</sup> *Shahpūhari* = mod. Pers. *shahzāda* (*shāhzāda*), 'king's son,' used as a proper name; Lat. *Sapor*; Gr. *Σαπώρ*. The spelling *Shāpūr* is that used by Mr. Thomas.

<sup>2</sup> M. Drouin (*Rev. Num.*, 1895, p. 52, Pl. II, 1-8; quoted by Rapson, *J. R. A. S.*, 1904, p. 678) found what he calls 'the normal legend of Hormazd I' on obv. of similar coins, and on rev., in at least one case, the name *Ardamitra*. The specimens figured by him came from Turkestan; that described by Mr. Rapson from Sīstān. The provenance of the coins now catalogued is not recorded. The legend on No. 1 is not *Ardamitra*.

## No. 8. HORMAZD II, 301-9 A. D.

*Copper**Ormazd type*

1	A.S.B.	Æ 34.2 .63	Bust of king r., with short tied beard; lion's head and mane as crest on front of head-dress, which is surmounted by a flower (? rose) in place of the usual globe. Traces of legend <i>Auharmazdī</i> in front of face.	Fire-altar on broad base, with bust of Ormazd rising from top—his arms extended, r. hand holding royal diadem, and l. hand a spear. Traces of legend (Pl. XXIV, 3).
2	„	Æ 31.8 .62	Bust of king r., with short tied beard; crown or diadem has five pellets, but no lion's head; the usual globe above. Legend in front of face <i>Auharmazdī</i> , behind head <i>malkā</i> , 'King Hormazd.'	Device as on No. 1. Th. (p. 41) reads <i>Avasta mūrta</i> , 'image of Avasta,' or 'Ormazd', but I cannot make out more than <i>astamū</i> (Pl. XXIV, 4). Perhaps the true reading is <i>apasta</i> , 'confidence,' D.
3	„	Æ 22 .6	Bust of king r., with a three-pointed crown; no globe, flower, or lion's head; no trace of legend.	Same device as on Nos. 1 and 2, treated slightly differently; legend illegible; in poor condition.

*Thick, heavy altar type*

4	A.S.B.	Æ 53 .56	Bust of king r.; lion's head on front of head-dress; no legend.	Altar with heavy base and top filling field; symbols on shaft. No legend; rude, polygonal piece (Pl. XXIV, 5).
---	--------	-------------	---	--

<sup>1</sup> Canon Rawlinson describes the foliated branches as 'horns of ibex or stag'.

5	A.S.B.	Æ 49.9 .6	As No. 4.	As No. 4.
6	„	Æ 51.5 .65	Ditto.	Ditto.
7	„	Æ 48 .72	Ditto.	Ditto; in bad condition.
8	„	Æ 59.2 .66	Somewhat similar; lion's scalp indistinct; in legend opposite face <i>na</i> legible.	Altar of different form, filling field; no legend.
9	„	Æ 64 .71	Generally similar.	Altar of same shape as Nos. 3-7.

## No. 9. SHĀPŪR (SAPOR) II, ZU'LAKTĀF, 309-80 A. D.

*Gold*

1	I.M.	A 109.2 .76	Bust of king r.; beard short, with pendant; crown three-pointed, with globe. Legend, beginning in front of face, difficult to read, seems to be <i>Mazdisan bagī Shahrpuhārī malkān malkā</i> , 'The worshipper of Ormazd, divine S., king of kings.'	Broad-topped fire-altar, without attendants, flanked by incense vases, as on coins of Ardeshr I. Marginal legend uncertain; to r. of altar <i>malkā</i> , 'royal' (Pl. XXIV, 6; see L., Pl. VI, 2; Th., <i>Num. Chron.</i> , 1872, p. 273).
2	„	A 109.5 .77	Similar; legend obscure.	Similar; legend marginal only, not read.
3	„	A 112.3 .8	Ditto; ditto.	Ditto; ditto; legend at top (B., Pl. VII, 6).

*Silver*

4	A.S.B.	Æ 63.3 1.0	Similar to gold coins; <i>mazdisan bagī Shā</i> (?) on r. margin.	Roughly designed narrow fire-altar, with indication of bust in flame; on each side an attendant with spear or sceptre, turned towards altar; single line of beading; no legend.
5	I.M.	Æ 62 .9	Similar; legend obscure.	Similar; worn; traces of legend.
6	„	Æ 63.4 .85	Ditto; ditto.	Ditto; ditto; no legend.
7	A.S.B.	Æ 61.3 .95	Ditto; ditto.	Ditto; ditto; ditto.
8	„	Æ — .91	Similar; much worn.	Apparently similar; much defaced.

## No. 11. SHĀPŪR (SAPOR) III, 384-6 A. D.

*Silver*

1	I.M.	Æ 56 1.1	Bust of king r., with flat-topped cap and globe. Legend, <i>mazdisan bagī Shah-pūhārī</i> , in four sections.	Fire-altar with bust and attendants, as on coins of Shāpūr II; no legend.
2	A.S.B.	Æ 62.7 1.02	Similar; worn. Legend, <i>mazdisan bagī Shahpūhārī malkān</i> , in three sections.	Ditto; ditto.

*Copper*

3	I.M.	Æ 48.6 .63	Bust of king, with characteristic flat-topped head-dress, but no globe nor legend.	Altar with broad base and top and symbol on shaft, filling field, as on coins of Hormazd II; no legend (Pl. XXIV, 7).

## No. 12. VARAHRĀN IV (KERMĀN SHĀH), 386-97 A. D.

*Silver*

1	I.M.	Æ 53.1 .93	King's bust r., with a curved plume at back of head-dress. Legend in very clear script, [Va]rahrān malkān ma[l]kā, 'V., king of kings.'	Fire-altar, with head of Ormazd r. in flame; attendants with spears, turned towards altar; no legend.
2	„	Æ 65 1.18	Bust of king r., but with a wing instead of curved plume at back of head-dress. Legend in front of face not read.	Similar, with head r.; in bad condition (apparently this coin must belong to V. IV).
3	„	Æ 65.1 .94	Bust and plume as on No. 1; <i>Varahrān</i> legible.	Similar, but no head in flame; legend illegible.

## No. 13. YEZDEGIRD I (BAZAH-KĀR), 397-417 A. D.

1	I.M.	Æ 58.7 1.1	Bust of king r.; crown small, with globe above and crescent in front; long legend not read. (D. reads <i>mazdaiasn bagī rāmshetri Yazdekerti malkān malkā Airān.</i> )	Fire-altar with attendants turned towards it; <i>rāsti</i> , 'truth,' (Th.; 'good,' D.) on shaft; a 'taurine' symbol on each side of flame, and a plain crescent l. Legend, l. illegible; r. (?) <i>ain</i> , apparently the mint, <b>P. II.</b>
2	„	Æ 60.1 1.2	Generally similar, but face has an Indian look, and the legend before face only, not read.	Generally similar, but without the extra crescent; no legend (attribution doubtful).

## No. 14. VARAHRĀN V (BAHRĀM GÖR), 417-38 A. D.

*Silver*

1	I.M.	Æ 61 1.13	Bust of king r.; two-pointed crown surmounted by crescent containing globe. Legend begins <i>Varahrān</i> (or <i>Valahlān</i> ) <i>mal-kā</i> , rest not read.	Fire-altar with conical flame; head of Ormazd r., inserted in upper part of altar below flame; an attendant on each side with spear presenting arms to altar. Legend, l. <i>Varahrān</i> imperfect; r. <i>Āi</i> (? = Airān) the mint (Th., Pl. VII, 8 same mint; L., Pl. VIII, 5 mint <i>Wah</i> ; B., Pl. XII).
2	„	Æ 65 1.25	Bust of king r.; head-dress a low crown surmounted by globe with wings. Legend, r. (?) <i>Lūr Varahrān</i> ; l. <i>kadi</i> , 'fortunate,' 'victorious Varahrān'; but meaning of <i>Lūr</i> not known.	Altar with three steps no head of Ormazd; attendants with high caps presenting arms; no legend (Pl. XXIV, 8. This coin does not seem to agree with any published).

## No. 15. YEZDEGIRD II, 438-57 A. D.

*Silver*

1	I.M.	Æ 61.4 1.2	Bust of king r.; three-pointed crown surmounted by crescent containing globe. Legend, <i>Rāmshetri</i> (?) <i>Izdakarti</i> . (According to D., the coins with legend <i>rāmshetri Yazdekerti</i> belong to Y. I. <i>Rāmshetri</i> = <i>rāmi kshatra</i> , 'prosperity of the empire.')	Two-stepped altar with conical flame; no Ormazd head; <i>rās</i> [ <i>tī</i> ], 'truth,' or shaft; attendant on each side presenting arms. Legend, l. seems to be <i>nūda</i> , 'nineteen' (scil. regn. year); r. <i>Wah</i> or <i>Vah</i> , initials of a mint-name (See B., Pl. XIII; L., Pl. VIII, 3, 4, erroneously ascribed to Y. I; Th., Pl. V 4; but the legend there is <i>Kadi Izdakarti</i> .)

XVIII, 6, same date and mint; wrongly assigned to Jamasp; L., Pl. IX, 4; Th., Pl. V, 12, 13, wrongly assigned to Hormazd III). <sup>1</sup>
2	I.M.	Æ 63.5 1.0	Bust of king r.; small two-pointed crown, surmounted by crescent containing globe; wide blank margin. Legend, badly executed, <i>Kadi Firūchi</i> , 'King Firoz,' Th. ( <i>Kadi</i> = 'fortunate,' 'victorious,' D.)	Fire-altar, three-stepped; attendants turned towards it, without spears; star l., crescent r. Legend, l., a single large character, apparently <i>ma</i> ; r. <i>Wah</i> or <i>Vah</i> , initial syllable of mint (Pl. XXIV, 9). <sup>2</sup>
3	„	Æ 62.2 1.1	Bust of king r.; small crown surmounted by wings, crescent, and globe, crescent in front; legend not read.	Similar to No. 2. Legend, l. illegible, a date; r. <i>Nah</i> (? = Nahavend), mint.

## No. 19. KOBĀD I, 490-531 A. D.

*Silver*

1	A.S.B.	Æ 60 1.18	Bust of king r.; small head-dress with crescent in front, and crescent, globe, and wings above; two stars and two crescents in field; three crescents enclosing stars on margin. Legend, r., in minute characters, <i>Kūāt</i> ; no l. legend.	Narrow, three-stepped altar with conical flame; attendants rudely indicated; star l., crescent r. Date, l. <i>haf</i> (= <i>hafdah</i> , 17); mint, r. <i>Lad</i> or <i>Rad</i> .
2	I.M.	Æ 57.7 1.18	Similar; worn; only trace of name.	Similar; date, <i>sīzdah</i> , 16; mint, <i>As</i> . (Th., Pl. VI, 3, 5; L., Pl. X, 3 (corrected <i>J. R. A. S.</i> , 1852, p. 407); B., Pl. XVII, and XIX, 16-20).

<sup>1</sup> As Rawlinson points out (*Seventh Or. Mon.*, p. 327), *Rām* was the guardian or tutor (précepteur) of Firōz, not of Hormazd III, as erroneously asserted by Th. (*Sassanians*, p. 67). This being so, it is natural to interpret these coins as issued by *Rām* on behalf of young Firōz, whose father's portrait is given the principal place. The coins assigned by L., Pl. IX, 1, to Hormazd III are Indo-Sassanian of Kābul, and will be described in the next section. No coins of Hormazd III are known.

<sup>2</sup> Indian imitations will be described in the next section.

<sup>1</sup> This curious coinage has been fully described and illustrated by Mr. Thomas in *Ind. Ant.*, vol. viii (1879), p. 269; *Num. Chron.*, 1881, pp. 116-128, Pl. VI, in connexion with the issues of Varahrān Chobīn. When the notice by the same author in Prinsep's *Essays*, ii. 116 was written, the legends had not been completely deciphered. Probably the specimens catalogued come from the hoard found in Kūlū, where coins of Varahrān Chobīn were associated with the Bukharan imitations (*I. A. ut sup.*, p. 270).

#### POSTSCRIPT.

When writing the catalogue I overlooked two important papers by the late M. Drouin, namely, 'Histoire de l'Épigraphie Sassanide' (Aperçu sommaire; mémoire lu à la section Iranienne du Congrès des Orientalistes tenu à Paris en Septembre 1897); and 'Les Légendes des Monnaies Sassanides' (*Revue Archéologique*, 1898). The former gives a full bibliography of all publications on Sassanian matters, including the coins. The latter gives amended readings of all the coin legends. The more important corrections have been inserted in the proofs. M. Drouin describes Mordtmann's memoir in *Z. D. M. G.* for 1854 as 'un vaste travail d'ensemble qui a servi de base à tous les ouvrages postérieurs sur la matière'. Subsequent papers by Mordtmann appeared in 1857, 1865, 1879 and 1880. The memoir published in 1879 is a complete treatise on the numismatic history of the Arab Governors of Persia, while the posthumous memoir of 1880 brings the earlier essays up to date. According to M. Drouin, the essays of Mordtmann, combined with the plates of Bartholomaei, should be used still as the basis of all Sassanian studies. The only published catalogue of Sassanian coins is that by M. A. de Markoff (1889), describing about 500 coins of the Sassanian series in the cabinet of the *Institut des Langues Orientales* at St. Petersburg.

## SECTION XIII

# MEDIAEVAL INDO-SASSANIAN COINS, INCLUDING THOSE OF THE WHITE HUNS

## INTRODUCTION

THE heterogeneous coins grouped together in this Section belong to widely separated localities, and probably extend over a period of six centuries, from about 500 to 1100 A.D. Few of them can be assigned with confidence to any particular kingdom or ruler; in fact, the only certain assignments to rulers of known date and place are those of the better *Ādi-varāha* coins to Bhojadeva I, king of Kanauj from about 840–90 A.D., and of certain White Hun pieces to Toramāṇa and Mihiragula, between 490 and 540 A.D. A morphological classification has, therefore, been found convenient, the bond of union being the common descent of the whole group from the Sassanian coinage described in the last section. Regarded in this light, these barbarous coins are interesting as examples of numismatic degradation.

The note in the catalogue gives full references concerning the coin of Vāhi-(*al.* Shāhi)-tigīn, who was probably a king of Multān about 500 A.D. The next coin catalogued certainly bears the name of King Napkī in Pahlavī. The five coins assigned to Napkī are all very much alike, but Nos. 2 and 3 replace the ordinary Pahlavī *Nā* by a peculiar character. The provenance indicates that Napkī ruled at Kābul, and he may be assigned doubtfully to the fifth century. The note in the catalogue gives the necessary references. The 'solar type' coins with the legend *Tora* in bold Brahmi script may be attributed with confidence to the Toramāṇa, a White Hun or Ephthalite chief, who led his horde into India about 490 A.D., and was succeeded in his Indian dominions about 510 A.D. by his son Mihiragula or Mihirakula. The 'bull type' coins which bear the name of the latter certainly belong to the son of Toramāṇa, and often are restruck on the coins of that prince. Dr. Fleet has shown recently that Siālkōṭ in the Panjāb represents Sākala, the Indian capital of Mihiragula.<sup>1</sup> The White Huns

<sup>1</sup> 'Sagala, Sakala, the City of Milinda and Mihirakula' (*Actes du XIV<sup>e</sup> Congrès Intern. des Or.*, t. I, 1905).

issued no coinage with types of their own, being content with barbarous imitations of the coins of the countries which they overran during the fifth and sixth centuries. Many of the White Hun coins are anonymous, but are distinguished by a peculiar mark, which Cunningham named the 'Ephthalite symbol' (see Pl. XXV, 6, 7).

The base silver coinage imitating the later issues of Firōz, the Sassanian king killed by the Ephthalites or White Huns in 488 A. D., probably was struck first by Toramāṇa at the close of the fifth century, but still more degraded copies continued to be issued much longer (Pl. XXV, 8-17).

This class of coins comes, so far as is recorded, chiefly from Rājputāna. The eastern or Magadha type (Pl. XXV, 10) preserves very faint recollections of either the Sassanian head or the fire-altar, although both may be traced on the better specimens. The pieces which bear the legend *Śrī Vi* or *Śrī Vighra* may be assigned with almost positive certainty to one or other of the kings of Magadha named Vighraha-pāla. The least barbarous specimens seem to have been issued by the first king of that name, about 900 A. D. The wholly corrupt copies may be as late as the time of Vighraha-pāla III, in the middle of the eleventh century.

The curious coinage known by the popular name Gadhaiyā, or Gadhiyā, of uncertain derivation, seems at first sight to have no intelligible device. But study of extensive series convinced numismatists long ago that the apparently meaningless marks are simply extreme degradations of the ancient Sassanian type (Pl. XXV, 11-17). A few of the later coins are inscribed (Pl. XXV, 15, 16), but I have not been able to make sense of the legend on the specimens catalogued, which seems to give a name beginning with *Kā*. Professor Rapson has shown (*J. R. A. S.*, 1900, p. 122) that certain coins of this kind, bearing the name of Chittarāja, were issued by a member of the Śilāhāra dynasty of the Northern Konkan on the Bombay coast between 1020 and 1060 A. D. The inscribed pieces now published may be of nearly the same date. Similar coins are sometimes found in Mewār (Webb, *Currencies of the Hindu States of Rājputāna*, pp. 4-6). The comparatively modern coin, No. 24, is interesting as proving the late survival of a dim recollection of the Sassanian prototype. Webb cites the 'Dhīnglā paisā', which is still current in Rājputāna, as a still stronger illustration of the same fact.

The true assignment of the abundant *Ādi-varāha*, or 'primaeval boar', coins was first effected by Professor Hultzsch, who showed that they were issued by the powerful king, Bhojadeva I, who ruled in Northern India, with his capital at Kanauj, from about 840 to 890 A. D.,

and took the title of *Ādi-varāha*, thus identifying himself with the 'boar incarnation' of Viṣṇu. Rude copies of this class of coin probably belong to the eleventh or twelfth century.

I am unable to say anything definite about the four coins grouped together as 'Unknown'. No. 1 (Pl. XXV, 19) is a variety of the Napkī coins of Kābul. No. 3 (Pl. XXV, 20), exhibiting a Bactrian camel and fire-altar, may or may not be Indian; it does not seem to belong to the Sassanian coinage of Persia.

In addition to the references already given, the following publications may be consulted:—Cunningham, 'The Later Indo-Scythians' (*Num. Chron.*, 1894); V. A. VĀHI- (*al.* SHĀHI)-TIGĪN PROBABLY KING OF MULTĀN, ABOUT 500 A. D.

### Silver

1	I.M.	Æ 50 1.17	Bust of king, showing three-quarterfacer., beardless, with moustache; low crown or cap, surmounted by tiger's head r., and three points ( <i>triśūl</i> ) in front and also behind. Unknown characters (Irano-Scythic) in field before face. Br. legend in broad margin, the most probable reading of which on this specimen is श्री हितिविरलाध (? व or च) परमेश्वर श्री वाहि तिगीन देवनारित, 'Śrī hitivirai-ralādha (? va, ? cha) paramēśvara śrī Vāhi tigīn devanārīta (?)'; giving the titles of a king Vāhi, with the Turkish rank of <i>tigin</i> .	Bust of deity facing, wearing crown; head surrounded by flames rising to a point; in broad margin, two circles below, and at top and sides crescents enclosing stars, as on coins of Jamasp. Well-engraved Pahlavi legends as read by Th.; 1. <i>Saf tansaf tef</i> , سف تنسف تيف, probably meaning Śrī Tansaf deva, the name of the deity, supposed to be the Sun-god of Multān; r. (?) <i>Ṭarkhān Khurāsān malkā</i> , طرخان خراسان ملكا; but the first word is doubtful. The second and third words meaning 'king of Khurāsān' are certain <sup>1</sup> (Pl. XXV, 1).

## NAPKĪ, A (?) KUSHĀN) KING OF KĀBUL IN (?) FIFTH OR SIXTH CENTURY

*Silver*

1	A.S.B.	Æ 52.8 1.03	Bust of king r., with features rather Indian than Persian; ear-ring with two drops; winged head-dress with crescent over forehead; above, buffalo's head with wide horns, facing. P. legend in peculiar script, <i>Napkī malik</i> , 'King Napkī,' before face, and P. <i>sha</i> behind head.	Elongated two-stepped fire-altar; the attendant with spear on each side turned towards altar; above the head of each a wheel; no distinct legend, except Br. <i>la</i> in l. field (Pl. XXV, 2).
2	„	Æ 59.8 1.12	Similar; P. <i>sha</i> l. behind head; (?) <i>kī malik</i> r. before face. Br. <i>ha</i> in l. field over shoulder.	Similar; Br. <i>ha</i> in l. field (Pl. XXV, 3).
3	I.M.	Æ 52 1.02	Similar; P. legends as No. 2; (?) Br. <i>na</i> behind shoulder.	Similar.

*Copper*

4	A.S.B.	Æ 48.9 1.02	Similar to silver coins; P. legends, <i>pkī malik</i> and <i>sha</i> ; no Br. letter.	Similar.
5	„	Æ 36.1 1.0	Ditto; poor. Legend, <i>Napkī malik</i> complete; no detached letters.	Ditto; much defaced. <sup>1</sup>

## TORAMĀṆA, ABOUT 500 A. D.

*Solar type*

1	I.M.	Æ 47.3 .8	Rude copy of Sassanian bust., without conspicuous head-dress; Br. <i>bra</i> before face.	Horizontal line across middle of coin; solar wheel above; Br. <i>Tora</i> in large letters below (Pl. XXV, 4).
---	------	--------------	---	--

not believe that the word *Airān* occurs in the Br. legend. See Prinsep's *Essays*, ii. 110; *J. R. A. S.*, xii (1850), p. 344; *Reports*, v. 121; *Num. Chron.*, 1894, p. 291; *I. C.*, sec. 109; Drouin in *Revue Num.*, 1898, p. 189. The reading and meaning of the Br. legend still remain obscure, the characters being imperfectly formed, and varying much in different specimens. Compare *ante*, Section IV, Kushano-Sassanian coins.

<sup>1</sup> These specimens probably are all from Masson's collection made at Beghrām near Kābul, where the type, especially in copper, was of 'frequent occurrence'. Erroneously referred to Hormazd III by Longpérier (p. 59, Pl. IX, 1) with whom Rawlinson (*Seventh Great Or. Mon.*, p. 327) was inclined to agree; but neither author was aware of the Kābul provenance (Prinsep's *Essays*, vol. i, pp. 404, 410, Pl. XXXIII, 8), while both misread the legend. See Cunningham, *Num. Chron.*, 1894, Pl. X (XII), 3, p. 288; and compare the Kushano-Sassanian coins *ante* in section iv, and *post*, in this section, Unknown, No. 1.

MIHIRAKULA (MIHIRAGULA), SON OF TORAMĀNA,  
ABOUT 510-40 A. D.

*Bull type*

1	I.M.	Æ 56.3 .7	Sassanian bust r.; Br. legend before face <i>Śrī Mihirakula</i> , or <i>-gula</i> , the last two characters blurred.	Horizontal line across middle of coin; humped bull walking l. above. Br. legend below, <i>jayatu vṛisha</i> , 'May the bull be victorious' (Pl. XXV, 5).
2	„	Æ 37.7 .7	Similar; legend imperfect, apparently restruck on another.	Similar.
3	„	Æ 60 .86	Similar; legend defaced.	Ditto.
4	„	Æ 45.8 .7	Ditto; <i>Śrī Mihira</i> .	Ditto; legend indistinct.
5	„	Æ 51 .67	Ditto; <i>Śrī Mihiraku</i> .	Ditto; ditto; crescent above bull; dividing line near bottom of coin.
6	„	Æ 42.2 .7	Ditto; <i>Śrī Mihiraku</i> .	Ditto; legend complete; crescent above bull.
7	„	Æ 37.5 .7	Similar; <i>Śrī Mihira</i> legible; device blurred, due apparently to attempt to strike bust over Toramāna's wheel.	Bull l.; legend illegible.
8	„	Æ 51 .8	Sassanian bust r., with wheel above; traces of legend in front of face.	Blurred attempt to strike the bull over Sassanian bust, the ends of the diadem being still visible.
9	„	Æ 38.6 .68	Very rude Sassanian bust r. Legend, <i>Śrī Mihirakula</i> (or <i>-gula</i> ) imperfect.	Bull l. with off foreleg raised. Legend, <i>jayatu vṛisha</i> . <sup>1</sup>

<sup>1</sup> This coin is cast, and, like Nos. 5 and 6, is roughly square in form, although partially rounded.

## SECTION XIV

# THE HINDU KINGS OF OHIND

COMMONLY CALLED 'KINGS OF KĀBUL', FROM ABOUT

875 A. D. TO 1000 A. D.

## INTRODUCTION

THE coins of the princes commonly called the 'Hindu Kings of Kābul', although long familiar to numismatists, and extremely common in Afghanistan, the Panjāb, and throughout Northern India, present a puzzle, or rather a series of puzzles, which nobody has succeeded in solving completely. They occur in three types, namely, the 'bull and horseman', 'elephant and lion', and 'lion and peacock'. The last named is known only from a single specimen in the British Museum (weight 30·3 grains, Bayley, No. 1), which bears the name श्री कमर, *Śrī Kamara*, over the lion, an heraldic-looking beast turned l., with its tail curved over its back. In form the lion on that coin closely resembles the animal depicted on the 'elephant and lion' pieces, which is turned r. These 'elephant and lion' coins belong to three reigns, namely, Śrī Padama (weight 33, Bayley, No. 2), Śrī Vakka-deva, and Śrī Sāmanta-deva, and occur in copper only. The Śrī Padama coin seems to be unique, whereas the coins of Vakka-deva and Sāmanta-deva, especially the latter, are common. The 'bull and horseman' type was issued in both silver and copper. The coins of this type bearing the name or title Sāmanta-deva are extremely abundant in both metals; those of Spalapati-deva, also in both metals, although less abundant, are fairly common<sup>1</sup>; while those of Khudavayaka, in silver only, are rare; those of Bhīm-deva, likewise in silver only, are very rare; and a copper coin of Vakka-deva is believed to be unique.

The name which I read as *Vakka* has been read as *Varka* (Bayley), *Verka* (Thomas), *Veñka* (Cunningham), or *Vaṅka* (Rodgers)<sup>2</sup>. In the labels on the *A. S. B.* coins Mr. Rodgers read *Vakka* as I do.

<sup>1</sup> A coin, either of Sāmanta-deva or Spalapati, when analysed, was found to contain 894·6 silver; the balance being copper, with a trace of gold (*Proc. A. S. B.*, 1889, p. 198).  
1000

<sup>2</sup> The readings *Varka* or *Verka* cannot be supported. If the upper part of the conjunct character were the guttural *ṅ*, it should be a rectangle open to the r. The coins catalogued have not the *ṅ* which Cunningham detected on his specimens.

The name which seems to me to be *Khudavayaka* has been read as *Khvadavayaka* (Bayley and Rodgers), *Khuduvayaka* (Stein), and *Khamarayaka* (Cunningham)<sup>1</sup>. Cunningham appears to be right in reading Spalapati rather than Syālapati or Syalapati.

The arrangement of these various kings in proper order is extremely difficult, and, in fact, impossible at present. Alberūnī (1031 A.D.) informs us that the last king of the ancient Turkī (or Kushān) dynasty of Kābul named Lagatūrmān was supplanted by his Brahman minister Kallar, who founded a 'Hindu Shahiya' dynasty, comprising Sāmānd (=Sāmanta-deva), Kamalū (probably=Kamara), Bhīma (=Bhīm-deva), Jaipāl (Jayapāla), Ānandapāla, and Tarojanapāla (=Trilochana-pāla). The last named died in 412 A.H. (=April 1021–April 1022 A.D.), and his son Bhīmapāla perished five years later. The Kashmīr chronicle tells of unsuccessful warfare waged by King Śamkara-varman of Kashmīr (883–901 A.D.) against a Śāhi (=Shahiya) king named Lalliya of Udabhāṇḍapura (Ohind). The title of Shāhi (Shahiya, Śāhi) was taken over by the Brahman kings of the Panjāb from their Turkī predecessors, who held both Kābul and the Panjāb, and the date indicates that Lalliya must have been the earliest of the dynasty, who is called Kallar by Alberūnī. Thomas and Cunningham further identify Kallar with the Spalapati-deva of the coins, but there is no conclusive evidence to support this hypothesis. Cunningham seems to have sufficient reason for interpreting *Spalapati* as a Sanskritized form of a Persian title meaning 'military commander'. Sāmanta has the same signification in Sanskrit, and a doubt is thus suggested as to how far these names on the coins should be interpreted as being personal. Kamara and Bhimadeva of the rare coins (not included in this catalogue) evidently correspond respectively with Kamalū and Bhīm of Alberūnī; but Padama, Vakka, and Khuduvayaka cannot be fitted into his list with certainty. Although Sāmanta-deva obviously is the same as Sāmānd, Spalapati remains unaccounted for; and, as remarked above, the words *Sāmanta* and *Spalapati* having the same meaning, may both refer to a single person. The matter is further complicated by the continued use of *Sāmanta* as a title on both Indian and Muhammadan coins long after the time of Alberūnī's Sāmānd.

The rare coins of Aśata-pāla (Pl. XXVI, 6) seem to be the latest of the series, if, indeed, they are included rightly in it. The connexion of Aśata-pāla with the Hindu Shāhi dynasty is by no means clear, and it is evident that if he is to be assigned to it, his place must be found among the rulers with names ending in *pāla* about 1000 A.D., and not among the Sāmanta-deva series, which terminated about 950 A.D. It is not

<sup>1</sup> Cunningham's reading appears indefensible to me. It is better to read *Khu* than *Khu*.

unlikely, in spite of the slight difference in the spelling of the name, that the coins of *Āsata-pāla* should be ascribed to *Āsaṭa*, the chief of *Chambā* (*Champā*), who did homage to *Kalaśa*, king of *Kashmīr* in 1087–8 A. D. (*Rājat.*, Bk. VII, 588, Stein's transl. vol. i, p. 315).

Although the 'Hindu Shahiya' dynasty is described by *Alberūnī* as having succeeded the old *Turkī* (*Kushān*) dynasty of *Kābul*, this statement should not be interpreted as meaning that *Kābul* was the capital of the *Shahiyas*. As a matter of fact, their capital was *Ohind* (*Und*, *Waihind*, *Udabhāṇḍapura*) on the *Indus* above *Attock* (*Atak*), while *Kābul* during their time was in the hands of the *Musulmans*, having been captured by *Yā'qūb Lais* in 257 A. H. (= Nov. 870–Nov. 871 A. D.). It is most improbable that the *Shahiyas* had anything to do with that city. While the Arabic author was quite correct in affirming that the *Shahiyas* were the successors of the *Turkī* dynasty of *Kābul*, he must not be understood to assert that the succession extended to the whole dominions of the older dynasty, which had included both *Kābul* and the *Panjāb*. When the change of dynasty occurred, *Kābul* probably was already in the hands of the foreign invader, and the new royal family had to be content with possessions lying outside the immediate range of the armies of *Islām*. At *Ohind* the *Shahiya* kings were in safety for a considerable time, until about 1013 A. D., when the last of them to enjoy power, *Trilochana-pāla*, was defeated decisively by *Mahmūd* of *Ghaznī* on the bank of the *Taushī* (*Tosi*) river on the southern frontier of *Kashmīr*. The members of the family enjoyed a high reputation and won the admiration of the *Muhammadan* savant in their conqueror's train, who generously observes, 'We must say that, in all their grandeur, they never slackened in the ardent desire of doing that which is good and right,—that they were men of noble sentiment and noble bearing.'

Certain coins of *Sāmanta-deva* and *Spalapati* exhibit on the horseman side figures 'written in numerals of a form intermediate between those of the mediaeval Indian mints and the modern Arabic forms . . . graduating into the latter'. They are read as 802, 812, 813, 814, 815, and 817 (Pl. XXVI), and I believe that they must be interpreted as dates expressed in the *Śaka* era, equivalent to years ranging from 880 to 895 A. D.<sup>1</sup> The fact that the same dates, if they are dates, occur on the coins of both *Sāmanta-deva* and *Spalapati* supports the suggestion that both those titles may have been used by one king, the *Kallar* of *Alberūnī*, and the *Lalliya* of the *Kashmir* chronicle. Possibly the difficulty may be explained by the hypothesis that the coins with the Persian title were struck at mints situated in the territory west of

<sup>1</sup> Certain marks on some coins of *Spalapati* (catal. Nos. 2, 6) look like the old Indian 'numerical symbol' for 200.

the Indus, which formerly was included in the Persian empire, while those with the Sanskrit title were issued in the Panjāb. The evidence concerning the *provenance* of the coins is not sufficiently precise to enable this conjecture to be tested.

The principal references are:—*C. M. I.*, pp. 55–67, Pl. VII; Stein, *Zur Geschichte der Gāhis von Kābul* (Stuttgart, Kohlmann, 1893); transl. *Rājat.*, vol. ii, note J, with detailed references; Bayley, 'Remarks on certain Dates occurring on the Coins of the Hindu Kings of Kabul' (*Num. Chron.*, vol. ii, 3rd ser. (1882), p. 128, with two plates); Elliot, *History of India*, vol. ii, note A, p. 403; Thomas, *Prinsep's Essays*, vol. i, pp. 299–318, Pl. XXV; *Chronicles of the Pathān Kings of Delhi*, p. 57; and Sachau, transl. of Alberūnī's *Indica*, vol. ii, p. 13.

Among these works Stein's German pamphlet offers the best summary of the history. The writings of Bayley and Cunningham include much rather fanciful speculation, and at this time it is hardly necessary to observe that Bayley's ingenious attempt to interpret the supposed dates as referring to the Gupta era is quite untenable.

## SECTION XV

# THE MEDIAEVAL DYNASTIES OF CENTRAL INDIA

## INTRODUCTION

THE three dynasties whose coinage is treated in this section were closely connected in place, time, and history. The most northerly kingdom, that of the Chandēllas, was equivalent roughly to the modern Bundēlkhāṇḍ. Its capital was Mahoba, still existing as a town in the south of the Hamirpur District, and the Rājās also held Kālanjar, Ajaigarh, and other strong places. The dynasty was founded about the end of the ninth or the beginning of the tenth century, and had attained considerable power at the time of the accession of Kirtivarma-deva, about 1060 A. D. The coinage begins with this prince, who copied the issues of Gāṅgeya-deva Vikramāditya of Western Chedi (about 1015–40 A. D.). The dynastic list, so far as it is relevant to this work, is as follows, with the known epigraphic dates A. D. :—

13. Kirtivarman, 1098.
14. Sallakshavarman (Hallakshana).
15. Jayavarman, 1117.
17. Madanavarman, 1129–62.
20. Paramardin, 1167–1201.
21. Trailokyavarman (or -malla), 1212–41.
22. Viravarman, 1261–86.

(Nos. 16, 18, 19 in the genealogy did not reign.)

The Kalachuri or Haihaya dynasty of Western Chedi, which had its capital at Tripuri (Tewar) near Jabalpur (Jubbulpore, Central Provinces), to the south of the Narbadā, was nearly synchronous with the Chandēllas, its history extending from 900 to 1200 A. D. in round numbers. Out of the fifteen names in the genealogy, one alone, that of Gāṅgeya-deva Vikramāditya, who reigned from about 1015 to 1040 A. D., concerns the numismatist, for no coins are known which can be attributed to any of the other Rājās. The coins of Gāṅgeya are fairly common in the eastern districts of the United Provinces, and

there is reason to believe that in 1019 A.D. he had extended his authority even to Champāran in Tīrhūt. He initiated the type of coinage which was copied by the Chandēlla and other dynasties.

The kingdom of Eastern Chedi or Dāhāla, the valley of the Mahānadi, was roughly equivalent to the modern Chhattīsgarh Division of the Central Provinces, with Ratnapura (Ratanpur) as its capital. The Rājās, like those of Western Chedi, belonged to the Kalachuri or Haihaya clan of Kshatriyas or Rājapūts. Their history falls within the limits of 1000 and 1200 A.D. The relevant portion of the dynastic list, with the known epigraphic dates, is as follows :—

3. Ratnarāja I.
4. Prithvīdeva I.
5. Jājalla I, 1114.
6. Ratnadeva II.
7. Prithvīdeva II, 1141–58.
8. Jājalla II, 1167.
9. Ratnadeva III, 1181.

The repetition of names causes difficulty in assigning the coins. Those catalogued probably belong to Nos. 7–9, but they might be assigned to the earlier homonymous Rājās.

The dynastic lists referred to for all three dynasties are those recently prepared from inscriptions by Professor Kielhorn (*Ep. Ind.*, vol. viii, App. I), which supersede all earlier lists.

The design of Gāṅgeya-deva's model coinage is very simple. The obverse is wholly occupied by the Rājā's name in bold characters, not differing very much from modern Nāgarī. The reverse type is a rudely executed figure of a goddess seated cross-legged. The Chandēlla gold coins are exactly the same in appearance, the names only being changed. The cabinets catalogued do not include any specimen of the rare Chandēlla copper coinage, which substitutes Hanumān for the goddess. The obverse of the Eastern Chedi or Ratnapura coinage resembles that of Gāṅgeya-deva and the Chandēllas, with the necessary changes of names, but on the reverse an indistinct figure of a rampant lion to the right takes the place of the goddess. The large gold coins were known by the name of *dramma*, and are struck to the Greek drachma standard. The smaller sizes are fractional parts of a *dramma*. Two examples of coins of Gāṅgeya-deva weighing 7 grains each ( $\frac{1}{4}$ th *dramma*) are known; and No. 9 in this catalogue weighs only 5·6 grains, although in fair condition.<sup>1</sup> The copper coins follow the same scale of weights, as also do the rare coins supposed to be silver.

<sup>1</sup> Various kinds of *drammas* are mentioned in the great Siyadonī inscription of the tenth century A.D. (*Ep. Ind.*, i. 168). The late survival of the Greek name and weight standard is interesting.

But I am not certain that any of these dynasties really struck a silver coinage. Much of their gold is so largely alloyed with silver as to be distinguishable with difficulty from coins intended to be of that metal, and it is possible that all the pieces which seem at first sight to be silver were regarded officially as being gold.

A. S. B.*, 1893, p. 92). Examples of the coinage of all the three Rājās have been found also at Dūdhī in the south of the Mirzāpur District, U. P., and some of the specimens may come from that find.

## SECTION XVI

# THE MEDIAEVAL DYNASTIES OF NORTHERN INDIA

## INTRODUCTION

THE group of Rājput dynasties dealt with in this section occupied various parts of Upper India during the period extending from about the middle of the tenth century to the Muhammadan conquest in the twelfth and thirteenth centuries. The intricate history of these dynasties, for which considerable materials exist, remains to be written; but the observations in this place must be restricted to those indispensable for a student of the coins.

The earliest dynasty of the group is that established by the Tomara Rājās of Ajmīr and Delhi, founded, according to tradition, in the eighth century, but not authentically known until the tenth. Cunningham gives the following list of Rājās and approximate dates<sup>1</sup> :—

- |                         |           |               |
|-------------------------|-----------|---------------|
| 1. Sallakṣhaṇapāla-deva | . . . . . | 978-1003 A.D. |
| 2. Ajayapāla-deva       | . . . . . | 1003-1019 "   |
| 3. Kumārapāla-deva      | . . . . . | 1019-1049 "   |
| 4. Anangapāla-deva      | . . . . . | 1049-1079 "   |
| 5. Mahipāla             | . . . . . | 1103-1128 "   |

The coinage of Ajaya-pāla, No. 2, although common in Rājputāna, is not represented in the cabinets catalogued, but specimens of the coins of the other four Rājās are included. The Tomara princes all followed one or other of two numismatic models—either the coinage initiated by Gāṅgeya-deva of Chedi (*ante*, p. 251), or the 'bull and horseman' type of the kings of Ohind (*ante*, p. 243). Cunningham has shown that Mahipāla, No. 5, adopted both types of coinage, and that his example was followed by the Musalman conqueror, Muhammad bin Sām, or Shihāb-ud-dīn, in the coins which he struck in imitation of Hindu patterns. The known coins of Kumāra-pāla, which are scarce, occur in gold only, more or less base, and of the Gāṅgeya-deva type. Sallakṣhaṇa-pāla and Ananga-pāla seem to have issued nothing but 'bull

<sup>1</sup> The dates are open to doubt, and the history of the dynasty generally requires discussion. I am not certain that the Rājās held Kanauj.

and horseman' coins. The gold coins of Kumāra-pāla, like the prototype issues of Gāṅgeya-deva, are *drammas* or drachmae. The 'bull and horseman' coins appear to be composed usually of billon, a mixture of silver and copper, varying so much in composition as to range from fairly good silver to nearly pure copper. Some of the pieces may be classed as silver. They are mentioned by Muhammadan historians as '*Dilli-wāls*' or 'Delhi coinage', but their Hindu name is not known. The weight of the 'bull and horseman' series seems to have been intended to harmonize with that of the ancient *purāṇa* or 'punch-marked' coin of 32 *ratis*, about 58 grains.

The epigraphic material for the history of the second dynasty, the Gahaṛwār or Rāthōr house of Kanauj, is extensive. Here it will suffice to note that Chandra-deva acquired the sovereignty over Kanauj in the latter part of the eleventh century; and that his grandson, Govinda-chandra, whose known dates range from 1114 to 1154 A. D., became temporarily the paramount sovereign of a large part of northern India. The gold *dramma* coins of this king, often in extremely base metal, are abundant. Eight hundred of them were found in 1887 near Nānpārā in the Bahraich District, Oudh, during the construction of the Bengal and North-Western Railway. His copper coinage, of the same type, is scarce.

Madana-pāla, father of Govinda-chandra, issued only 'bull and horseman' coins, most of which seem to be billon, although No. 1 may be classed as silver. Professor Kielhorn (*Ep. Ind.*, viii, App. I) gives the dynastic list and known epigraphic dates as follows :—

1. Yaśovigraha.	
2. Mahichandra.	
3. Chandradeva . . . . .	1097 A. D.
4. Madanapāla . . . . .	1104-9 A. D.
5. Govindachandra . . . . .	1114-54 A. D.
6. Vijayachandra . . . . .	1168, 1169 A. D.
7. Jayachandra . . . . .	1170-87 A. D.

The third dynasty, that of the Chauhāns (Chāhamānas) of Ajmīr, Delhi, and Śākambharī (Sāmbhar), came to an end with the celebrated Prithvī Rājā, or Pirthirāj, who had vanquished the Chandēlla Rājā Paramardi (Parmāl) in 1182 A. D., and was himself defeated and executed by Shihāb-ud-dīn in 1193. The coins of Prithvī Rājā and his father Someśvara are all of the 'bull and horseman' type. A full dynastic and genealogical list of the family will be found in Professor Kielhorn's work above cited.

The fourth dynasty had its principal seat at Narwar, not far from Gwālior. The two princes whose coins are catalogued, Malaya-varman

and Chāhaḍa-deva, ruled from about 1220 to 1260 A.D. The latter, who is described by a Muhammadan historian as 'the greatest of the chiefs of Hindustan', was defeated by Ulūgh Khān (Balban) in 1251 A.D. The coins of both Malaya-varman and Chāhaḍa-deva are of the 'bull and horseman' type, and some are dated.

A few coins of the same type cannot be assigned definitely to any particular ruler or locality. The legends on No. 1 of Pīpala are perfectly clear, but the identity of the Rājā so named is uncertain. He may be the Pīpala-deva, a chief at Māchārī in the Alwar State, Rājputāna, who seems to be mentioned in line 10 of an inscription (*Reports*, vi. 79, Pl. XI). The reverse legend is *Kutāmāna Śrī Sāmanta-deva*, in which the meaning of the first word is unknown. The title *Sāmanta-deva* recurs on most of the 'bull and horseman' coins, having been borrowed with the device from the Ohind series. Cunningham had three specimens of Pīpala.

The name read by Thomas and Cunningham as *Killi* possibly may be *Kirti*. The name doubtfully read as *Pithi* may be a form of Pṛithvī. The coin with *Śrī Hamīrah* on the obv. (horseman) side, and a strange legend on the rev. (bull) side seems to be the same as *C. M. I.*, No. 22, p. 88, on which Cunningham read doubtfully *mau + Śrī Uvāme*, which cannot be right (Pl. XXVI, 23). He considered his specimen to be unique. The debased little coin with the legend सोनदेव, *Sona-deva*, and mere indications of the horseman, evidently is of late date. The last coin catalogued, which has a peculiar horseman on one side and the other side wholly occupied by large, late characters, puzzles me. The rude copper coins with Śiva and bull on the obverse, and the monogram reading *Kota*, or another read as *Śruta*, *Ghuta*, or *Ata*, or sometimes a trident and other marks on the reverse, are common in the Delhi bazaar and in the Eastern Panjāb. They are copied obviously from the money of Vāsudeva Kushān, and some of the reverse devices may be an echo of the Sassanian type. Nobody can determine their exact date or who struck them. Cunningham believed that they formed 'the common copper currency of the Panjāb and Rājputāna between A. D. 500 and 800'.

The best account of the coins treated in this Section is that in *C. M. I.*, pp. 48, 52, 80-93, Pl. VI, IX. The earlier discussion of the 'bull and horseman' series by Thomas in *Chronicles of the Pathān Kings*, pp. 58-75, must be used with caution, as it contains some serious errors, of which the principal is the assignment of Sallakshana-pāla and Madanapāla to the Chandēlla dynasty. This mistake, repeated in *Proc. A. S. B.*, p. 127, was corrected *ibid.*, 1900, p. 205.

## SECTION XVII

# THE HINDU COINAGE OF KASHMĪR

## INTRODUCTION

THE ample discussion and illustration of the ancient Kashmīr coinage by Sir Alexander Cunningham (*C. M. I.*, pp. 25-46, Pl. III-V) and Dr. Stein (*Num. Chron.*, 1899, with a plate; transl. *Rājat.*, vol. ii, note H) render unnecessary any lengthy dissertation in this place. From the accession of Śankaravarman in 883 A.D., the chronology is clear and certain, but the dates of the few earlier kings whose coins are represented in the following catalogue are quite unsettled. Kalhaṇa's chronicle, the *Rājataranginī*, records that an ancient king named Narendrāditya also bore the name of Khinkhila. The little coin with the legend *Khīngi* may or may not be his, and, if it is, the materials for determining its date with any approach to exactness do not exist.

The coins inscribed with the name of Toramāṇa, either in full or in an abbreviated form, seem to date from the sixth century, that is to say, the earliest of them may be ascribed to that period. But 'Toramāṇas' continued in circulation until the fifteenth century, and it is clear, as Dr. Stein observes, that such pieces were struck, 'not only by the king who bore this name, but by a succession of rulers after him.' I cannot pretend to distinguish the imitations from the originals. Nor is it at all certain who Toramāṇa was. Dr. Stein probably is right in believing that he is to be identified with the prince so called, who 'put in circulation coins struck in his own name' during the lifetime of his brother, king Hiranya. But we do not know when king Hiranya lived. In Section XIII, *ante*, coins of a Toramāṇa have been described which undoubtedly must be attributed to the White Hun chief, the son of Mihirakula. It is an open question whether or not the Toramāṇa of the Kashmīr chronicle is identical with that chief.

Dr. Stein's identification of Pratāpa of the coins with Pratāpāditya II, or Durlabhaka, who was reigning in 700 A.D., is highly probable, if not quite certain.

The fixation in time and place of the king Yaśovarman, who struck rude coins in the style of the early Kashmīr rulers, has long been a matter

of dispute, and the problem has not been solved yet. The name does not occur in the Kashmīr lists. The correct reading appears to be *Yaśovarman*, not *Yaśodharma*; and it is, therefore, unlikely that Dr. Hoernle's conjecture can be correct that the coins were struck by Yaśodharman, *alias* Vishṇuvardhana, who defeated Mihirakula in or about 528 A.D. The coins are so barbarous that it is impossible to fix their date by their style. They are found, I think, chiefly in the Panjāb—one was deposited in the Mānikyala *stūpa*—and there are difficulties consequently, in identifying the prince who issued the coins with Yaśovarman of Kanauj whom Lalitāditya of Kanauj defeated between 730 and 740 A.D.; but no better specific suggestion is available. I am inclined to believe that the coins were struck by an unrecorded Rājā either in the Panjāb or Kashmīr during the sixth or seventh century.

The similar, but, perhaps, still ruder coins with the legend *Vinayāditya* are assigned rightly to Jayāpīḍa of Kashmīr (about 750–80 A.D.), who assumed that title. The similar coins on which Cunningham read the legend *Śrī Vighraha* are of the same rude type, and of approximately the same period, but there is no record of any Kashmīr prince of that name. Dr. Stein reads the legend as *Viśramśadeva*, but on the specimens which I have seen Cunningham's reading seems preferable.

From the time of Śankaravarman (883–902 A.D.) onwards, the chronology being certain, no difficulty occurs in the attribution of the coins. The series catalogued is very poor and incomplete, most of the rarer kinds being absent. The type of all the coins without exception<sup>1</sup> is derived from the standard Kushān type, with the standing king on the obverse and the seated goddess on the reverse. The coins of Pratāpāditya, Vinayāditya, Yaśovarman, and Vighraha present the type in an extremely debased, almost unrecognizable form, executed boldly in high relief, and the material often is an alloy intended apparently to pass as base gold. But some of the coins seem to be honest copper or bronze. The coins of this class in the catalogue range in weight from 83.8 to 123.5 grains, and their mean diameter is about .85 inch. The long series beginning with Śankaravarman presents the same Kushān type in a different form, which is characteristic of Kashmīr currency. The earliest examples of this form are found in the coinage of Toramāṇa, some specimens of which exhibit the king sacrificing at an altar after the Kushān manner, clad in a peculiar skirt and frilled drawers. This curious costume assumes a very grotesque appearance on the later more debased coins, and the seated goddess of the reverse suffers equal degradation. No Kashmīr coins possess any pretence to beauty—the whole coinage is utterly barbarous. The weight of the Toramāṇa coins

<sup>1</sup> The *Khāṅgi* coin may not belong to Kashmīr.

catalogued in this section ranges from 83.8 to 111.5 grains. Most of them weigh about 100 grains, a little more or less. The coins from the time of Śankaravarman onwards are lighter. Those catalogued range in weight (excluding the exceptional No. 5 of Kalāśa) from 71.5 to 97.5 grains. A full discussion of the weight standard of the Kashmir currency will be found in Dr. Stein's essay, already cited, to which the reader is referred. When Cunningham wrote, an accurate translation of the Kashmir chronicle was not available, so that some of his remarks need correction in the light of Dr. Stein's researches. But, notwithstanding this reservation, Cunningham's work still must be studied by any person who takes an interest in the rather unattractive Kashmir coinage.

<sup>1</sup> Cunningham erroneously distinguishes Jayasimha I (1127-30) from Jayasimha II (1132-55). In reality there was only one Jayasimha, who reigned for twenty-seven years. His history is related at great length in *Rājataranginī*, Bk. viii, and in Stein's *Introduction*; see also Stein, vol. ii, p. 314, note.

<sup>2</sup> Jāga-deva is not included in Stein's lists because the *Rājat.* was completed in 1149-50 A. D.

## SECTION XVIII

# THE COINS OF THE MAHĀRĀJĀS OF KĀNGRĀ

## INTRODUCTION

THE great fort at Kāngrā (N. lat. 32° 5', E. long. 76° 18') in early times was the stronghold of the kingdom of Jālandhara or Trigarta. The family of the Rājās claimed the honour of very high antiquity, but their coinage is comparatively modern. It begins with coins bearing the legend *Sāmanta deva*, directly imitated from the 'bull and horseman' coins of the kings of Ohind (*ante*, Sect. xiv). It is impossible to determine the personal name or the exact date of the Rājā of Kāngrā who struck the *Sāmanta deva* pieces; but, so far as may be judged from their appearance, and their close resemblance to the coins known to belong to the fourteenth century, they cannot be assigned to a period much anterior to 1300 A.D. The earliest coins assignable to a named Rājā of Kāngrā are those of Pithama (Prithivī) chandra deva, who reigned from about 1315 to 1330 A.D. The series closes with Triloka chandra deva in the beginning of the seventeenth century, and thus extends over a period of three hundred years in round numbers. During this period, according to Cunningham's list (*C.M.I.*, p. 104), eighteen Rājās reigned, and fifteen of them are known to have struck coins. In the following catalogue the coinage of twelve of those fifteen princes is represented.

The coins from first to last vary little, all being shabby little pieces of copper or bronze, rudely executed and devoid of all pretence to artistic merit. The type is a degraded imitation of the 'bull and horseman' device of the Ohind coins (*ante*, Sect. xiv), the bull being sometimes omitted, and the outline of the horseman often barely recognizable. The diameter ordinarily varies between .5 and .6 inch, with an average of about .55. The coin of Dharma chandra deva, diameter .41, is exceptionally small. The weight usually is a little above or below 50 grains. Excluding the anomalous Dharma chandra deva coin with a weight of 22.5 grains, and a few worn coins weighing

between 30 and 40 grains each, the weight of the specimens catalogued ranges from 40 to 63.3 grains.

The chief interest of this merely local coinage is derived from its remarkable uniformity and persistence of type. The coins are described with sufficient fullness by Cunningham (*C. M. I.*, pp. 101-8, Pl. XI), but Rodgers has pointed out that the reading of the name *Kapa* is erroneous. The coins attributed to the imaginary Kapa appear to belong to Rūpa chandra deva, the contemporary of Firoz Tughlak in the fourteenth century. Dr. Vogel has been engaged recently in investigating the antiquities of the Kāngrā Valley, and when his researches are published the local history will be known more fully than it is at present. He now announces (1906) that 'the historical fort and the numerous temples of Kāngrā Koṭ are completely destroyed' by the earthquake of 1905.

## SECTION XIX

# NEPĀL AND CHAMPĀRAN

## INTRODUCTION

THE modern kingdom of Nepāl, a considerable territory extending east and west for a distance of about five hundred miles between the Indian plains and the Himalayan snowy range, with a breadth of about one hundred and thirty miles, was formed by the Gurkha or Gōrkhālī conquests in the eighteenth century, as modified by subsequent transactions with the Government of India. But, strictly speaking, the name Nepāl applies only to the valley surrounding the capital, and in ancient documents it must be so interpreted. The other territories now included in the kingdom were ruled formerly by various independent Rājās. The Valley of Nepāl is a tract of comparatively level ground elevated about 4,500 feet above the sea, with an average length from east to west of about twenty miles, and an average breadth from north to south of about fifteen miles. This small region contains no less than three considerable towns or cities, which have been the capitals of principalities, namely, Kāthmāṇḍū<sup>1</sup> (lat. 27° 42' N., long. 85° 36' E.) or Kāntipur, the present capital; Pātan or Lalitāpur, two miles to the south-east of Kāthmāṇḍū, and Bhatgaon or Bhātgaon, nine miles to the east of that city. About sixty smaller towns are scattered over the valley.

Nepāl, in the limited sense defined above, was included in the empire of Aśoka, but in the fourth century A.D. was outside of the dominions of Samudra gupta. About 637 A.D. it seems to have been conquered by Harsha vardhana, Lord Paramount of Northern India, whose era, dating from 606-7 A.D., was used in the country in 640 and 645 A.D. (*Ind. Ant.*, xix, 40; *contra*, Ettinghausen, *Harṣa-Vardhana*, p. 47, Louvain, 1906). But his suzerainty over the valley lasted only a few years, and at the time of his death in 648 A.D. Nepāl was a dependency of Tu-fan or Tibet.

Its numismatic history begins in the sixth century with a series of large copper coins bearing the names of Mānāṅka, Gunāṅka, Vaiśra-

vana, Aṁśuvarman, Jishnugupta, and Paśupati. Inscriptions and the testimony of the Chinese pilgrim Hiuen Tsang prove that Aṁśuvarman was reigning between 640 and 650, and that he was succeeded by Jishnugupta. The dates of the coins inscribed with the names of Mānāṅka, Gunāṅka, Vaiśravana, and Paśupati cannot be determined with equal precision, but those of Mānāṅka may be assigned to the sixth, and the latest, those of Paśupati, to the eighth century. Vaiśravana and Paśupati probably are the names of deities, not of kings.

A Rājā named Rāghava deva introduced a new era, the Nepālī or Newār Samvat, the first year of which began on October 20, 879 A.D. Dates recorded in this era are converted roughly into dates A.D. by the addition of 880. M. Lévi believes that the establishment of the Nepālī era was the official declaration of the independence of Nepāl, which then severed its political dependence on Tibet. A wide gap separates the latest ancient coins, those bearing the name of Paśupati, from the earliest coins of the Malla kings at the beginning of the seventeenth century, when the country was divided into the three principalities of Bhatgaon, Kāthmāṇḍū, and Pātan. The first recorded coin date seems to be 751 N.S. = 1631 A.D. of Siddhi narasimha of Pātan; but the catalogue includes an undated coin of Lakshmi narasimha of Kāthmāṇḍū, who reigned from 1595 to 1639 A.D. According to the native chronicle the first silver coinage of Nepāl was struck in the sixteenth century by Rājā Mahindra Malla (No. 13) of Kāthmāṇḍū, who visited Delhi, and obtained special permission from the Emperor, presumably Akbar (W., p. 207). The coins of the Malla Rājās of the three principalities are dated, if dated at all, in the Nepālī or Newār era, and the series extends up to the Gōrkhālī conquest in 1768 A.D.

In that year Pṛithvī nārāyaṇa sāk, who had become Rājā of Gorkhā, forty miles to the west of Kāthmāṇḍū in 1742 (W., p. 290), conquered the Valley of Nepāl, and established the dynasty which still subsists, although overshadowed by the hereditary ministers, who are the real rulers of the country. The Gōrkhālī coins are dated in the Śaka era, which may be converted roughly into the Christian era by the addition of 78.

The ancient copper coinage of Aṁśuvarman, &c. is closely allied to the Yaudheya coinage, and, like it, is descended from the Kushān. The heaviest of the specimens catalogued weighs 208.4 grains, and may have been intended for a  $1\frac{1}{2}$  *pana* piece of about 219 grains. The Malla coinage, in silver only, seems to have been struck to the Delhi rupee standard of 175 grains. Some specimens exhibit imperfect attempts to copy the Persian or Arabic legends of the Mughal coinage. All the known coins are broad thin pieces about an inch in diameter, generally weighing about 85 grains. The heaviest recorded weight for these half-

rupees is 87.5 grains for coins of Siddhi narasimha of Pātan and Rājajita malla of Bhatgaon. The types, excepting a few pieces which attempt to copy the Mughal coinage, are local in character.

The Gōrkhālī coinage bears a general resemblance to that of the Malla Rājās, and is struck to the same standard, but includes examples of whole rupees, as well as of fractions smaller than the half. Girvān yuddha vikrama and Surendra vikrama issued gold coins similar to the silver in weight and design; and the last-named prince also emitted an extensive copper coinage. But the Nepalese prefer the so-called 'dumpy pice', rough lumps of copper manufactured by private persons, which are largely used to this day, not only in Nepāl, but in the adjoining British districts.

For the ancient copper coinage, *C. A. I.*, pp. 112-18, Pl. XIII, is the best authority. The Malla and Gōrkhālī coinage has not been described previously in detail, and, except a few specimens in Marsden's *Numismata Orientalia*, could be studied hitherto only in Mr. Rodgers' rough lists. The collection now catalogued, the origin of which I do not know, is sufficiently comprehensive to give a good notion of the coinage of Nepāl from 1600 A. D. to the present time.

Materials for the history of the country will be found in sundry articles in *Ind. Ant.*, vols. ix, xiii, xiv; D. Wright, *History of Nepāl* (Cambridge Univ. Press, 1877, cited as W.); Prof. C. Bendall, *A Journey in Nepāl and Northern India* (Cambridge Univ. Press, 1886; esp. Table II); 'The History of Nepāl and Surrounding Kingdoms (1000-1600 A. D.), compiled chiefly from MSS. lately discovered' (*J. A. S. B.*, Part I, 1903); and Prof. Sylvain Lévi, *Le Népal, Étude historique d'un Royaume hindou* (3 vols., Paris, 1905). The last-named work embodies the results attained by all earlier inquirers. I have seen only the first volume.

The proper attribution of the coins of Madana simha deva of Champārān was discovered by the late Prof. C. Bendall, who gives the following list of the

'Dynasty of Gorakhpur-Champārān (Western Tirhūt)

1. Prithvi-simha deva, A. D. 1434-5.

2. Śaktisimha.

3. Madana (Simha deva), 1453-4, 1457-8' (*J. A. S. B.*, Part I, 1903, *ut sup.*, pp. 20, 31 of reprint).

The coins, which are common in Gorakhpur, also occur in the Panjāb (Rodgers, *Cat. I. M.*, Part III, pp. 100, 125; *Cat. Lahore Mus.*, Part IV, p. 12 (20 specimens), with erroneous readings; V. A. Smith, *J. A. S. B.*, Part I, 1897, p. 310; the reading *pranaya* gives better sense than *pranava*).

<sup>1</sup> The A. S. B. specimens of Mānāṅka and Amśuvarma, part of a find of forty coins, were presented in 1887 by the author, to whom they had been given by Dr. Gimlette, Residency Surgeon at Kathmāṇḍū. No. 3 of Amśuvarman was the only one of its kind in the lot. Three specimens of Mānāṅka and five of Amśuvarman, which were then retained by the author, are now in the Bibliothèque Nationale, Paris.

Date below 789 (N. S. = 1669 A. D. Pl. XXVIII, 4). <sup>3</sup>
---	------	----------------	---	---

<sup>1</sup> The honorific prefix *Śrī* is not translated. 'Pratāpa malla inonde de sa prose et de ses vers l'étendue de ses domaines' (Lévi, vol. i, p. 216). See also W., p. 215.

<sup>2</sup> For the story see W., pp. 219, 220. 'The inscription on Chakravartendra's coin, devised by the Svāmi, consists of a triangular *Bānāstra* (bow and arrow), *Pās* (a noose), *Ankus* (the iron hook for driving an elephant), *Kamal* (a lotus), *Chāmar* (a yak's tail), and Sambat 789. This device caused his death. Note.—A bow and arrow are ominous of death, but, nevertheless, the water in which such a coin is dipped possesses the quality of causing a speedy delivery in child-bed. These coins, which are very rare, are still used for this purpose.'

## SECTION XX

# THE NORTH-EASTERN FRONTIER KINGDOMS; ASSAM AND MINOR STATES

## INTRODUCTION

It is unnecessary to discuss in this place the meagre data available for the reconstruction of the ancient history of the kingdom of Kāmarūpa, which corresponded roughly with the modern province of Assam (Āsām). The early rulers of the country have not left any numismatic memorials. The modern history of Assam begins with the invasion of the Āhōms, who are 'the descendants of those Shāns who, under the leadership of Chukāphā, crossed the Patkoi [mountains] about 1228 A. D. (or just about the time when Kublai Khān was establishing his power in China) and entered the upper portion of the province, to which they have given their name. The Āhōms were not apparently a very large tribe, and they consequently took some time to consolidate their power in Upper Assam. They were engaged for several hundred years in conflict with the Chutiyās and Kachāris, and it was not till 1540 A. D. that they finally overthrew the latter, and established their rule as far as the Kallang [river near Gauhātī]. . . . Subsequently the Koch kingdom [further west] was divided into two parts, and as its power declined that of the Āhōms increased, and the Rājās of Jaintia, Dimarua, and others, who had formerly been feudatories of Biśwa Singh, acknowledged the suzerainty of the Āhōms. The Musalmāns on several occasions invaded their country, but never succeeded in permanently annexing it. . . . In 1663 A. D. Mīr Jumlā invaded the country with a large army, and after some fighting took the capital. [But difficulties ensued, which made] him 'glad to patch up a peace. . . . The Āhōms then took Gauhātī and . . . defeated another Musalmān army. The Āhōms were then [about 1670 A. D.] at the height of their power; all the minor rulers of the country acknowledged their supremacy. . . . But even then the decline was at hand. They had for some time hankered after Hinduism, and the Rājās had for years been in the habit of taking a Hindu as well as a Shān name. Eventually Rudra Singh, alias Chukrungphā, who became king in 1695, [and is regarded by many as the greatest of all the

Āhōm kings] resolved to make a public profession of Hinduism, . . . but died in 1714 while still unconverted. His son, Sib Singh [Śiva simha], succeeded him, and became a disciple of Krishṇa-rām [the Śākta Gosain of Nadiā]. In his reign the seeds of future dissensions were sown by the persecution of the Moamaras, while the pride of race, which had hitherto sustained the Āhōms, began to disappear. . . . Patriotic feeling soon disappeared, and the country was filled with dissensions. . . . Captain Welsh was deputed by Lord Cornwallis to help the King Gauri-nāth Singh, who was then being besieged at Gauhātī, and with his aid he was once more freed from his enemies. At this juncture Sir John Shore succeeded to the Governor-Generalship, and one of his first acts was to recall Welsh (1794 A.D.), after whose departure the country was given again over to anarchy. The aid of the Burmese was then invoked (1816 A.D.), and the latter remained in the country until 1824, when they were driven out by our troops, and the country was annexed' [early in 1825].<sup>1</sup> An Āhōm Rājā however continued to exist for some time longer, and in 1844 the last of the royal line did good service by arranging for the publication of a history of his country, which had always been careful to preserve its annals.

The foregoing summary of the history will serve, with little additional explanation, to render intelligible the fine series of coins now catalogued. A list of the Rājās will be found in Prinsep's *Useful Tables*, copied into Duff's *Chronology of India*, and corrected by Gait (*Report on the Progress of Historical Research in Assam*, Shillong, Secretariat Printing Office, 1897). The blue-book last named gives complete references to all publications on the subject of Assamese history, which has recently been treated in detail by Mr. Gait in his work entitled *A History of Assam* (Calcutta, Thacker Spink, 1905), which also deals with the neighbouring minor states.

The initial syllable of the Shān names of the kings is generally given as *Chu*, but Bābū Golāp Chandra Baruā, the Āhōm translator, transliterates it as Śu (ꯀ) in his account of the Āhōm coins (*J. A. S. B.*, Part I, 1895, p. 286, Pl. XXVII). The six coins described by the Bābū and Mr. Gait are all included in this catalogue, with the addition of two specimens of Śupātpḥā or Gadādhara simha from the Indian Museum cabinet. The earlier Rājās seem to have issued coins inscribed with legends in the Āhōm language and character only, but Rājā Pramatha simha, alias Śuneṣṭḥā, used both Āhōm and Sanskrit. The catalogue includes one of his coins with Āhōm and eight with Sanskrit legends. The Āhōm language, which is now almost extinct, is a member of the group of Northern Shān (Shām or Tai) languages, and is written in

<sup>1</sup> Grierson (quoting Gait), *Linguistic Survey of India*, vol. ii, p. 61, with additions in brackets.

a peculiar character, ultimately derived from the Pāli. In the work above cited Dr. Grierson has supplied ample materials for the study of the Āhōm language and alphabet, but his vocabulary fails to include the words in the coin legends. The readings of those legends in the catalogue are given on the authority of Bābū Golāp Chandra Baruā.

The coins of the dynasty are all octagonal, except a few of the smallest, which are circular or oval,<sup>1</sup> and certain square pieces struck by Queen Pramathēśvari and Rājeśvara simha, which bear Persian legends. Rājeśvara simha also struck coins of the usual octagonal shape with Persian legends. These Assamese coins with Persian legends, although struck in considerable numbers, have become known only recently.<sup>2</sup> The larger pieces are of thick, solid fabric, and are said to be of good metal. Most of them are in silver, but some are gold. The legends are well executed, and those in the Sanskrit language usually are inscribed in the Bengālī script. They are intensely devotional in expression, the commonest formula describing the Rājā as a bee feeding on the nectar from the feet of Śiva or some other deity of the Hindu pantheon. Poetical words, such as *aravinda* for 'lotus' and *makaranda* for 'nectar', are sometimes substituted for the more common equivalents *kamala* and *amṛita*. The Āhōm legends of Śupātpā or Gadādhara simha express devotion to the tribal god Leṇḍan, who was identified with the Hindu Indra or Purandara. The legend on the coin of Śukleṇmuṇi represents the Rājā as praying to the Almighty (*tārā*).

The coins, the heaviest of which weighs 176·7 grains, appear to be intended for rupees of about 175 grains each, or for fractions of a rupee. The smallest is a tiny silver piece of Gaurinātha, .22 inch in diameter, and weighing only 4·2 grains; but small as it is, the Rājā's name is distinctly legible (Pl. XXIX, 8). The gold coins are struck to the same weight standard as those in silver. Most of the coins are dated in the Śāka era, and some show the regnal year in addition.

The coinage of the minor states may be dismissed briefly. The small principality of Jayantāpura, now known as the Jaintia Parganas to the north-east of the Sylhet District, was annexed in 1835 owing to the abduction of four British subjects for use as human sacrifices to Kālī. Its rare coinage is represented by four specimens in the Indian Museum (Pl. XXIX, 13, 14), one of which is dated in 1630 Śāka = 1708 A. D., and the three others are dated 1653 Ś. = 1731 A. D. One duplicate of the latter date has not been catalogued. The coins are exceptionally broad, and bear legends similar to those of the Assamese coinage. Mr. Gait has recorded that

<sup>1</sup> The prevailing shape is supposed to have been suggested by a statement in the *Jogini Tantra* which describes the Āhōm country as octagonal (Gait, *History*, p. 97).

<sup>2</sup> Mr. H. N. Wright kindly examined the coins with Persian legends, which were received in May, 1906.

'a number of new Jaintia coins were brought to light by Babu Giris Chandra Dās, Assistant Settlement Officer of Jaintia, and a collection was made which has been presented to the Asiatic Society of Bengal. The collection includes whole coins of Çaka 1591, 1592, 1630, 1653, 1696, 1704, 1707, and 1712; and quarter coins of Çaka 1653 and 1712: the quarter coins alone have the name of the kings who minted them, viz. Bara Gosain and Ram sinha respectively. These coins have been described (with a plate) in the *J. A. S. B.* for 1895, Part I, p. 242' (*Report*, p. 4). The paper referred to, entitled 'Some Notes on Jaintiā History', and chapter XI of Mr. Gait's *History of Assam*, give all the information available on the subject. The A. S. B. collection described by Mr. Gait has not been sent to me.

The Tipperah country (Tripura), which lies to the south of Sylhet and the east of Dacca, is now in part a British District, and in part a native state, known as Hill Tipperah. Mr. Gait (*Report*, p. 4) mentions two coins of Tipperah, one of Govinda Mānikya deva, dated Śāka 1602, the other of Dharma Mānikya deva, dated 1636. The latter was presented to the A. S. B. (*Proc.* 1895, p. 86), but has not come into my hands. The specimen now catalogued, struck by Rāmasimha Mānikya deva and his consort Tārā, is new, but similar to the coins previously known. The reverse device is a grotesque lion with a trident on his back, and the date is 1728 Ś. = 1806 A. D.

The Manipur State, lying between Cachār and the Burmese frontier, was deprived of its independence in 1891 on account of the massacre of Mr. Quinton and his companions (Gait, *History*, p. 343). Some small copper coins with *mā* on the obverse, and the reverse blank, are ascribed to this State by Mr. Rodgers.

Chhotā Udaipur is, I believe, part of Tipperah. The utterly barbarous copper coins assigned to it by Mr. Rodgers are undecipherable to me. The recent copper coins of the Sikim State to the north of Darjeeling are not in any way remarkable.

## SECTION XXI

# WESTERN AND SOUTHERN INDIA, EXCLUDING VIJAYANAGAR AND MYSORE

## INTRODUCTION

THE metric system of Southern India appears to be based upon the weights of two kinds of seeds, the *mañjāḍi* (*Adenanthera pavonina*), averaging about five grains Troy, and the *kaḷaṅḡu*, 'Molucca bean' or 'bonduc nut' (*Caesalpinia bonduc*, *Guilandina bonducella*), which was considered as equivalent to ten *mañjāḍis*. The *rati* seed (*Abrus precatorius*), the base of the metric system of Northern India, was not used in the south in early times, but in practice the *kaḷaṅḡu* weight did not differ widely from the northern standard of 32 *ratis*, to which the punch-marked silver coins (*ante*, Sect. V) were struck. These punch-marked coins, which occur all over India, north and south, have been considered in Section V with reference to the whole country. The southern specimens may be regarded as roughly equivalent to a *kaḷaṅḡu*. Large classes of ancient thin, flat coins, such as are described in Loventhal's little book, *The Coins of Tinnevely* (Madras, Higginbotham & Co., 1888), are found in the peninsular region, but, not being represented in the Indian Museum or Asiatic Society of Bengal cabinets, may be passed over with this allusion.

The most characteristic southern coinage is that in gold of small pieces known as *fanams*, equivalent in weight to *mañjāḍi* seeds, and of larger pieces known as *hūns*, *varāhas*, or *pagodas*, ten times the weight of the fanam, and equivalent to *kaḷaṅḡu* seeds.

The fanam is a tiny, thin, circular die-struck coin, and I do not know whether it was an independent Dravidian invention or was derived from some foreign model. The pagoda (*hūn* or *varāha*) was developed independently, like the early Lydian coins, from a globule or spherule of gold. The earliest examples, of uncertain date, are either quite plain or have a faint punch-mark in the centre. Specimens of these early coins are catalogued under the sub-head 'Early Anonymous, blank or nearly blank'. Gradually, as in Greece, the globule was

flattened, and became an ordinary die-struck coin. Pagodas continued to be struck until 1819. In 1835 the special southern currencies were superseded by the imperial rupee coinage. The reader will find the numismatic history of the south, so far as it is known, worked out in Elliot's *Coins of Southern India* (Intern. Num. Or., 1885); Tufnell's *Hints to Coin Collectors in Southern India* (Madras, Higginbotham & Co., 1889); Loventhal's work already cited; Dr. Bidie's article, 'The Pagoda or Varāha Coins of Southern India' (*J. A. S. B.*, Part I, 1883, p. 33); and Mr. Thurston's catalogues of coins in the Madras Museum, especially the volume entitled *History of the Coinage of the Territories of the East India Company in the Indian Peninsula* (Madras, Government Press, 1890).

The curious cup-shaped pieces known as *padma tankas*, or 'lotus-coins', are heavier than the pagoda, averaging about 58 grains each. Their peculiar form connects them with the coinage of the Western Chālukya dynasty of Kalyāṇi, but their date cannot be determined with accuracy. The gold coins of Jagadekamalla of that dynasty, either J. I (1018-42 A. D.) or J. II (1138-49 A. D.), are now published for the first time (Pl. XXX, 2, 3).

The base silver coins of Vishamasiddhi or Kubja-Vishṇu vardhana, the first king of the Eastern Chālukya dynasty of Vengī (615-33 A. D.), although described by Dr. Hultzsch, have not been figured previously so far as I know (Pl. XXX, 1). The strange broad, thin punch-marked gold coinage of the same dynasty in the eleventh century, which has been known for many years, is represented in the catalogue by a single coin of Śaktivarman or Chālukya chandra.

Two of the rare coins of the Kādamba chiefs of Goa in the twelfth century, one gold and one silver, are catalogued, but unluckily the king's name cannot be read completely on either (Pl. XXX, 5, 6).

The Gāṅga dynasty of Kalinga is represented by eight gold fanams (Pl. XXX, 7) issued by Anantavarma Choḍaganga (1075-1146 A. D.). The capital of this dynasty was at Kalinganagara, the modern Mukhalingam in the Ganjām District (*Ep. Ind.*, iv. 188; *Ind. Ant.*, xxv, p. 322).

The specimens of the coinage of the Hindu state of Travancore (Pl. XXX, 8-15) are all modern, the oldest not being earlier than the eighteenth century. The silver *chakram* is of the same weight as the gold fanam, between five and six grains. The copper *kāsu* or 'cash', weighing nearly ten grains, represents the cowrie of Bengal, and was valued as the eightieth part of the gold fanam (*C. S. I.*, pp. 59, 139). The recent coins of Travancore copy English models.

The representation in the Museum of the Indo-Portuguese, Indo-French, and early Anglo-Indian coinage is so fragmentary that it would be out of place here to go into any detail on the subject. Generally

speaking, the collection of southern coins now catalogued is miserably imperfect, and wholly unworthy of an imperial museum.

For convenience the coins of Vijayanagar and Mysore are treated in a separate section; but, excepting those of the Muhammadan dynasty, they follow the ordinary southern types of pagoda and fanam.

The southern coinage, as a whole, is of far less interest and historical value than the northern, the most characteristic kinds rarely being inscribed or dated. No adequate work on the subject exists, the publications cited above all being imperfect in one way or another. Sir Walter Elliot's work, *The Coins of Southern India*, is the most important, and gives the best general view.

The history of the Chālukya and other dynasties of the Deccan and Peninsula will be found in Fleet's *Kanarese Dynasties* (2nd ed., *Bomb. Gaz.*, vol. i, Part II). The Chālukyan coins are not struck to the southern scale of weights. The gold coins seem to be intended for drachmas, and the coins of the Kādamba chiefs of Goa may be struck to the same weight standard. The Gānga king of Kalinga and Orissa, Anantavarma Chodaganga, who reigned from 1075–1146 A.D., issued heavy gold fanams, weighing between seven and eight grains each. The specimens in the Museum formed a necklace or similar ornament.

# THE KINGDOMS OF VIJAYANAGAR AND MYSORE

## INTRODUCTION

THE most convenient abstract of the history of the kingdom of Vijayanagar will be found in Sewell's *Lists*, vol. ii, p. 243, and fuller information is given in the same author's work, *A Forgotten Empire*. The First Dynasty is represented in the catalogue by five coins, two of Harihara II and three of Deva Rāya II. Kṛishṇa deva Rāya of the Second Dynasty (1509–30 A. D.) is traditionally held to have been 'one of the greatest monarchs that ever ruled the country'. Fourteen of his gold coins are catalogued, the attribution of one being doubtful. The next king, Achyuta, was either a brother or son of Kṛishṇa deva. The two specimens of his coinage have the reverse device of a double-headed eagle monster (*gaṇḍa bheruṇḍa*). I think it desirable, contrary to the practice of previous writers, to call the mythological side of these coins the reverse, and to designate as the obverse the side bearing the king's name. The next king, Sadāśiva, who succeeded as an infant in 1542, seems to have been a son of Achyuta. Two coins are catalogued under his name, of which No. 2 is certainly his, but No. 1 may belong to an homonymous chief of Ikkēri.

The coinage of the Third Dynasty is very poorly represented. Rāma Rāja, to whom four coins are attributed, was killed in 1565 A. D. at the battle of Tālikota, which ruined the kingdom of Vijayanagar; although descendants of the royal house continued to rule as petty chiefs for some time longer. Three coins bearing the name of Venkaṭeśvara belong to one or other of these chiefs, about 1600 A. D.

The best account of the Vijayanagar coinage is that given by Prof. Hultzsch in the article entitled 'The Coins of the Kings of Vijayanagara' (*Ind. Ant.*, vol. xx (1891), p. 301, with two plates). The author gives full references to earlier publications. In *Ind. Ant.*, vol. xxv, p. 318, Prof. Hultzsch has published 'the only silver coin of the Vijayanagara kings that has hitherto come to light'. The

numerous copper coins of the series are not represented in the very poor collection now catalogued.

The kingdom of Mysore grew out of the wreck of the kingdom of Vijayanagar. The catalogue includes only one specimen of the coinage of the early Hindu Rājās, a 'Kanteroy fanam' of Rājā Kaṁthirava (1628-58 A. D.). The extensive coinage of Mysore during the reigns of Haidar 'Alī and his son Tipū, the Muhammadan conquerors or usurpers, is represented in the Indian Museum only by a few odds and ends. A full discussion of the Mysore coinage will be found in Mr. Thurston's catalogue of the Mysore coins in the Madras Museum (Madras, Government Press, 1888).

## SECTION XXIII

# THE MEDIAEVAL COINAGE OF CEYLON

## INTRODUCTION

THE mediaeval history of Ceylon having been recorded by the native chroniclers in considerable detail with reasonably close attention to chronological accuracy, and having been made readily accessible to European readers in many modern books, no difficulty is felt ordinarily in assigning the extant coins to the proper kings and approximately to correct dates. Exact years cannot be determined because no coin is dated. The only doubt in the attribution of the coins occurs in the case of those bearing the name of Vijaya Bāhu. Several kings of that name ruled in the latter years of the twelfth century and during the thirteenth, to any one of whom the coins might be assigned; but they are attributed usually to Vijaya Bāhu II, nephew of the great Parākrama Bāhu, and this attribution has been followed in the catalogue.

The known coins extend over a period of nearly a century and a half, beginning with Parākrama Bāhu (1153-86), and ending with Bhuvanaika Bāhu who came to the throne in 1296 A. D. They are all substantially identical in type, and are copies of the coinage of the powerful Chōla king, Rājarāja, who reigned on the mainland from 985 to 1011 A. D. The generals of Parākrama Bāhu invaded Southern India in or about the year 1175, and it may be assumed with a high degree of probability that the Ceylonese imitations of the Chōla coinage are all subsequent to that date. No coins are extant of eight of the series of sixteen rulers beginning with Parākrama and ending with Bhuvanaika.

The small collection now catalogued includes specimens of the copper coinage of six of the eight sovereigns whose coins are known, but the rare issues of Niśśanka Malla (1187-96) and Chodaganga (1196-7) are not represented in it, nor are there any examples of the limited gold and silver coinage. The existence of a silver coinage, ignored in Professor Rhys Davids' book, has been fully proved by Mr. Lowsley, who collected numerous genuine specimens. Parākrama Bāhu, when his armies invaded Southern India, evidently was impressed by the huge amount of Rājarāja's coinage in copper. Sir Walter Elliot

observes:—‘Copper pieces, the more perfect specimens weighing from 50 to 60 grains, bearing the name of Rāja Rāja, are met with every day. They are brought in numbers to be melted up by the copper-smiths, and one find within my own knowledge in Tanjore yielded upwards of 4,000<sup>1</sup>’ (*C. S. I.*, p. 133). The Ceylonese monarch exactly copied the proceedings of his model and issued immense quantities of copper coin, but comparatively little of silver and gold. The type introduced by Rājarāja is characterized by a very peculiar image of the king standing on the obverse, and a grotesque monkey-like seated figure on the reverse. The legend in contemporary Nāgarī script is on the reverse. These characteristics, evidently of northern origin, and ultimately traceable, through the Gupta and Kushān coinage, to Greek models, were faithfully reproduced by Parākrama Bāhu and his successors.

The standard coin in this style was the *māsha* or *massa* of about 70 grains; and most of the extant examples in all metals are *massas*. The subdivisional pieces are scarce or rare, as also are the double *massas*. The twenty-five coins catalogued and twelve excluded duplicates are all *massas*, except one small worn piece of Parākrama Bāhu, which now weighs only 8½ grains, but may have been intended for a quarter-*massa*. The octagonal *massa* of Queen Lilāvati (Pl. XXXI, 5) is not mentioned in the books, and seems to be unique.

The first intelligible, although imperfect, account of these Ceylonese coins was given by Prinsep (*Essays*, ed. Thomas, vol. i, Pl. XXXV). They are briefly noticed by Elliot (*C. S. I.*, pp. 108–10), and have been treated at considerable length by Prof. Rhys Davids (‘Ancient Coins and Measures of Ceylon’, in *Intern. Num. Or.*, London, Trübner, 1877). But Prof. Rhys Davids’ account requires numerous corrections and additions, which have been supplied by Mr. B. Lowsley in a valuable essay entitled ‘Coins and Tokens of Ceylon’ (*Num. Chron.*, 1895, p. 211, Pl. VIII). Abstracts of the history of the period will be found in Prof. Rhys Davids’ work, Emerson Tennant’s *Ceylon*, and in many other books easily accessible.

## SECTION XXIV

# COINS OF ARAKAN AND OTHERS

## INTRODUCTION

THE few coins described in this section hardly can claim a rightful place in this catalogue, but, having been sent to me, must be disposed of. The little that appears to be known about the history and coinage of Arakan has been published by Sir Arthur Phayre in his treatise entitled 'Coins of Arakan, of Pegu, and of Burma' (*Intern. Num. Or.*, London, Trübner, 1882).

The silver coins with the effigy of a recumbent bull and Nāgarī legends are referred to the 'Chandra' dynasty, supposed to have reigned between 788 and 957 A. D. Coins of this type are found buried in the ground and among old ruins in various parts of Arakan. Several were presented to the Asiatic Society of Bengal, and have been described in the Society's Journal, but those specimens, if still preserved, have not been submitted to me. The examples now described all belong to the Indian Museum cabinet, and there is no record of their *provenance*. No. 1, with the legend *Śrī Śivasya* (? *Givasya*), is not noticed by Phayre. The two thick silver coins, Nos. 8 and 9, are No. 22 of Phayre's Plate II, and were struck in the year 1144 of the Arakanese era, equivalent to 1782 A. D., by Mahā Samadā Rājā, the last king of Arakan, prior to the conquest of the country by the Burmese, who were compelled to cede it to the Indian Government by the treaty of Yandaboo in 1826. These coins have no device, and the obverse legend is repeated, letter for letter, on the reverse.

The coins which I am unable to assign precisely include a little bronze coin of Cambodia, supposed to date from the eighteenth century. Mr. Rodgers has recorded the odd fact that it was obtained at Kāngrā in the Panjāb. Possibly it may have been brought there by a Sikh policeman returning from Bangkok. I am indebted to Prof. Rapson for identifying this piece as Cambodian. The 'symbolical' coin from Burma differs from all of those published by Phayre. I am unable to read the legends on certain inscribed coins. The characters on Nos. 1 and 3 are Nāgarī, but I cannot make sense of them, while the script on

Nos. 2 and 4 is wholly unknown to me. Nos. 7 and 8 are supposed to be Tibetan. I cannot make any suggestion about No. 9, which bears the legend *Jajjapurā* (or *-purī*).
